SECOND AMENDED CLASS ACTION COMPLAINT
AND DEMAND FOR JURY TRIAL

Plaintiffs Crawford's Auto Center, Inc. and K&M Collision, LLC, on behalf of themselves and the classes of all others similarly situated as defined below, files this Second Amended Complaint against Defendants State Farm Mutual Automobile Insurance Company, Allstate Corporation, Government Employees Insurance Company (GEICO), The Progressive Corporation, Farmers Insurance Exchange, Liberty Mutual Group, Inc., Nationwide Mutual Insurance Company and their respective affiliates, subsidiaries and divisions, as defined in detail below, and allege as follows based on: (a) personal knowledge; (b) the investigation of their counsel; and (c) information and belief.

I. NATURE OF THE ACTION

1. This nationwide class action seeks damages and additional relief under the Racketeer Influenced and Corrupt Organizations Act ("RICO"), and other state laws, to remedy Defendant Insurers' long-running unlawful conduct to suppress compensation to repair facilities for automotive collision repairs covered by insurance. Defendant Insurers State Farm, Allstate, GEICO, Progressive, Farmers, Liberty Mutual and Nationwide, are seven of the eight largest private passenger auto insurers in the United States, collectively holding approximately two-thirds of the market, and control all aspects of collision repairs, including the compensation paid to repair facilities.

2. Defendant insurers are obligated to indemnify collision losses under their policies and, in the event that the vehicles can be repaired, the vehicles must be restored to pre-loss or pre-damaged condition. Defendant Insurers have the option to repair the vehicles or pay for the repairs. Repairing the vehicles would saddle Defendant Insurers with liability – liability they do not want. So, Defendant Insurers choose to pay for the repairs performed by collision repair facilities – the professionals that actually must assume responsibility for the repairs. However,

Defendant Insurers' goal is to minimize their loss expense, paying as little for the repairs as possible. Collision repair professionals – those that encompass the Plaintiffs and the proposed classes in this case – have a different goal. Their goal is to complete the repairs in a manner that conforms to industry standards, and adheres to all manufacturer guidelines and specifications, so that the repairs that are performed are safe and effective, and which restores the vehicles to pre-loss condition. Quite naturally, these repair professionals expect to be compensated at a rate that is commensurate with the standard of repairs that they are performing.

3. Therein lies the tension, but Defendant Insurers have created a unilateral solution to achieve their goal of cost savings, while still maintaining the appearance of satisfying their policy obligations to pay for the loss. Defendant Insurers have instituted policy language qualifying their obligation to pay only the “prevailing competitive price” for repairs (or words to that effect), which has commonly become known as the “prevailing rate”. To establish the prevailing rate, Defendant Insurers have each established nationwide direct repair programs, comprised of repair facilities that agree to take less in compensation for their work in exchange for a steady stream of referred work. Defendant Insurers are thereby able to control and minimize their costs. The catch is that this direct repair program business model is predicated upon speed and volume, which leads to lower quality repairs, which do not restore vehicles to pre-loss condition, and often create unsafe, dangerous vehicles. No matter, as Defendants have now cemented the prevailing rate through these direct repair programs. Further, the Defendant Insurers exclusively work with the only three auto data companies in the U.S. to promulgate these co-called prevailing rates. But these rates are merely a feedback loop of direct repair rates that Defendant Insurers pay those facilities, as well as other controlled data that misrepresents what actually is paid for collision repairs across the country. This case concerns the Defendant

Insurers' attempts to enforce these artificial prevailing rates upon collision repair facilities like Plaintiffs and the proposed classes, which have not agreed to Defendant Insurers limited, pre-defined compensation.

4. In addition, the three auto data companies also sell the only "estimating programs" upon which all vehicle repairs are based. The estimating programs are sold both to Defendant Insurers for the purposes of adjusting claims to pay for repairs, and to collision repair facilities to appraise the damaged condition of the vehicles and to blueprint the repairs. These programs are supposed to be neutral – as are the data companies, and the programs are accompanied by guides that speak to all of the open contingencies that may arise in a collision repair, which will require enhanced blueprinting of repairs. Notwithstanding the clear intent of these programs, they are utilized by Defendant Insurers as an artificial limit on repair compensation, and the data companies facilitate this artifice as well. When collision repair facilities like Plaintiffs and the proposed classes present a repair order to perform the required repairs adhering to manufacturer guidelines and specifications, which also outlines the compensation for their work, they are fraudulently told – uniformly and consistently – that the additional operations or expanded procedures, as well as the labor times listed to perform these repairs, do not meet the so-called prevailing rate. And, the data companies who sell this program which is supposed to guide collision repair facilities in preparing a proper estimate, actually "scrub" the estimates presented by Plaintiffs and the proposed classes for the Defendant Insurers in order to reduce their repair compensation.

5. As a result of this conduct, collision repair compensation to Plaintiffs and the proposed classes has been artificially suppressed for years. This class action is essential to

remedy the Defendant Insurers' ongoing unlawful conduct, and provide the appropriate compensation to which Plaintiffs and the proposed classes are entitled.

II. JURISDICTION AND VENUE

6. This Court has jurisdiction over the subject matter of this action pursuant to 28 U.S.C. § 1331 and 18 U.S.C. § 1964 for Plaintiffs' claims arising under RICO, §§ 1961 *et seq.*

7. This Court has personal jurisdiction over Defendants pursuant to 18 U.S.C. § 1965(a), (b) and (d) because Defendants resided, transacted business, were found, or had agents in this District, and a substantial portion of the alleged activity that affected interstate trade and commerce discussed below has been carried out in this District. This Court also has personal jurisdiction over the Defendants pursuant to 28 U.S.C. § 1391(b), (c), and (d) because Defendants resided, transacted business, were found, or had agents in this District, and a substantial portion of the alleged activity that affected interstate trade and commerce discussed below has been carried out in this District.

8. Defendants' conduct, as described in this complaint, was within the flow of, was intended to, and did have, a substantial effect on, the interstate commerce of the United States, including in this District. Further, the RICO conspiracies in which the Defendants participated had a direct, substantial, and reasonably foreseeable effect on interstate commerce.

9. Each Defendant, or one or more of its affiliates, used the instrumentalities of interstate commerce, including interstate wires and the U.S. mail, to join or effectuate their RICO conspiracies.

10. Accordingly, this Court has personal jurisdiction over each Defendant, because each Defendant – throughout the United States and including in this District – transacted business, maintained substantial contacts, and/or committed overt acts in furtherance of their

illegal schemes and conspiracies. The RICO conspiracies were directed at, and had the intended effect of, causing injury to persons residing in, located in, or doing business throughout the United States, including in this District.

11. This Court has supplemental subject matter jurisdiction over the pendant state law claims pursuant to 28 U.S.C. §1367. This Court also has diversity jurisdiction over this action pursuant to 28 U.S.C. § 1332(d), because the amount in controversy for Plaintiffs and the classes exceeds \$5,000,000, and there are members of the classes who are citizens of a different state than the Defendants.

12. Venue is proper in this District pursuant to 18 U.S.C. § 1965(a), (b) and (d), and 28 U.S.C. § 1391(b), (c), and (d), because Defendants resided, transacted business, were found, or had agents in this District, and a substantial portion of the alleged activity and events alleged below that affected interstate trade and commerce occurred in this District.

III. PARTIES

A. Plaintiffs

13. Plaintiff Crawford's Auto Center, Inc. ("Crawford's") is a Pennsylvania corporation with its principal place of business at 302 West Uwchlan Avenue, Downingtown, Pennsylvania. Crawford's was and is engaged in the business of automotive collision repair, among other things. At all relevant times, Crawford's was injured – and continues to be injured – as a result of Defendants' unlawful conduct.

14. Plaintiff K&M Collision, LLC ("K&M") is a North Carolina limited liability company with its principal place of business at 161 Lenoir Rhyne Boulevard SE, Hickory, North Carolina. K&M was and is engaged in the business of automotive collision repair, among other

things. At all relevant times, K&M was injured – and continues to be injured – as a result of Defendants’ unlawful conduct.

15. Collectively, Crawford’s and K&M are referred to herein as “Plaintiffs”.

B. Defendants

16. Defendant State Farm Mutual Automobile Insurance Company is an Illinois corporation, having its principal place of business in Illinois. State Farm Mutual Automobile Insurance Company, together with its affiliates, subsidiaries and/or divisions, defendants State Farm General Insurance Company, an Illinois corporation, having its principal place of business in New Jersey, State Farm Indemnity Company, an Illinois corporation, having its principal place of business in New Jersey, State Farm Guaranty Insurance Company, an Illinois corporation, having its principal place of business in New Jersey, State Farm Fire and Casualty Company, an Illinois corporation, having its principal place of business in Illinois, and State Farm County Mutual Insurance Company of Texas, a Texas corporation, having its principal place of business in Texas (collectively referred to herein as “State Farm”), issues automotive insurance in various states and throughout the country. State Farm has company-wide, systematic and uniform claims management practices, and operates as a single, integrated enterprise for claims adjustment and administration purposes, including, without limitation, the conduct and subject matter at issue in this action.

17. Defendant Allstate Corporation is a Delaware corporation, having its principal place of business in Illinois. Defendant Allstate Insurance Company is an Illinois corporation, having its principal place of business in Illinois. Allstate Corporation and Allstate Insurance Company, together with their affiliates, subsidiaries and/or divisions, defendants Allstate County Mutual Insurance Company, an Illinois corporation, having its principal place of business in

Texas, Allstate Fire & Casualty Insurance Company, an Illinois corporation, having its principal place of business in Illinois, Allstate Indemnity Company, an Illinois corporation, having its principal place of business in Illinois, Allstate New Jersey Insurance, an Illinois corporation, having its principal place of business in New Jersey, Allstate New Jersey Property & Casualty Insurance Company, an Illinois corporation, having its principal place of business in New Jersey, Allstate Property & Casualty Insurance Company, an Illinois corporation, having its principal place of business in Illinois, Encompass Indemnity Company, an Illinois corporation, having its principal place of business in Illinois, Esurance Insurance Company, an Illinois corporation, having its principal place of business in California, Esurance Property & Casualty Insurance Company, an Illinois corporation, having its principal place of business in California (collectively referred to herein as “Allstate”), issue automotive insurance in various states and throughout the country. Allstate has company-wide, systematic and uniform claims management practices, and operates as a single, integrated enterprise for claims adjustment and administration purposes, including, without limitation, the conduct and subject matter at issue in this action.¹

18. Defendant Government Employees Insurance Company is a Maryland corporation, having its principal place of business in Maryland. Government Employees Insurance Company together with its affiliates, subsidiaries and/or divisions, defendants GEICO General Insurance Company, a Maryland corporation, having its principal place of business in Maryland, GEICO Indemnity Company, a Maryland corporation, having its principal place of

¹ Allstate also includes subsidiaries, affiliates and/or divisions Encompass Insurance Company of NJ, Encompass Property and Casualty Insurance NJ, Allstate North American Insurance Company, Allstate Texas Lloyds, Castle Key Insurance Company, Castle Key Indemnity Company, Encompass Floridian Indemnity, Encompass Floridian Insurance Company, Allstate Vehicle & Property Insurance Company, Encompass Home and Auto Insurance Company, Encompass Independent Insurance Company, Encompass Insurance Company, Encompass Insurance Company of America, Encompass Insurance Company of Massachusetts, Encompass Property & Casualty Company, Northbrook Indemnity Company, North Light Specialty Insurance Company, Esurance Insurance Company of NJ and First Colonial Insurance Company.

business in Washington, DC, GEICO Casualty Company, a Maryland corporation, having its principal place of business in Washington, DC, GEICO Advantage Insurance Company, a Nebraska corporation, having its principal place of business in Maryland, GEICO Choice Insurance Company, a Nebraska corporation, having its principal place of business in Maryland, GEICO Secure Insurance Company, a Nebraska corporation, having its principal place of business in Maryland, and GEICO County Mutual Insurance Company, a Texas corporation, having its principal place of business in Texas (collectively referred to herein as “GEICO”), issues automotive insurance in various states and throughout the country. GEICO has company-wide, systematic and uniform claims management practices, and operates as a single, integrated enterprise for claims adjustment and administration purposes, including, without limitation, the conduct and subject matter at issue in this action.

19. Defendant The Progressive Corporation is an Ohio corporation, having its principal place of business in Ohio. The Progressive Corporation, together with its affiliates, subsidiaries and/or divisions, defendants Progressive American Insurance Company, a Florida corporation, having its principal place of business in Florida, Progressive Casualty Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive Gulf Insurance Company, a Mississippi corporation, having its principal place of business in Ohio, Progressive Specialty Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive Classic Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive Michigan Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive Mountain Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive Northern Insurance Company, a Wisconsin corporation, having its principal place of business in

Ohio, Progressive Northwestern Insurance, an Ohio corporation, having its principal place of business in Ohio, Progressive Preferred Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive Security Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive Southeastern Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive West Insurance Company, a California corporation, having its principal place of business in California, Progressive Advanced Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive Choice Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive Direct Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive Garden State Insurance, an Ohio corporation, having its principal place of business in Ohio, Progressive Marathon Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive Paloverde Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive Select Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive Universal Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Progressive County Mutual Insurance Company, a Texas corporation, having its principal place of business in Ohio, Artisan & Truckers Casualty Company, an Ohio corporation, having its principal place of business in Ohio, and United Financial Casualty Company, a Missouri corporation, having its principal place of business in Ohio (collectively referred to herein as “Progressive”), issues automotive insurance in various states and throughout the country. Progressive has company-wide, systematic and uniform claims management practices, and operates as a single, integrated enterprise for claims

adjustment and administration purposes, including, without limitation, the conduct and subject matter at issue in this action.²

20. Defendant Farmers Insurance Exchange is an inter-insurance exchange, having its principal place of business in California. Defendant Truck Insurance Exchange is an inter-insurance exchange, having its principal place of business in California. Farmers Insurance Exchange and Truck Insurance Exchange, together with their affiliates, subsidiaries and/or divisions, defendants Farmers Insurance Company of Arizona, an Arizona corporation, having its principal place of business in Arizona, Farmers Insurance Company of Oregon, an Oregon corporation, having its principal place of business in Oregon, Farmers Insurance Company of Washington, a Washington corporation, having its principal place of business in Washington, Farmers Insurance Company, Inc., a California corporation, having its principal place of business in California, Farmers Texas County Mutual Insurance Company, a Texas corporation, having its principal place of business in Texas, Illinois Farmers Insurance Company, an Illinois corporation, having its principal place of business in Illinois, Mid-Century Insurance Company, a California corporation, having its principal place of business in California, Foremost County Mutual Insurance Company, a Michigan corporation, having its principal place of business in Texas, Bristol West Insurance Company, a Delaware corporation, having its principal place of business in Florida, Coast National Insurance Company, a Delaware corporation, having its principal place of business in California, 21st Century Centennial Insurance Company, a Delaware corporation, having its principal place of business in Delaware, 21st Century

² Progressive also includes subsidiaries, affiliates and/or divisions Progressive Bayside Insurance Company, Progressive Hawaii Insurance Corp, Progressive Commercial Casualty Company, Progressive Express Insurance Company, Progressive Freedom Insurance Company, Progressive Max Insurance Company, Drive New Jersey Insurance Company, National Continental Insurance Company and Mountain Laurel Assurance Company.

Indemnity Insurance Company, a Delaware corporation, having its principal place of business in Delaware and 21st Century Insurance Company, a Delaware corporation, having its principal place of business in Delaware (collectively referred to herein as “Farmers”), issues automotive insurance in various states and throughout the country. Farmers has company-wide, systematic and uniform claims management practices, and operates as a single, integrated enterprise for claims adjustment and administration purposes, including, without limitation, the conduct and subject matter at issue in this action.³

21. Defendant Liberty Mutual Holding Co., Inc. is a Massachusetts corporation, having its principal place of business in Massachusetts. Defendant Liberty Mutual Group, Inc. is a Massachusetts corporation, having its principal place of business in Massachusetts. Liberty Mutual Holding Co., Inc. and Liberty Mutual Group, Inc., together with their affiliates, subsidiaries and/or divisions, defendants The First Liberty Insurance Corporation, an Illinois corporation, having its principal place of business in Illinois, Liberty County Mutual Insurance Company, a Texas corporation, having its principal place of business in Texas, Liberty Mutual Fire Insurance Company, a Massachusetts corporation, having its principal place of business in Massachusetts, Liberty Mutual Insurance Company, a Massachusetts corporation, having its principal place of business in Massachusetts, LM General Insurance Company, an Illinois

³ Farmers also includes subsidiaries, affiliates and/or divisions Civic Property & Casualty Company, Exact Property & Casualty Company, Farmers Insurance Company of Idaho, Farmers Insurance of Columbus, Inc., Farmers New Century Insurance Company, Farmers New World Life Insurance Company, Farmers Reinsurance Company, Mid-Century Insurance Company of Texas, Texas Farmers Insurance Company, Farmers Specialty Insurance Company (formerly known as American Federation Insurance Company), Foremost Lloyds of Texas, Foremost Property & Casualty Insurance Company, Foremost Signature Insurance Company, Bristol West Insurance Companies, Bristol West Casualty Insurance Company, Bristol West Preferred Insurance Company, Security National Insurance Company, 21st Century Insurance Companies, 21st Century Advantage Insurance Company, 21st Century Assurance Company, 21st Century Auto Insurance Company of New Jersey, 21st Century Casualty Company, 21st Century Insurance Company of the Southwest, 21st Century National Insurance Company, 21st Century Pacific Insurance Company, 21st Century Pinnacle Insurance Company, 21st Century Preferred Insurance Company, 21st Century Premier Insurance Company, 21st Century Security Insurance Company, 21st Century Superior Insurance Company, American Pacific Insurance Company, Inc. and Farmers Insurance Hawaii, Inc.

corporation, having its principal place of business in Illinois, Peerless Insurance Company, a Massachusetts corporation, having its principal place of business in New Hampshire, Safeco Insurance Company of America, a Washington corporation, having its principal place of business in Washington and Safeco Insurance Company of Illinois, an Illinois corporation, having its principal place of business in Illinois (collectively referred to herein as “Liberty Mutual”), issue automotive insurance in various states and throughout the country. Liberty Mutual has company-wide, systematic and uniform claims management practices, and operates as a single, integrated enterprise for claims adjustment and administration purposes, including, without limitation, the conduct and subject matter at issue in this action.⁴

22. Defendant Nationwide Mutual Insurance Company is an Ohio corporation, having its principal place of business in Ohio. Nationwide Mutual Insurance Company, together with its affiliates, subsidiaries and/or divisions, defendants Allied Property & Casualty Insurance Company, an Iowa corporation, having its principal place of business in Iowa, AMCO Insurance Company, an Ohio corporation, having its principal place of business in Ohio, Depositors Insurance Company, an Ohio corporation, having its principal place of business in Ohio,

⁴ Liberty Mutual also includes subsidiaries, affiliates and/or divisions American Economy Insurance Company, American Fire and Casualty Company, America First Insurance Company, America First Lloyds Insurance Company, American States Insurance Company, American States Insurance Company of Texas, American States Lloyds Ins. Company, American States Preferred Insurance Company, Bridgefield Casualty Insurance Company, Bridgefield Employers Insurance Company, Colorado Casualty Insurance Company, Consolidated Insurance Company, Employers Insurance Company of Wausau, Excelsior Insurance Company, The First National Insurance Company of America, General Insurance Company of America, Golden Eagle Insurance Corporation, Hawkeye-Security Insurance Company, Indiana Insurance Company, Insurance Company of Illinois, Liberty Insurance Company, Liberty Insurance Underwriters, Inc., Liberty Lloyds of Texas Insurance Company, Liberty Mutual Mid-Atlantic Insurance Company, Liberty Northwest Insurance Corporation, Liberty Personal Insurance Company, LM Insurance Corporation, LM Property and Casualty Insurance Company, Mid-American Fire and Casualty Company, Midwestern Indemnity Company, Montgomery Mutual Insurance Company, National Insurance Association, The Netherlands Insurance Company, North Pacific Insurance Company, Ohio Casualty Insurance Company, Ohio Security Insurance Company, Oregon Automobile Insurance Company, Peerless Indemnity Insurance Company, Safeco Insurance Company of Indiana, Safeco Insurance Company of Oregon, Safeco Lloyds Insurance Company, Safeco National Insurance Company, West American Insurance Company, Wausau Business Insurance Company and Wausau Underwriters Insurance Company.

Nationwide Insurance Company of America, an Ohio corporation, having its principal place of business in Ohio, Colonial County Mutual Insurance Company, a Texas corporation, having its principal place of business in Texas, Nationwide Affinity Insurance Company of America, an Ohio corporation, having its principal place of business in Ohio, Nationwide Agribusiness Insurance Company, an Iowa corporation, having its principal place of business in Iowa, Nationwide Property & Casualty Insurance Company, an Ohio corporation, having its principal place of business in Ohio, and Nationwide Mutual Fire Insurance Company, an Ohio corporation, having its principal place of business in Ohio (collectively referred to herein as “Nationwide”), issues automotive insurance in various states and throughout the country. Nationwide has company-wide, systematic and uniform claims management practices, and operates as a single, integrated enterprise for claims adjustment and administration purposes, including, without limitation, the conduct and subject matter at issue in this action.⁵

23. Collectively, State Farm, Allstate, GEICO, Progressive, Farmers, Liberty Mutual and Nationwide are referred to herein as the “Defendant Insurers”.

C. Conspirators

24. Entities other than Defendant insurers, which are not named as defendants in this action, participated as conspirators with Defendant Insurers and/or as members of the respective RICO enterprises defined below, including, without limitation:

a. CCC Information Services Inc. (“CCC”) is a Delaware corporation, having its principal place of business in Illinois. CCC is also a successor in interest to CCC

⁵ Nationwide also includes subsidiaries, affiliates and/or divisions Crestbrook Insurance Company, National Casualty Company, Nationwide Assurance Company, Nationwide Lloyds, Scottsdale Indemnity Company, Scottsdale Insurance Company, Freedom Specialty Insurance Company, Scottsdale Surplus Lines Insurance, Western Heritage Insurance Company, Titan Indemnity Company, Titan Insurance Company, Victoria Fire & Casualty Company, Victoria Automobile Insurance Company, Victoria National Insurance Company, Victoria Select Insurance Company, Victoria Specialty Insurance Company and Farmland Mutual Insurance Company.

Information Services Group, Inc. CCC provides software programs, products and data to insurers and repair facilities concerning, among other things, automotive collision repairs.

b. Mitchell International, Inc. (“Mitchell”) is a Delaware corporation, having its principal place of business in California. Mitchell provides software programs, products and data to insurers and repair facilities concerning, among other things, automotive collision repairs.

c. AudaExplore North America, Inc., d/b/a AudaExplore (“AudaExplore”) is a Delaware corporation, having its principal place of business in California. AudaExplore is wholly owned by Solera Holdings, Inc., a Delaware corporation, having its principal place of business in Texas, and AudaExplore is a successor in interest to, and/or formerly known as, ADP Claims Solutions Group, Inc. AudaExplore provides software programs, products and data to insurers and repair facilities concerning, among other things, automotive collision repairs.

25. Collectively, CCC, Mitchell and AudaExplore are referred to herein as the “Information Providers”.

26. All of Defendant Insurers’ respective actions described in this Second Amended Complaint are part of, and in furtherance of, the unlawful conduct alleged herein, and were authorized, ordered, and/or done by Defendant Insurers’ various officers, agents, employees, or other representatives while actively engaged in the management of Defendant Insurers’ affairs (or that of their predecessors-in-interest) within the course and scope of their duties and employment, and/or with the actual, apparent and/or ostensible authority of Defendant Insurers.

27. Whenever reference is made to an act, statement or transaction of any corporations or entity in the Second Amended Complaint, including each of the Defendant Insurers and Conspirators, the allegation means the corporation or entity acted, stated or transacted by or through its directors, members, partners, officers, employees or agents while

they were engaged in the management, direction, control or conduct of the corporation's or entity's business and acting within the scope of their authority.

28. At all times referenced in this Second Amended Complaint, the respective Defendant Insurers and/or Conspirators were agents and representatives of, and aided and abetted the unlawful conduct of, each of the other Defendant Insurers and Conspirators in the combinations, conspiracies and enterprises described in this Second Amended Complaint. In doing the things alleged herein, each and every Defendant Insurer and Conspirator was acting within the course of such agency or representation and was acting with the consent, permission and authorization of the other respective Defendant Insurers and/or Conspirators. All actions of each Defendant Insurer and Conspirator as alleged herein were ratified and/or approved by other respective Defendant Insurers and/or Conspirators.

IV. FACTUAL BACKGROUND

A. Insurers and Insured Collision Repairs

1. Market Share

29. Defendant Insurers comprise seven of the eight largest private passenger auto insurers in the United States (based on premiums written) and collectively hold almost two-thirds of the national market share, as of 2015, as follows: State Farm – 18.72%; GEICO – 10.79%; Allstate – 9.99%; Progressive – 8.71%; USAA – 5.18%; Farmers – 5.1%; Liberty Mutual – 5%; Nationwide – 3.86%; American Family – 1.86; Travelers – 1.66%.

30. Market concentration in these insurers has steadily increased – and continues to do so. Likewise, control of the national market for auto insurance in the United States increasingly rests with the largest insurers, as the only material market share growth in the past decade was achieved by these carriers.

31. Automotive collision repairs of damaged vehicles covered by insurance account for approximately \$25-\$30 billion in repair costs annually, based on both first-party and third-party claims. Further, these repairs account for between approximately 75% and 90% of all automotive collision repairs in the United States each year.⁶

32. Upon information and belief, the collision repairs covered and paid for by or through Defendant Insurers track and/or align with their respective percentages of market share.

33. Given their collective market share, Defendant Insurers, as alleged in detail below, have been able to establish the industry standards for collision repairs, including the compensation for collision repair services.

2. Insurance Policies Indemnify Collision Repairs

34. Insured collision repairs consist of first-party and third-party claims. Each of Defendant Insurers' policies dictate that they indemnify insureds and vehicle owners for collision losses, including – for all Defendant Insurers – the obligation, if the vehicle can be repaired, to pay for repairs to restore the vehicle to its “pre-loss condition” or its “pre-damaged condition”. Defendant Insurers have all utilized language in its policies to qualify their loss payment obligations, for example, like paying only the “prevailing competitive price” or paying for repairs of “like, kind and quality”, but these qualifies do not alter the strict obligation to vehicle owners to have the vehicle restored to its “pre-loss condition”.

35. Defendant Insurers (and other insurers) have tortured the meaning of the policy provision, and instituted a false prevailing rate that is not accurate, and does not represent the

⁶ Collision repairs are the restorative and replacement procedures performed on vehicles that affect (or potentially affect) the structural, safety and cosmetic components of the vehicle, including all procedures that repair, restore, replace or refinish any such structural, safety or cosmetic components or features, and which bring the vehicle to the same or approximate condition prior to the damage in terms of function, use and appearance.

prevailing rate for repairs to properly restore vehicles to pre-loss condition. Rather, Defendant Insurers' fabricated prevailing rates are merely the rates imposed upon their respective direct repair program facilities (discussed below). These are not health insurance policies, which delineate in-network and out-of-network coverage and fee schedules. Auto policy insureds and vehicle owners pay premiums based on the insurers' obligation to pay for collision repairs to restore the vehicle to pre-loss condition. First, the prevailing rate, as discussed below, has been created through direct repair program agreements and Defendant Insurers' controlled repair data that is then promulgated as the industry prevailing rate but, in truth, represents a fraction of the repair rates. It is not based on accepted professional industry standards; nor is it based on any statistically valid data. Though Defendant Insurers would like to impose their direct repair program rates on all collision facilities, that is not what the insurance policies provide and that is not what collision repair facilities that are not on Defendant Insurers' respective programs charge for their rates; nor have they agreed to those rates. By analogy, this would be imposing in-network provider rates on out-of-network providers. Indeed, by way of example, the California Department of Insurance recently brought an action against Allstate Indemnity Company, predicated on Allstate's refusal to pay labor rates charged by repair facilities where claimants chose to repair their vehicles, by "arbitrarily capping and denying labor rates without support", "failing to prepare estimates for an amount that will allow for repairs to be made in accordance with accepted trade standards for good and workmanlike automotive repairs, failing to pay the difference between the written estimate and the higher estimate or to reasonably adjust written estimates prepared by the shop of the claimant's choice, and failing to provide support in the form of auto body repair labor rate survey or by any other data or evidence that capping and denying labor rate charged by the claimant's chosen auto body repair shop was reasonable...",

“misrepresenting to claimants pertinent facts or insurance policy provisions relating to any coverages at issue...”, and “not attempting in good faith to effectuate prompt, fair and equitable settlements of claims....” Each of the Defendant Insurers have engaged in this conduct across the country.

36. Along the same lines, the Commissioner of Securities and Insurance of Montana issued an Advisory Memorandum dated January 5, 2016 to *all* property and casualty insurers not to “unilaterally disregard[] repair operations identified in auto repair estimating systems”, which is prohibited by Montana law. Further, those auto repair estimating systems “do not dictate market price”. Further, market price is based on agreement between insurer and the repair, or the prevailing competitive rate that is “reasonable and necessary in the local area where the repairs are to be performed”, which is not satisfied by “obtaining an estimate for the lowest cost from another [repairer] in the same market area.” Instead, “market price must be determined by the manufacturer’s list on parts, prevailing surveyed labor rates, material usage, and markup on sublet.” In short, as noted by the Montana Commissioner, Defendant Insurers cannot satisfy their loss indemnity obligations by using artificial measures, or ignoring accepted professional standards.

37. Second, as discussed below, the so-called prevailing rate established through Defendant Insurers’ direct repair programs are not sufficient to restore the vehicles to pre-loss condition, evidenced by the frequency that vehicles repaired by Defendant Insurers’ direct repair facilities must be re-repaired, bought back or declared a total loss, thereby exponentially increasing the true cost of the repairs. doubling, tripling are bought back

3. Direct Repair Programs

38. Defendant Insurers all have what are known as direct repair programs (“DRPs”).⁷ DRPs are comprised of collision repair facilities around the country that agree to abide by certain uniform standards and procedures in the repairs covered by Defendant Insurers. Ostensibly, the DRP networks ensure that Defendant Insurers can maintain control and quality in the repair process, but in fact the DRP relationships enable Defendant Insurers to control the cost of insured repairs, and establish what is known as the “prevailing competitive price” or “prevailing rate” of the repairs (hereinafter, the “prevailing rate”). The prevailing rate, which, as discussed herein, is a false and artificial rate, has enabled Defendant Insurers to artificially suppress compensation to repair facilities for insured collision repairs.

39. Each DRP facility for each of the Defendant Insurers executes a uniform written agreement with one or more of the Defendant Insurers (“DRP agreement”), agreeing to abide by the terms dictated by each respective insurer for its direct repair facilities. Frequently, repair facilities serve as a DRP facility for multiple insurers, executing agreements with each respective insurer to establish the parameters and standards for repairs covered and paid for by or through each insurer.

40. Insurers control virtually all aspects of the repairs performed by their DRP facilities, including the cost and the methods by which repair estimates are created which, in turn, dictates the time, scope and extent of the repairs using one of the three Information Provider estimating systems. Defendant Insurers generally mandate that their DRP facilities use the same estimating system to create repair estimates, so that Defendant Insurers can easily impose their

⁷ Defendant Insurers’ DRP programs are as follows: State Farm-Select Service; Allstate-Good Hands Repair Network (GHRN); GEICO – Auto Repair Express/ARX Program; Progressive –Concierge Service; Farmers – Circle of Dependability (COD); Liberty Mutual (including Safeco)-Guaranteed Repair Network; and Nationwide-On Your Side/Blue Ribbon Shops.

cost controls. The DRP facilities agree to abide by the Defendant Insurers' customized "estimating profile" that each has with CCC, Mitchell or AudaExplore, as well as the uniform estimating protocol (i.e., guidelines) that each of the respective Defendant Insurers maintains. Together, the estimating profile and company protocol outline the limits for the time, scope and cost of compensable repairs.

41. The DRP agreements also dictate, among other things, compensation for repairs, including hourly labor rates, reimbursement for what is known as "paint and materials" (described below), parts prices and required discounts on parts provided to insurers – as well as the types of parts: original equipment, aftermarket, recycled, used or salvage/crash parts, charges for certain repair procedures, and the permitted mark-up (i.e., price above cost) on various items such as storage, towing and the like.

42. The DRP repair facilities enter into these agreements with Defendant Insurers and abide by the terms and conditions because, in return, Defendant Insurers refer (i.e., "steer") a consistent volume of repair work to these facilities. Accordingly, DRP facilities trade rate for volume of repair referrals. Defendant Insurers consistently steer work to their DRP facilities. Although insurers are not legally permitted to require that vehicles covered by insurance be repaired at their DRP facilities, Defendant Insurers all advise vehicle owners that, if the repairs are performed at a DRP facility, there will be no out-of-pocket costs, the repairs will be guaranteed – even though the insurers fail to advise the vehicle owners that the guarantee generally is underwritten by the facility rather than the insurer, and there will be no delay in the repairs and that the facility meets the guidelines of the insurer.⁸

⁸ Notably, Defendant Insurers do not advise vehicles owners that, in many instances, if original equipment manufacturer parts and/or specifications are not used in repairs, and/or if painting procedures are not performed in accordance with manufacturer guidelines and specifications, product warranties will be rendered void.

43. In contrast, if a vehicle owner indicates a preference to have the repairs performed at a non-DRP facility, Defendant Insurers typically send letters outlining the foregoing in an attempt to convince the vehicle owner to reconsider. Often, Defendant Insurers will impose unreasonable and arbitrary delays and interfere with the repair process when performed at a non-DRP facility.

44. Recent figures appear to indicate that Defendant Insurers utilization of DRP facilities ranges between 25%-35% on the low end, and between 40% and 45% on the high end. Defendant Insurers steer repairs to their DRP facilities so that they control the repair process and, more importantly, the cost. Further, as discussed below, the DRP rates are utilized by Defendant Insurers to establish the artificial prevailing rate, which is then imposed upon the entire collision repair industry, even though the rates conservatively represent – at most – one-third of insured repair rates nationwide.

45. Defendant Insurers' primary concern in establishing and utilizing DRP programs is to control costs, irrespective of the quality of the repairs, and that impacts not only functionality and appearance, but also safety. Further, Defendant Insurers focus on, and enforce strict cycle times for repairs, because that leads to purported customer satisfaction which, in turn, leads to policyholder sales and retention or more aptly put, revenue for Defendant Insurers. Customer satisfaction based on cycle time alone, however, is misleading when the vehicle owners are unaware of the flawed and insufficient repairs that are performed.

46. The growing trend in DRP facilities involve MSOs, which are multi-shop or multi-store operators. The largest MSOs encompass hundreds of facilities around the country or in concentrated regions, and include ABRA, Boyd/Gerber, Caliber, Service King and Hendrick

Automotive. These facilities are owned by single companies and impose uniform protocol upon all facilities.⁹ These MSO's have agreements with each of the Defendant Insurers, which are driven by key performance indicators (KPIs). These KPI include strict cycle times for repairs, customer satisfaction scores (which are accomplished and influenced through aggressive marketing tactics), and numerous metrics designed to lower the severity of repair costs for Defendant Insurers, including, mandated repairs rather than replacement of parts, utilization of aftermarket, salvage or recycled parts rather than OEM direct parts, and repair procedures and costs. Defendant Insurers are particularly focused on controlling and reducing cycle times because it minimizes Defendant Insurers' costs for rental cars for vehicle owners during repairs. Indeed, for example, in The Boyd Group Income Fund Q3 2015 Investor Presentation, Boyd/Gerber touts its purported status as "Best-in-Class Service Provider" listing "Average cost of repair", "Cycle time" and "Customer service" as its top characteristics – all above "Quality".

47. In the event that the facilities do not satisfy benchmark KPIs, upon information and belief, there are clauses in the respective contracts requiring the MSOs to make penalty payments to the Defendant Insurers. By the same token, upon information and belief, in the event that MSOs satisfy certain loss savings benchmarks for the Defendant Insurer, compensation payments are made by the Defendant Insurers to the MSOs.

48. In addition, each of the MSO contracts with the Defendants Insurers not only require the MSO facilities to indemnify Defendant Insurers, but also require the MSO facilities to buyback any cars that they have failed to repair properly and which cannot be remedied through re-repair. Upon information and belief, each of the MSOs for each of the Defendant Insurers have consistently been required to purchase numerous cars from vehicle owners as a

⁹ There are others, such as Carstar and Fix Auto, which are franchised, and operated by individual owners.

result of their failed repairs on an annual basis. These buyback provisions in DRP contracts are not limited MSO facilities, and Defendant Insurers have buyback provisions (or indemnification provisions of similar effect) in their respective DRP contracts with all of their DRP facilities. Likewise, strict cycle times and repair cost controls are imposed by the Defendants Insurers upon all of their DRP facilities nationwide.

49. Defendant Insurers do not advise vehicle owners that it is the DRP facility that is “guaranteeing” the repairs, rather than Defendants Insurers, when they steer vehicle owners to the DRP facilities. When there is a problem or concern with repairs at a DRP facility under each of the Defendant Insurers’ DRP programs, the facility will attempt to re-repair or correct the vehicle – often making multiple attempts, to no avail – and, as is frequently the case, the vehicle is either bought back by the facility or the Defendants Insurers (which then secure payment from the DRP facility under their contract provisions) or, based on the amount and severity of required repair – or re-repair – declared a total loss by the Defendant Insurers.

50. Buybacks have a profound effect on the profitability of MSOs and the other DRP facilities that are part of the Defendant Insurers’ respective DRP programs. Defendant Insurers do not disclose the figures relating buybacks and vehicles that must be declared a total loss as a result of flawed and insufficient DRP repairs – or even figures on re-repairs by DRP facilities, but, upon information and belief, the costs are material. DRP failed repairs occur nationwide, with frequency, as result of the focus on cost savings and cycle times, rather than on quality, including importantly, skill and experience, as well as manufacturer certification and adherence to manufacturer specifications.

51. More troubling, however, is the impact that flawed repairs have on the functionality and safety of the vehicles involved, placing the vehicle owner and the public on the

roadways, at considerable risk. First, there are vehicle owners that are unaware of flawed repairs that jeopardize the structural integrity of the vehicle. Second, often vehicles that are bought back or totaled are sold at salvage auction, which puts these vehicles back into the stream of commerce. Even more troubling is the contingency that these vehicles are sold with clear or clean title, meaning that the title does not accurately reflect that damaged condition of the vehicle.

52. For example, earlier this year, a brand new Honda Accord EX was involved in an accident, State Farm claim no. 20-5S83-843. State Farm had a DRP facility in Maryland perform the repairs. The vehicle was subsequently brought by the vehicle owners to Mark's Body Shop in Baltimore Maryland, which conducted a post-repair inspection and found significant structural damage threatening the integrity of the vehicle, including, among many other things, a tear and buckle in the right frame rail and kinks and buckles in the both upper and lower frame rails and aprons. Given the estimate to correct all of the damage and properly repair the vehicle (in excess of \$16,000), State Farm advised that the vehicle would be declared a total loss, and its representative asked Mark's Body Shop by email dated April 15, 2015 "that the car be reassembled to the condition that it was when brought to your shop – fully functioning & drivable." Mark's Body Shop advised that it could not do that given the condition of the vehicle. State Farm then paid Mark's Body Shop fees for teardown of the vehicle, storage and administrative fees.

53. With respect to the vehicle owners, State Farm ultimately offered them approximately \$29,000 for the vehicle (after an initial offer of approximately \$27,000). Given the safety concerns surrounding the vehicle and the possibility of the vehicle being placed back on the roads, the vehicle owners requested a bid from State Farm as to what it would cost to

retain the vehicle and “purchase” the total loss vehicle from State Farm. In addition, Honda was contacted. State Farm’s initial bid back to the vehicle owners was \$14,500. As evidenced by the BidFast Quote, a copy of which is attached hereto as Exhibit “A”, the quote indicates that the “vehicle has been fully repaired” and that it is a “clear title” quote only, which is inaccurate.¹⁰ Brian Fano of State Farm confirmed to Mark’s Body Shop that the bid was high because State Farm had procured a clean title quote. Thus, either State Farm intended to sell this car with clean title after taking possession, or it was misrepresenting the price of the vehicle to the owners. After further negotiation involving Mark’s Body Shop, State Farm revised its bid to retain the vehicle to \$9,538, this time based on an appropriate salvage title bid. The vehicle was purchased back from State Farm, and, given its concerns about the vehicle and the quality of the repairs performed by State Farm DRP facility, Honda then purchased the vehicle for further analysis.

54. This is not an isolated incident, as flawed DRP repairs consistently result in buybacks and vehicles that are declared total; losses by Defendants Insurers. By way of example, in 2013, GEICO claim no. 048636460101015-01 involved a 2007 LEXUS that had been repaired at a Maryland DRP facility for an accident in 2012 (incurring approximately \$10,000 in damages), and which had been brought to Mark’s Body Shop in 2013 as the result of new accident. An examination of the vehicle revealed over \$14,000 in costs to repair, based on what substantially involved correcting the GEICIO DRP facility’s prior flawed repairs – consisting of hidden damage that the vehicle owner was unaware of but which jeopardized the safety of the vehicle. Rather than repair, GEICO totaled the vehicle, paid Mark’s Body Shop approximately \$2,300, and paid the vehicle owner \$20,000 for the vehicle. Upon information

¹⁰ The repair estimate is also well below the amount of the original repairs and the amount that Mark’s Body Shop estimated to repair the vehicle – and well below the amount that would trigger a total loss of the vehicle. .

and belief, GEICO's DRP facility bought the vehicle from GEICO and, presumably after repairing the vehicle, is intending on selling the vehicle.

55. In 2012, Progressive claim no. 12-4118008-01 involved a 2006 Mazda that was repaired at Progressive DRP facility in Neptune, New Jersey, incurring approximately \$9,000 in damage repair. The vehicle was returned by the DRP facility to the owner, who was concerned about the vehicle after the repairs, and contacted an auto damage expert. The vehicle was towed Mark's Body Shop, and an examination of the vehicle and the prior repairs revealed that the Progressive DRP facility had installed a salvage yard rear floor, quarter panel, rear body section, and salvage frame rail sections. Progressive was forced to declare the vehicle a total loss, paying the owner \$14,467.67.

56. In 2015, GEICO Claim no. 0507643420101011-02 involved a 2010 Toyota Highlander, that originally incurred repair costs of \$7,600 at a GEICO DRP facility in Pennsylvania. The vehicle was subsequently brought to Crawford's for inspection. Based on the repairs necessary to correct the condition and the vehicle after the flawed repairs by GEICO's DRP facility, the GEICO DRP facility bought the car back from the vehicle GECIO, and paid the owner in excess of \$26,500 for the vehicle. The DRP facility also paid Crawford's in excess of \$5,000 for post-repair inspection work that it had performed. Notably, GEICO admitted to Crawford's the fact that the repairs by its GEICO Auto Repair Express shop were "not completely within industry standards." A copy of GEICO's letter is attached hereto as Exhibit "B".

57. In 2013, vehicle owner Larry Bennett submitted a claim to Allstate concerning damage to his 2006 Honda Accord. Allstate directed Mr. Bennett to its DRP facility in Hickory, North Carolina. After the work was completed by Allstate's DRP facility (Gerber), safety issues

were uncovered during an inspection at K&M. Given the condition of the vehicle, the insurer for Allstate's DRP facility, which was Zurich – defendant insurer Farmer's parent company, declared the vehicle a total loss and paid Mr. Bennett \$10,576 (after deduction of salvage value for Mr. Bennett to retain the vehicle. Significantly, by email dated August 2, 2013, Gerber admitted to the mistakes made, and offered to remedy the issues found in the repairs, including transporting the vehicle to another facility in North Carolina to do the work. A copy is attached hereto as Exhibit "C.

58. Attached hereto as Exhibit "D" is an affidavit that Mr. Bennett executed contemporaneously in 2013, which outlines the conduct of his insurer Allstate, and which is generally indicative of Allstate's claims adjustment conduct and treatment of collision repairs.

59. As stated in his 2013 affidavit, Mr. Bennett advised Allstate that he wanted his vehicle repaired by a Honda dealer, but the Allstate representative advised that Mr. Bennett "would have to pay out of pocket expenses" because the Honda dealer was "not a part of Allstate's network." *Id.* at 1. At the time, no estimate or examination of damage had been completed. Allstate advised Mr. Bennett that the DRP facility that worked on his vehicle [a large MSO] was Allstate's only DRP facility in the area and "the only shop qualified to work on [his] vehicle," – and that Allstate would "guarantee" the repairs. Mr. Bennett felt that he had no choice but to have the vehicle repaired at Allstate's DRP facility. The cost of the repairs at Allstate's DRP facility was \$5,828.97. *Id.* at 2. Mr. Bennett had concerns with the vehicle after the repairs, and took the vehicle to K&M for a post-repair inspection. Significant problems were observed, including those that impacted the safety of the vehicle, requiring corrective measures on repairs "never performed or performed improperly" by Allstate's DRP facility in excess of \$10,000. *Id.* at 2-3. Allstate employee David Stout and others inspected the vehicle and admitted

that there were problems with the condition of the vehicle, including “safety” problems, that its DRP facility had performed “unsatisfactory work”. *Id* at 3. Allstate further advised that it would not correct any cosmetic defects, only safety defects, and those would only be corrected by Allstate’s DRP facility that had performed the faulty work. *Id*.

60. Mr. Bennett advised that he did not want the work performed at Allstate’s DRP facility. Stout refused to permit K&M to perform the repairs, refused to declare the vehicle a total loss, and offered \$4,000 to resolve the claim. *Id*. Stout further advised Mr. Bennett that pursuing the matter “would trigger dozens of things”, that his policy rate would increase and his policy could be canceled, and that it would be difficult to obtain insurance in the future. *Id* at 3-4). In addition, Mr. Bennett owed K&M approximately \$2,500 in fees for the post-repair inspection work. Stout advised Mr. Bennett to pay K&M by credit card to regain possession of the vehicle, and then dispute the charges with his credit card company. *Id* at 4. When Mr. Bennett advised Stout that he was being treated unfairly, Stout told him that “Allstate has never lost a lawsuit”, that “Allstate has plenty of money” and that “Allstate would welcome a lawsuit due to the good publicity.” *Id*.

61. In 2014, on Allstate claim no. 0330968181 involving a brand new 2014 Volkswagen Jetta, Allstate directed the vehicle owner to its DRP facility in Hickory North Carolina (again Gerber) for repairs in excess of \$8,000. The vehicle owner brought the vehicle to K&M for a post-repair inspection given concerns over the condition of the vehicle. The post-repair inspection revealed a host of serious and significant repair failures, omissions and improprieties, including, among things, the failure to adhere to manufacturer specifications, use of improper equipment that was not certified by the manufacturer, improper structural welding, all of which jeopardized the integrity and safety of the vehicle. Attached hereto as Exhibit “E” is

a copy of the report outlining the flawed repairs by Allstate's DRP facility K&M is the only VW certified collision repair facility in the market, and – presently – the only facility with the specialized equipment to perform the repairs according to VW specifications. Notwithstanding the list of flawed repairs, Allstate, by letter to the vehicle owners dated August 15, 2014, maintained that its DRP facility's repair "were properly completed and meet industry standards", but determined that the vehicle had incurred \$2,500 in diminished value, purportedly as a result of the damage to the vehicle. As K&M pointed out to Allstate, given that industry standards must clearly encompass manufacturer specifications and guidelines, it was not reasonable to deem the repairs in conformance with so-called industry standards. Subsequently, on September 30, 2014, Allstate revised its determination and paid the vehicle owners \$4,000 in diminished value. At or about the same time, Zurich (again, the parent of defendant Farmers) and insurer for Allstate's DRP facility, determined that the repairs performed by Allstate's DRP facility did, in fact, require correction in the amount of \$13,172. As a result, Zurich, on behalf of Allstate's DRP facility, paid the owners that amount to resolve the claim.

62. That same Gerber facility, which also serves as a DRP facility for GEICO on its claims, continues to perform the same type of repairs in contravention of Volkswagen manufacturer repair guidelines and equipment specifications, resulting in unsafe and deficient repairs rendering vehicles subject to total loss.

63. Along the same lines, a verdict was recently rendered in Catawba County, North Carolina, Superior Court Division (*Ridley v. Wendel, Hendrick Luxury Collision Center, LLC et al.*, Case No. 14-CVS-1724), predicated upon the flawed repairs by a Nationwide DRP facility impacting the structural integrity and safety of the vehicle – in particular, the failed repair of the frame of the vehicle that should have been replaced, causing that frame to fail, and rendering the

vehicle a total loss – resulting in an award of \$110,000 – after remittitur – which was thereafter trebled under the North Carolina Unfair and Deceptive Trade Practices Statute.

64. In addition as recently reported by Repairer Driven News on Nov. 10, 2015 (www.repairerdrivenews.com/2015/11/10/atlanta-wsb-tv-coverage-shows-poor-abra-repairs-questions-geicos-recommendation), WSB-TV in Atlanta uncovered unsafe repairs at two area ABRA facilities in the GEICO DRP program, which GEICO had recommended to the vehicle owners for their respective repairs. On the first vehicle, according to the facility that re-inspected the vehicle, “ABRA allegedly spliced replacement parts into still damaged portions of a Kia Sorrento’s frame, used a weight to make a dented front wheel (since moved to the rear) appear to yield a balanced vehicle, and a left wiring harness damaged or with splices that failed.” On the second vehicle, the “ABRA facility allegedly failed to do more than a dozen welds on a 2010 Honda Fit”, and “other welds [could] be popped with a pry bar.” GEICO totaled both vehicles. According to the television report, they interviewed a former ABRA technician who said “the chain favors insurers by letting speed trump quality.”

65. These are merely representative examples of what occurs frequently across the country as the result of Defendants Insurers’ strict mandates imposed upon DRP facilities concerning the manner in which repairs are performed, including, without limitation, cycle times, limits on labor operations and the time to perform those operations, directives to repair rather than replace parts, directives on the types of replacement parts that are utilized, as well as the labor rates that all of the Defendant Insurers enforce, which do not account for quality, training, certification, and/or manufacturer specifications requiring specialized equipment and knowledge of processes by collision repair facilities. Defendant Insurers are focused on cost savings. As a result, Defendants Insurers’ DRP facilities frequently must attempt to correct flawed and failed

repairs, and vehicles must be bought back from the vehicle owners and/or declared a total loss, notwithstanding the fact that the Defendant Insurers' pretext for establishing DRP programs is to ensure standardized, efficient quality repairs. The costs of re-repair, buyback and total losses, which are the result of Defendant Insurers' protocol, are substantial. Accordingly, even if one were to assume, *arguendo*, that there is any validity to the so-called prevailing rate – which is predicated on Defendant Insurers' DRP repair data and controlled data that Defendant Insurers upload to the Information Providers on claims – it does not account for these substantial failure costs.

66. Defendant Insurers' policies all require that vehicles must be restored to pre-loss or pre-damaged condition. Further, Defendant Insurers all represent that the so-called prevailing rates define the parameters of their obligation to indemnify vehicle owners under those loss provisions of their respective policies; in other words, it defines the costs of collision repair. It is simply a misrepresentation for Defendant Insurers to attempt to promulgate a prevailing rate – which they use to artificially limit the indemnification obligations under their insurance policies (and those of third party insureds) – without accounting for the significant costs resulting from failed repairs.

B. Repair Appraisals and the Information Provider Products

1. Estimating Products

67. Before a damaged vehicle is repaired, a repair appraisal – or estimate – is prepared. The estimate appraises the damage to the vehicle, serves as the blueprint for the repairs that are to be performed, and establishes the scope and cost of the repairs based on required labor operations, time and price. Repair estimates are prepared using estimating software products sold by one of the Information Providers, CCC, Mitchell and AudaExplore. Defendant Insurers (and virtually every insurer), as well as the vast majority of repair facilities, subscribe to one or more of the estimating software products sold by the Information Providers, which collectively make up the damage repair estimating market in the U.S. The Information Providers sell their estimating products to insurers, including Defendant Insurers, as well as collision repair facilities, and hold 99% of the market. *FTC v. CCC Holdings, Inc.*, 605 F.Supp.2d 26, 2009 U.S. Dist. LEXIS, **8, **48 (D.C. Dist. Ct. 2009) (insurers and repairs facilities are “intertwined submarkets”).

68. Estimating products consist of three main components: (1) a spreadsheet that tracks the line items that are a part of a vehicle repair estimate; (2) the database from which parts and labor costs are pulled; and (3) the software that calculates the total cost of the repair, taking into account labor and repair procedures. In addition, as described below, the estimating programs each come with reference manuals, which explain and detail the repair procedures and the methods for preparing comprehensive estimates.

2. Insurers Drive the Estimating Market

a. Revenue

69. In addition to estimating, the Information Providers sell a number of other automotive damage and related products, including workflow management products, business intelligence products, and repair facility or shop management software. The Information Providers are each multi-billion dollar companies, selling products and services across lines of insurance and to related customers. Upon information and belief, each earns hundreds of millions in annual revenue from selling auto estimating programs and data.

70. Insurance companies often purchase a bundle of products from one of the Information Providers, which include a core estimating program together with other management and operational products. With the exception of State Farm (which uses various products from all three Information Providers), upon information and belief, the Defendant Insurers generally have exclusive contractual relationships with, and purchase estimating products from, one of the three Information Providers.

71. Though the Information Providers sell their products to insurers and repair facilities, insurers, including Defendant Insurers, are their true partners. Further, the Information Providers have deep retention rates with their insurer partners (CCC alone at 95%) and there is virtually no movement in this mature market, with market shares remaining consistent. *Id.* at **74, 104-05, 108-09.

72. In addition, the Defendant Insurers' DRP network facilities license the same estimating product (and several add-on products) from the same Information Provider with which the Defendant Insurers have a relationship. *Id.* at ** 74-75. Upon information and belief,

Allstate, GEICO, Farmers and Nationwide all use CCC to prepare estimates, Progressive uses Mitchell and Liberty Mutual uses Audatex.

73. With respect to State Farm, upon information and belief, it purchases certain products from all three Information Providers, but primarily uses AudaExplore to prepare estimates in 4 regions around the country and Mitchell in 8 other regions, although State Farm has recently begun using CCC estimating products as well.

74. Defendant Insurers each pay millions of dollars per year for Information Provider products. Upon information and belief, each of the Defendant Insurers purchase millions of dollars in products annually. Information Provider revenue for estimating products also derive from repair facilities. Reportedly, 60% of estimating revenue comes from repair facilities and insurers account for 40% of the revenue. However, given that Defendant Insurers mandate that their DRP facilities use the same Information Provider estimating programs, Defendant Insurers create a secondary revenue stream for Information Providers through the insurers' respective DRP facilities, and thus account for and control a significant portion of that additional 60% in repair facility revenue for the Information Providers. And, generally, if a repair facility is a DRP facility for multiple insurers – which frequently is the case – that facility will license estimating programs from multiple Information Providers. Given the number of DRP facilities, the Defendants Insurers account for almost 75% of the Information Providers' revenue. *Id* at ** 74-75, 95-96, 106, *passim*.

75. Further, Defendant Insurers sign longer-term contracts – generally two to five years in length, locking in that annual revenue for the Information Providers. The repair facilities execute license agreements with the Information Providers, which likewise have multi-year terms, but the repair facilities generally pay only a total of several thousand dollars annually

for the estimating programs (and any add-ons). Accordingly, despite the fact that there are tens of thousands of repair facilities in the United States and only a small number of major insurers, Defendant Insurers wield substantial leverage and economic influence with the Information Providers. *Id* at ** 74-75, 95-96, 106, *passim*.

b. Defendant Insurers' Influence on Estimating Programs

76. Defendant Insurers regularly meet and consult with the Information Providers. For example, upon information and belief, all three Information Providers have facilities near State Farm's headquarters, as well as employee representatives on State Farm's and other insurer's sites, and discussions about the estimating programs consistently take place. Further, the Information Providers regularly visit Tech-Cor, Allstate's repair testing and training facility, as well as Allstate's headquarters. As described below, the Information Providers all sponsor conferences and annual events, attended by Defendant Insurers, at which the parties discuss the Information Provider programs, estimating processes, and methods for improving "accuracy" and "cost containment".

77. Further, upon information and belief, Defendant Insurers regularly request that Information Providers find ways to reduce severity on insured claim repairs, i.e., reduce costs, by, among other things: (i) reducing time for labor operations (by re-doing time studies until the desired time is achieved or simply shaving time arbitrarily from required operations); (ii) collapsing and combing ("bundling") labor operations – and finding more redundancy (known as "overlap") in order to remove times for necessary labor operations; (iii) omitting or truncating necessary labor operations; and/or (iv) requiring that labor operations be entered manually by repair facilities preparing estimates, enabling Defendant Insurers to challenge and suppress compensation for these operations or the time ascribed to them, as described at length below.

78. The Information Providers' estimating systems have become entrenched as the only accepted method of preparing repair estimates. As a result, all members participating in the collision repair industry must utilize one of the three estimating systems. Notwithstanding their purported efforts to do so, the Information Providers simply cannot serve two masters. Indeed, the Information Providers, which fiercely compete for the business of Defendant Insurers, represent their products to insurers as a means by which to control and reduce costs, which is clearly countervailing to the concept of selling the software tool to the repair facilities to prepare the most accurate and comprehensive repair estimates – and be compensated accordingly. In truth, the Information Providers' interests clearly lie with their larger customer: Defendant Insurers.

79. Indeed, as Greg Horn, executive at Mitchell, recently disclosed in one of his Mitchell Trends Sessions, though Mitchell has always had one estimating database, CCC and AudaExplore used to publish two separate version – one for insurers and one for collision repair facilities, though he was unsure whether that still occurs.

80. Further, each of the Defendant Insurers regularly communicate with their Information Provider partners to address and collaborate – and instruct – on labor times, formulas, the way that the estimating databases provide for repair operations, and pricing data. This practice of collaboration has occurred for years between the Defendant Insurers and the Information Providers. As noted by the court in the FTC case blocking the proposed merger between CCC and Mitchell, Insurer “customization” and influence is substantial.

81. One striking example concerns State Farm and Mitchell, which began collaborating on Mitchell's estimating system as early as 1997. That license agreement provided, in pertinent part:

Mitchell agrees to use reasonable efforts to correct any material errors in data as identified by State Farm and verified through applicable manufacturer (part prices) or verified through previously reported “labor rates” and/or “labor times” (as such terms are generally used in the Collision Repair Industry) and provide a replacement disc to State Farm within sixty (60) days of Mitchell’s verification of the reported erroneous data. In the event that Mitchell does not provide a replacement disc to State Farm which correct the erroneous data within the required time period, Mitchell agrees to pay state Farm within thirty (30) days of Mitchell’s receipt of a notice of payment due from State Farm, the following amounts:

Over 60 but under 90 days to data fix error	\$10,000
90 and over but under 120 days to data fix error	\$30,000
120 and over to data fix error	\$50,000

Attached hereto as Exhibit “F” is a collection of documents demonstrating the collaboration between State Farm and Mitchell on the estimating program. The agreement provision quoted can be found at the page with the Bates Number ending in 1417.

82. State Farm had the *same* provision and agreement in effect with AudaExplore and CCC. As evidenced by an email exchange with Mitchell in September 2000 (demonstrating the continuity of the provision), by email dated September 25, 2000, State Farm advised Mitchell that if it had not corrected the data at issue, the penalty provision would have been triggered, as State Farm was “applying this clause strictly with all three estimatics vendors.” *See* Exhibit F at page ending in 0147.

83. Mitchell and State Farm continued their collaboration of the sequence of version of Mitchell’s estimating program, which could not be released without the approval of State Farm. *See* Exhibit F, *passim*. Further, it appears that Mitchell was serving as the data host for all of State Farm’s collision repair data, as the diagram from their 2/24/1999 quarterly meeting shows all three estimating databases feeding through the “Mitchell Server” for State Farm corporate. *See* Exhibit “F”, at page ending in 0334. The depth and breadth is evidenced by just

a sample of these documents that comprise Exhibit F. For example, State Farm and Mitchell shared “balancing errors”, including “total labor hours” (*see* Exhibit F, at page ending in 0332; *passim*); collaboration with State Farm’s CRASH Unit, which is their division that studies repair time and procedures (*id*); how to implement the “cost plus” formulas for pricing (*see* Exhibit F, at pages ending in 0254-0260); Mitchell going onsite to State Farm for training (*see* Exhibit F, at page ending in 0317); State Farm’s request to Mitchell to fix the database so that it can inform State Farm of the “per refinish hour rate when using the P&M [paint and materials] Calculator”, and whether Mitchell can “break this down per market” in what appears to be State Farm’s request to have an automated determination of which figure would be lower for their estimating purposes (*id*), which later was confirmed: “Paint material amount can be calculated using a pre-defined paint table, or using either a Percent Mutliplier or Hourly Rate. You can also set a cap on the amount allowed for paint materials regardless of the calculation method used.” (*see* Exhibit F, at page ending in 0357); regular data testing through “Vendor Database Error Analysis Reports”, showing, for example, in August 2000, showing errors found in the database for parts pricing (11 caused by Mitchell); Labor time change (decreasing time entry); failing to implement overlap on labor time (resulting in overpayments); and operational deductions other than for time overlap (deducting time or parts from database procedures) (*see* Exhibit F, at pages ending in 0140-0143); and the formulas and methodology for calculating refinishing, paint material rates, shop materials (meaning those materials other than used in refinishing); hazardous waste, towing, storage, and other engine and system materials like oil, coolant and freon (*see* Exhibit F, at pages ending in 0345-0359).

84. Upon information and belief, State Farm has similar penalty provisions regarding the data – or the ability to have changes made in labor times, operations and data – in

effect to this day with all three estimatics vendors. By way of example, when repair facilities on State Farm's DRP program are using a State Farm estimating database program – as they must – changes instructed by State Farm appear, advising that time entries or labor operations are being corrected by the Information provider. Upon information and belief, all of the Defendant Insurers provide notification to their DRP facilities through memoranda or similar system prompts, which advise of changes being made pursuant to request.

C. **Insurers Establish an Artificial Prevailing Rate to Control and Suppress Repair Costs**

85. In order to control and suppress costs, Defendant Insurers have, in tandem with the Information Providers, created the prevailing rate – an artificial measure of the market value for repairs. This so-called prevailing rate controls all categories of compensation for repair rates: (i) hourly labor rates; (ii) reimbursement for “paint and materials”; (iii) parts pricing; and (iv) the time, scope and extent of compensable repair procedures – and designated labor times contained in the Information Provider estimating systems. Defendant Insurers have perpetuated this industry prevailing rate with great success. There is no statistical validity to the purported prevailing rates. Further, the rates are comprised of flawed and rigged data, predicated on the agreements that Defendant Insurers have executed with their respective DRP network facilities. These prevailing rates are then forced upon non-DRP facilities (like Plaintiffs and the classes here), which never entered contracts to accept these rates from Defendant Insurers.

86. Though it varies by Defendant Insurer, as discussed above, between approximately 50% and 75% of the insured repairs covered by insurance are performed by facilities that are *not* part of a particular insurer's DRP. Accordingly, Defendant Insurers should be required to pay competitive industry rates for professional repairs performed by facilities that

are not operating under that insurer's DRP program. There is no uniform, industry rate for repairs; nor should there be. Collision repairs are a service performed by highly skilled professionals, who each have and demonstrate particular levels of expertise, certification, training, equipment, capacity and quality of workmanship, and compensation should be set based on skill and competition – and most importantly, the necessary and proper repairs in accordance with manufacturer specifications. Defendant Insurers refuse to recognize these gradations and refuse to appropriately compensate these repair professionals and facilities. Instead, insurers want to commoditize repairs and make them fungible – and pay the lowest amount for repairs possible. To achieve this end, Defendant Insurers have usurped control of repairs – and the price, and created an artificial market value, i.e., the prevailing rate. And, Defendant Insurers have the leverage to steer and withhold business from repair facilities to reinforce the prevailing rates.

87. Defendant Insurers admit their conduct. In June 5, 2014 testimony before the Rhode Island Senate Committee on Judiciary in opposition to Rhode Island Senate Bill No. 2834, which proposed creating new classifications and licensure of repair facilities based on certification of standards, quality and equipment, and which, in turn, would require new labor rate classifications and higher rates for more qualified facilities, counsel for the Property Casualty Insurance Association of America (Stephen Zubiago of Nixon Peabody LLP) – representing, among others, GEICO, Liberty Mutual and Nationwide –stated: “We sell the insurance, we pay the bills, we'd like to make the decisions with respect to what the rates are.”

88. Defendant Insurers have established a rigged market in which collision repair facilities must sell their repairs to insurers, which cover and pay for between approximately 75% and 90% of all automotive damage repairs annually (and Defendant insurers account for

approximately two-thirds of that figure), and the collision repair facilities do not have a choice as to whether to participate in the sale of their repair services to insurers. Rather, they face a Hobson's choice: Sell into a rigged market or do not sell at all – and go out of business.

1. Information Provider Data Is DRP Data But Is Represented As the Prevailing Rate

89. The Information Providers maintain data on every aspect of repairs, which is valuable for insurers for myriad reasons, but the most important is establishing the so-called prevailing rate for every component of repairs, which the Defendants Insurers then use to force all repair facilities to accept. This purported market value is based on a feedback loop of information to the Information Providers from the Defendant Insurers' DRP network facilities, which have previously agreed to repair rates that the Defendant Insurers dictate as the prevailing rate. What the Defendant Insurers contend is the prevailing rate is really an artificially suppressed rate. The Information Providers perpetuate the artifice because they are beholden to Defendant Insurers for the majority of their revenue and because the Information Providers' only competition is themselves.

90. CCC, Mitchell and AudaExplore maintain all data relating to repairs, including, among other things: the cost of repairs, the types of vehicles repaired; the number of estimates per repair (including initial repair estimates and supplement estimates) and what percentage of each repair is based on the original estimate and the estimate supplement(s); the cost of parts and the types of parts used in the repairs (original equipment, aftermarket, recycled, salvage, etc.), as well as the percentage of the total cost of the repair based on parts; the labor rates for all aspects of the repair, including sheet metal, frame/unibody, mechanical and paint/refinish rates, as well as the cost of labor as a percentage of the total repair cost (and the percentage of each type of

labor rate); the cost of paint supplies and the percentage of the total repair costs based on reimbursement for paint supplies; the number of hours spent on each category of repair; the total time for repairs; and the time and scope of all labor operations and repair procedures.

91. Defendant Insurers are provided with this data, which can be manipulated and sorted in myriad ways according to insurer preference, based on industry rates, types of repairs, types of repair facilities and the like. In addition, the data can be provided based on national figures, geographic region (i.e., state or city) or even individual repair facility. Further, the data is provided in two ways: (1) specific to the Defendant Insurer or Conspirator Insurer requesting the data; and (2) in the aggregate for all insured repairs based on estimates uploaded to that specific Information Provider (e.g., CCC for insured repairs of Allstate, GEICO, Farmers and Nationwide); and, again, this data can then be arranged nationally, by geographic region or by individual repair facility. Upon further information and belief, the aggregate insurer repair data is available for purchase from all three Information Providers by any insurer.

92. The data maintained by the Information Providers is heavily weighted toward DRP facility repairs. Though all participants in the industry for insured repairs use one of the Information Providers to prepare estimates, the estimates are not “uploaded” to the Information Provider data base until they are accepted for payment by Defendant Insurers. Thus, there are generally only three scenarios in which repair estimates are uploaded to the Information Providers: (1) those estimates prepared by claims adjusters for Defendant Insurers (or prepared by so-called independent appraisers who work for Defendant Insurers); (2) estimates prepared by the DRP facilities for Defendant Insurers ; and (3) estimates prepared when non-DRP facilities are performing the repairs, which are only accepted by Defendant Insurers after being subjected to Defendants Insurers’ artificial suppression of rates. Indeed, upon information and

belief, in the event that a non-DRP facility performs the repairs and two separate repair estimates are prepared – one by the insurer and the other by the repair facility – only the Defendant Insurer’s or Conspirator Insurer’s repair estimate is uploaded into the Information Provider system and used for data-keeping purposes; non-DRP facility estimates generally are discarded for purposes of data collection and reporting of industry rates. Upon information and belief, even if the non-DRP facility repair estimate is initially uploaded to one of the Information Providers, the data is ultimately “cleansed”, so that only those estimates which underlie actual insurance claims data is reported . As a result, the data that is maintained by Information Providers and promulgated as actual or representative industry data comes from DRP or insurer-written estimates. Non-DRP estimates simply are not properly incorporated into the Information Provider data.

93. The Information Provider data is then cited and used by Defendant Insurers as the prevailing rate. These are the rates that Defendant Insurers require from DRP facilities, the rates that are forced upon non-DRP facilities, and the rates which appear in insurance claims repair data estimates uploaded to the Information Providers – and the self-fulfilling cycle of suppressed compensation for automotive collision repairs is perpetuated.

94. Further, even in the few situations where Defendant Insurers do make adjustments to account for increased labor rates, reimbursement for “paint and materials” and/or the scope and extent of required repair procedures and allotted labor time for those procedures on a particular repair, Defendant Insurers will only report those adjustments as generic, line item entries on the repair estimates that are uploaded to the Information Providers, so that they are not captured or incorporated into those rate categories for statistical purposes. In effect, those

adjustments are treated as “one-offs”, which are not incorporated into the overall prevailing rates.

2. Compensation for Labor Rates, Refinishing, the Time, Scope and Extent of Repair Procedures, and Parts Is Suppressed

a. Labor Rates

95. Compensation for labor accounts for, on average, approximately 40% - 45% of every collision repair. Labor rates are comprised of four different categories: (i) labor relating to sheet metal, the most significant category, which includes the repairs to and replacement of the vehicle body and parts; (ii) refinishing, which includes painting and application of primers, sealants and coatings, as well as the related refinishing operations like sanding, buffing and polishing; (iii) mechanical, which includes operations on the engine; and (iv) frame/unibody, which includes aligning or realigning the vehicle body frame for repairs to the frame and/or other vehicle parts (collectively, “labor rates”).

96. Refinishing labor rates generally track sheet metal labor rates. With respect to mechanical rates, although mechanical work is frequently required in collision repairs, and standard industry mechanical rates, i.e., rates that are paid to facilities that do strictly mechanical work, is significantly higher (often double or triple collision rates), Defendant Insurers () refuse to compensate collision repair facilities at the standard industry mechanical rates for the same repair procedures. Likewise, although frame/unibody rates are higher in the industry than sheet metal rates, Defendant Insurers generally refuse to compensate collision facilities at those higher industry rates for frame/unibody repair procedures.

97. In all events, and at all material times, it is well documented that all of Defendant Insurers’ hourly labor rates for collision repair services have remained depressed. Though there

have been nominal rate increases, Defendant Insurers' labor rates around the country have remained flat and stagnant – and this is not confined or particular to any state or geographic region. While there are differences in labor rates between regions, all repair facilities throughout the country have been subjected to the same rate suppression predicated on the Defendant Insurers' manufactured, artificial market value for labor rates through the imposition of the prevailing rate.

98. Further, the various geographic regions utilized and reported by the Information Providers – and, in turn, the Defendant Insurers – are not foundationally sound. There is no validity to grouping all repair facilities in these pre-determined regions together for purposes of comparing, determining or calculating labor rates.

99. As alleged in detail below, Defendant Insurers' ability to impose artificially suppressed, uniform labor rates is further enabled by their extensive sharing of collision repair data, which permits Defendant Insurers to gauge and align labor rates. Accordingly, notwithstanding the fact that there are differences in labor rates among geographic regions, the labor rates for Defendant Insurers are the same or nearly the same in all states and geographic regions across the country.

100. All industry participants recognize and acknowledge the phenomenon of suppressed and stagnant labor rates – and that rates move uniformly. By way of example, according to CCC, nationwide labor rates during the five-year period from 2007 – 2011 experienced only nominal increases year over year, generally averaging 1.7%, and for the period from 2009 – 2013, averaging 1.4%. Mitchell likewise tracks labor rates throughout the country and its reports align with the findings of CCC. For example, in its quarterly and annual reports, as part of its national labor rate analysis, Mitchell tracks and reports a sampling of labor rate

changes in a number of states year over year (including in a number of the most populous states - California, Florida, Texas, Illinois, Ohio, Michigan, New Jersey, Arizona, Rhode Island, Nevada and Hawaii). According to Mitchell, labor rates during the nine-year period from 2006 through 2013 have experienced nominal percentage increases (again, generally averaging less than 2%), demonstrating that labor rates have consistently remained flat and stagnant across the board. Both CCC and Mitchell report similar and consistent rate stagnation through 2015.¹¹

101. Repair facilities are operated by skilled professionals, and their services are not fungible, notwithstanding Defendant Insurers' efforts to make them so. Like other professionals – and contrary to artificial and uniform prevailing rates that Defendant Insurers have been able to establish through means that have little to do with free market competition or value, the services of automotive repair professionals should be based on factors such as quality, experience, training and facility capabilities, and the compensation for these services should be based, at least in part, on these factors. Defendant Insurers' use of leverage to control the flow of repairs to maintain suppressed labor rates focuses solely on achieving the greatest cost savings, but is counter to the obligation that vehicles must properly be restored to pre-loss condition, and risks the quality of the repairs. Accordingly, Defendant Insurers have affected the market so that they pay the same or similar labor rates to all repair facilities in each geographic region, irrespective of quality, experience, training, equipment and/or certification.

102. Further, notwithstanding the fact that the frequency and severity of insured repairs have remained relatively stable and consistent, auto insurance premiums have generally experienced steady and significant increases. Thus, while Defendant Insurers () have paid stable

¹¹ There have been limited exceptions, but, as Mitchell has explained, those are due to unique or extenuating circumstances.

and consistent repair compensation on an annual basis, the insurers have increased premiums – and simply retained the majority of the savings as internal profit. GEICO, Allstate and State Farm have all recently raised premiums, citing loss costs.

b. Refinishing – Compensation for “Paint and Materials”

103. “Refinishing” consists of applying primer, sealer, paint (known as base coat or color coat), and what is known as “clear coat” to parts that have been repaired and/or replaced, as well as the procedures necessary to sand, buff, polish, blend and the like to achieve the required condition and appearance of the vehicle after repairs and replacement of parts have been completed. Repair facilities are compensated in two ways for refinishing a vehicle. First, facilities are paid for the labor required to perform the foregoing refinishing procedures. These are refinishing labor rates as described above, and the labor rates for refinishing generally track labor rates for sheet metal repairs. Second, repair facilities are compensated for what is known as “paint and materials”, which consist of the facility’s cost of paint, coating, sealant and decontaminant products, as well as the materials that are used to prepare the vehicle for refinishing and to perform refinishing procedures, such as flex additives, sand paper, tape, masking products, bagging and the like (known as “allied materials”). Compensation for “paint and materials” comprises, on average, 10% of the total cost of a collision repair.

104. Defendant Insurers have historically and consistently used what is known as the “dollar per paint hour” method of compensating repair facilities for the costs of “paint and materials”. The “dollar per paint hour” is a standard flat rate, and is a completely arbitrary measure of compensation that has no basis in, or correlation to, the actual costs incurred by repair facilities for “paint and materials”. It is simply another means by which Defendant

Insurers have created an artificial prevailing rate for compensation in order to suppress costs, and imposed that purported prevailing rate upon the repair industry.

105. In contrast, Plaintiff Crawford's, like many repair facilities, uses an invoice methodology based on actual prices paid by Crawford's for "paint and materials", to account for and seek reimbursement from insurers for these costs. In addition, there are also software programs known as "paint materials calculators" or "refinishing materials calculators" that likewise are based on manufacturer pricing and acquisition costs. Plaintiff K&M has utilized a paint materials calculator, as well as an invoicing methodology, but has been forced to work within the dollar per paint hour rates given the conduct he has experienced with State Farm, GEICO, Nationwide and Liberty Mutual.

106. Defendant Insurers, however, refuse to compensate repair facilities, like Crawford's and K&M, based these more accurate methodologies. Upon information and belief, Defendant Insurers have all conducted and/or shared analyses demonstrating that permitting the use of paint materials calculators or actual invoices as the method for compensation to repair facilities for "paint and materials" would substantially increase insurers' severity (i.e., costs) on insured claim repairs. In particular, upon information and belief, State Farm and Allstate have both done analysis concerning the impact of compensating repair facilities based on paint calculators and determined that repair estimates – and compensation to repair facilities – would increase by between \$65 and \$150 per repair, with an approximate blended average of \$100 per repair, based on the more precise measure of the cost of "paint and materials". Given that State Farm and Allstate each pay for millions of insured claim repairs each year, the increased financial cost to State Farm and Allstate would equate to hundreds of millions of dollars

annually. Upon further information and belief, certain of the other Defendant Insurers have conducted similar analysis and reached similar conclusions.

107. As a result, Defendant Insurers have refused to accept paint materials calculators or invoicing as a method for compensating repair facilities for “paint and materials”, notwithstanding the fact that the industry recognizes that their prevailing rate of “dollar per paint hour” is not as accurate. Defendant Insurers require their DRP facilities to accept compensation for “paint and materials” based on the “dollar per paint hour” methodology. By generally refusing to recognize the paint materials calculator or any manufacturer-based (or paint jobber-based) invoice method of compensation for “paint and materials”, Defendant Insurers ensure that only the “dollar per paint hour” method of compensation appears in the repair data uploaded to the Information Providers – the purported independent source of industry data, or is contained in any of the insurers’ purported market surveys, which are based primarily upon their DRP data. And, given that the “dollar per paint hour” is the sole measure for compensation in the Information Provider estimating systems, Defendants Insurers are able to perpetuate the “dollar per paint hour” as the prevailing rate for “paint and materials”, and artificially suppress compensation.

108. Significantly, Mitchell, one of the three Information Providers, sells its own refinish materials calculator (“RMC”) because it, too, has recognized the flawed “inaccurate flat hourly rate formula” (i.e., the “dollar per paint hour”). However, even Mitchell’s RMC has been consistently criticized and challenged by the repair industry because, among other things, it does not keep pace with current and updated manufacturer pricing, and fails to properly account for required cost variations that relate to the particular types of paints and sealants used in each repair.

109. Further, as demonstrated in the State Farm-Mitchell documents, upon information and belief, the Information Providers respectively provide *each* of the Defendant Insurers the ability to determine through their estimating databases the ability to cap paint and materials costs, and determine the lesser measure of compensation.

110. According to an industry source, between 2005 and 2013, the cumulative increase in the cost of paint and materials nationally was approximately 73.9%, while the cumulative increase in compensation to repair facilities for “paint and materials” during the same time period was approximately 31%, a difference of over 40%.

111. Further, there is no basis for Defendant Insurers to compensate repair facilities differently by geographic region for the cost of “paint and materials”. Defendant Insurers have applied varying dollar per paint hour figures in different geographic regions, notwithstanding the fact that paints and sealants are generally priced uniformly nationwide – as is the cost of allied materials. Again, all collision repair facilities are subjected to artificial suppression of compensation for the cost of “paint and materials” – the suppression simply varies according to region. And, like, the labor rates, the prevailing rates for “paint and materials” are the same or nearly the same in the respective geographic regions, but repair facilities have all been subjected to the same conduct. Further, Defendant Insurers each impose the so-called prevailing rate artificially set through their DRP programs, refusing to recognize the charges of non-DRP facilities.

112. As a direct result of Defendant Insurers refusal to compensate repair facilities based on any measure other than the artificial “dollar per paint hour” method, and the restraint of the “dollar per paint hour”, compensation to repair facilities has been artificially suppressed.

c. **Estimating Systems Suppress the Time, Scope and Extent of Compensable Repair Procedures**

113. Defendant Insurers also utilize the prevailing rate to control repair estimates. As described herein, the industry only recognizes repair estimates prepared using estimating programs from CCC, Mitchell or AudaExplore. Defendant Insurers and Conspirators Insurers purchase these estimating programs and claims management packages from the respective Information Providers. Repair facilities all license one or more of the estimating programs. The Information Providers – and their estimating programs – are depicted as the so-called independent standard for developing the time, scope and extent of collision repairs. And it is the repair estimate that not only defines the time, scope and extent of repairs, but also the cost, which controls the compensation to the repair facilities. Defendant Insurers use the Information Provider programs – facilitated by, and with the help of, the Information Providers – to constrain repair estimates and suppress compensation to repair facilities.

114. Notwithstanding their representation of accuracy, all three estimating systems state that they are to be used merely as a “guide” to determine the time, scope and extent of the repair procedures, which are unique and particular to each repair. The intent behind the estimating programs is that the repair procedures and the labor times designated for such procedures will be supplemented, added to and adjusted, predicated on the damage to and condition of each vehicle, and the time, scope and extent of the required repairs. Defendant Insurers, however, each create their own estimating profile that is mandated for use by their respective DRP facilities, as well as their company estimating protocol, which together impose strict limits on the time, scope and extent of compensable repair procedures.

115. As described above, it is the repair estimates prepared by Defendant Insurers and their DRP facilities which are uploaded to the Information Providers and maintained as industry representative data. This feedback loop of data becomes the so-called prevailing rate for the time, scope and extent of the repairs, and the limits on compensable procedures and labor times, which, in turn, is then forced upon non-DRP facilities as the prevailing rate in the industry.

i. The Process of the Estimating Programs

116. The Information Provider estimating programs are designed to anticipate the base set of repair procedures and tasks that are required for each part of the vehicle, and then, depending on the damage to and condition of the vehicle, various procedures and tasks are added as required. The estimating process works in sequence, so that, for example, when repairing a bumper, the program contains a base set of repair procedures for repairing or replacing a bumper (as the case may be), which the individual preparing the estimate enters and which have designated, i.e., pre-set, labor times. Then, there are additional repair procedures or tasks listed which the estimator can enter as necessary, which bring up yet another set of repair procedures and tasks – or simply a discrete task or procedure. These additional procedures may have a designated labor time or formula that calculates the labor time – or they may not. If not, the estimator enters the labor time. Frequently, there are no additional repair procedures or tasks listed at all – or the additional repair procedures that are listed are insufficient in scope or the full complement of required tasks, and the estimator is required to manually enter the procedures and all attendant tasks as well the labor times for all.

ii. The Estimating Reference Guides

117. CCC, Mitchell and AudaExplore each furnish estimating guides or reference manuals (known in the industry as “Procedure Pages”) that work in tandem with their estimating

programs to provide users with more in-depth, detailed information and explanation about preparing comprehensive estimates.

a) **The Estimating Programs Are Merely a “Guide”**

118. The Information Provider guides all start with the premise that repair procedures and times are based on working with *new, undamaged parts* and that only repair professionals – analyzing the damage to and condition of the vehicle – can appropriately determine the full time, scope and extent of the required repair and refinishing procedures. Further, the guides clearly express that the anticipated repairs will be supplemented, added to and adjusted accordingly. Indeed, the Information Providers clearly states that the designated labor times and repair procedures are only a “guide.”

119. For example, CCC’s Guide to Estimating (based on Motor Information Systems’ Collision Estimating Data), Revised as of 09/13 (the “CCC Guide”), a true and correct copy of which is attached hereto as Exhibit “G”, provides, in pertinent part, that:

LABOR TIME PREMISE¹²

The times reported in this publication are to be used as a GUIDE ONLY. Reported times include normal align procedure to insure proper fit of the individual new part being replaced. Reported times include tube/padded OEM caulking and seam sealer removal/application on welded replacement panels. Sprayable seam sealer equipment requires preparation and adjustment before application and is NOT INCLUDED IN LABOR TIME.

Times do not apply to vehicles with equipment other than that supplied by the vehicle manufacturer as standard or regular production options. If other equipment is used, the time may be adjusted to compensate for the variables. Removal and replacement of exchanged or used parts is not considered. If additional aligning or repair must be made, such factors should be considered when developing the estimate. Items not listed under the INCLUDED/DOES NOT INCLUDE heading for any given procedure have not been considered in the estimated work time development for that procedure, unless specified by a footnote. All included/not included items for labor procedures listed between

¹² All emphasis in the Information Provider Guides is as supplied in the original.

pages G10 and G33 are for component R&R and R&I procedures unless otherwise indicated in operation heading.

OPERATION TIMES LISTED ARE BASED ON NEW UNDAMAGED PARTS INSTALLED ON NEW UNDAMAGED VEHICLES AS INDIVIDUAL OPERATIONS. TIME HAS NOT BEEN CONSIDERED FOR ALIGNMENT PULLS, DAMAGE-RELATED ACCESS TIME, DAMAGED, USED, REMANUFACTURED OR AFTERMARKET PARTS. SOME OPERATION TIMES ARE APPLICABLE AFTER BOLTED, ATTACHED OR RELATED PARTS HAVE BEEN REMOVED. REFER TO SPECIFIC FOOTNOTES ATTACHED TO OPERATION TIME LISTING.

* * *

REFINISH TIME LISTINGS

All refinish times are listed in hours and tenths of an hour. A time in parentheses adjacent to the part name, such as (p3.5) indicates three and one half hours. Replacement operation time does not include time necessary to refinish the component. Operation times for the application of painted-on stripes are not covered in this publication. The time necessary to perform this type of operation should be estimated after an on-the-spot evaluation of required procedure.

REFINISH TIME PREMISE

Published refinish times are for one color applied to new undamaged replacement components, without exterior trim, interior trim or other attached components and applied in one continuous process. For damaged panel(s), published refinish times may be applied after the damaged panel has been returned to a NEW UNDAMAGED condition. Refinish times do not include time which may be required to match color tints or defective finish textures on interior or exterior surfaces. Nor do they include time which may be required to correct finish imperfections caused by improper weather conditions, application, or environmental contamination such as dust, dirt, grease, etc. MOTOR advises all parties consider these factors beforehand to determine mutually acceptable provisions in the event such conditions exist or occur.

CCC Guide at G10; G34.

120. Likewise, the Mitchell Guide to Professional Estimating, Revised as of 02/10 (the “Mitchell Guide”), a true and correct copy of which is attached hereto as Exhibit “H”, provides, in pertinent part:

Labor Times

THE LABOR TIMES SHOWN IN THE *GUIDE* ARE IN HOURS AND TENTHS OF AN HOUR (6 MINUTES) AND ARE FOR REPLACEMENT WITH NEW, UNDAMAGED PARTS FROM THE VEHICLE MANUFACTURER ON A NEW, UNDAMAGED VEHICLE. Any additional time needed for collision **DAMAGE ACCESS, ALIGNMENT PULLS, NON-ORIGINAL EQUIPMENT OR USED PARTS** should be agreed upon by all parties. Times for some operations are applicable after necessary bolted, attached or related parts have been removed. Exceptional circumstances, including all the sub-operations or extra operations, are indicated as notes throughout the text or are identified in the *Procedure Explanations*. The actual time taken by individual repair facilities to replace collision damaged parts can be expected to vary due to severity of collision, vehicle condition, equipment used, etc.

Labor Categories

The labor times shown in the *Guide* fall into various categories (for example, body, frame, mechanical) as determined by the repair facility's operating procedures. As a guide, components for which R&I or R&R is commonly considered to be a mechanical operation when performed in a collision repair environment are designated with the letter "m" in the text. These designations are only a guide. They are not necessarily all inclusive, nor do they suggest the application of a labor rate.

* * *

Refinish General Information

Complete Refinish

Refinish times in this *Guide* pertain to New, Undamaged Parts and are not intended for calculating complete vehicle refinish –single- or multi-stage. An estimate of this nature would suggest all new panels have been fitted to the vehicle.

Repaired/Used Panels

Labor times related to repaired and/or used panels – example: remove and install or masking of glass, outside handles or exterior trim, feather prime & block, masking for primer surface application – are not included in refinish time. The steps required for refinishing a repaired and/or used panel may vary from those required for a new panel depending on the condition of the repaired and/or used panel.

Mitchell Guide at P2-3; P16.

121. AudaExplore's 2014 AudaExplore Database Reference Manual ("AudaExplore Guide"), a true and correct copy of which is attached hereto as Exhibit "T", provides the same, to wit:

Labor Overview

Labor supplied in an AudaExplore estimate is intended for use as a guide for collision repair. Labor allotments suggested by AudaExplore estimates are for replacement of new and undamaged parts. Additional allowances are provided for optional equipment supplied by the vehicle manufacturer by selecting the appropriate options and parts. Because each vehicle's collision damage is unique, automation cannot cover every situation. The flexibility of the AudaExplore system, coupled with the estimate preparer's knowledge and expertise, provides for adjustment of any estimate to meet the needs presented by each collision situation.

* * *

Replaced Panel Refinish

Current AudaExplore refinish labor is based on the use of new and undamaged panels. Additional steps or processes that may be required should be considered during estimate preparation.

Repaired Panel Refinish

When a repaired panel is being refinished, the estimator provides time for the repair of the panel. The estimator also determines included operations. When AudaExplore refinish labor is used for repaired panels, AudaExplore refinish times assume that the panel has been returned to the condition of a new, undamaged OEM panel or equivalent.

When the estimator enters a judgment time for refinish labor, the estimator also determines the included operations. Operations that might be considered in the repair refinish time include any steps required to bring the panel to the condition of a new, undamaged panel. This may include feather edge, blow off and clean, mask to prime, tack off, mix etch primer, prime bare metal, mix and apply primer filler, guide coat application, unmask as required, and block sand. Panel scuff to facilitate application of clear may also be considered for two- or three-stage refinish.

AudaExplore Guide at 49, 150-51.

b) **“Included” and “Not Included” Operations**

122. CCC, Mitchell and AudaExplore Guides all expressly delineate repair and refinishing procedures deemed to be “Included” in each repair or part replacement, i.e., all tasks necessary for repair or replacement, as well as those procedures that are “Not Included”, i.e., procedures which require the judgment of the repair professional based on the damage to and condition of the vehicle and the required time, scope and extent of repairs. For “Included” procedures, the Information Providers have bundled tasks to arrive at an anticipated labor time necessary to perform the repair or replacement procedure(s). As part of this process, the Information Providers account for what is known as “overlap”, which is a labor operation common to the repair or replacement of two or more parts. Using “overlap”, Information Provider estimating programs automatically deduct time to avoid the calculation of so-called duplicate labor. For “Not Included” procedures, again given that these are repair and replacements tasks (including the need for parts) that are considered to be within the professional judgment of the repairer based on the damage to and condition of the vehicle and the required repairs, the inclusion of the procedures cannot be predetermined because each vehicle’s collision impact is unique.

123. The Information Provider guides all expressly state that “Not Included” procedures do *not* mean that the procedures are unnecessary; rather, these procedures are to be manually entered based on the judgment of the repair facility – and are indeed necessary to restore the vehicle to pre-loss condition based on the time, scope and extent of the required repairs.

124. The introductory explanation in the CCC Guide provides:

ADD IF REQUIRED:

MOTOR Collision Estimating Data is based on the base model vehicle configuration, standard or regular production options, and/or standard replacement operations. "Add if required" operations are for extra procedures necessitated by optional factory equipment or certain collision scenarios that may be encountered. "Add if required" operations should be added to the estimate whenever applicable after an "on the spot" inspection of vehicle damage and/or vehicle options.

INCLUDED OPERATIONS:

When items or operations appear in the Guide to Estimating pages under the "Included" heading it means that the operation is performed in conjunction with another operation. For example, Steering Wheel R&I is an individual operation, but when replacing a steering column, steering wheel R&I is also performed and therefore included in Steering Column R&R. If an item is listed without a qualifier, it means all labor has been considered within the indicated labor procedure. If a specific qualifier (such as R&I) appears, it means only the specified qualifier applies.

NOT INCLUDED OPERATIONS:

Items or operations listed under "Does Not Include" were not considered in the development of published labor operation times. These operations may or may not be required depending upon the vehicle or repair process used. If any of these items or operations are required, they should be considered by the estimator. If a specific qualifier (such as R&I) appears, it means only the specified qualifier applies.

CCC (Motor) Guide at G5.

125. The Mitchell Guide provides:

Procedures

The *Procedure Explanations* on the following pages outline the operations which are or are not included in the labor time listed in each vehicle "service". You are encouraged to become familiar with these procedures pages to be sure you have a thorough understanding of the Mitchell approach to collision estimating.

The left **Included Operations** column means that the labor time shown in the *Mitchell Collision Estimating Guide* text includes that particular operation or operations.

The right **Not Included Operations** column means that the labor time in the text does not include that particular operation or operations. Performance of one or more of these operations may or may not be necessary as determined by the individual job requirements. If an add-on time has been established for any of these operations it will be shown in the text. If a time has not been established or if the add-on time is dependent on conditions that vary due to collision damage

(example: access time, free up parts), the additional time should be recorded on the damage report. Labor times relating to the repair of a damaged panel or the use of used parts would come under this category.

Mitchell Guide at P3.

126. The AudaExplore Guide provides, in pertinent part, and by way of example, that:

Labor Exclusions

Because each vehicle's collision damage is unique, labor to perform some of the following operations may vary. In other cases, the operation is performed less than 80% of the time and may or may not be required due to the collision damage. To address these situations, AudaExplore provides:

- Standard Manual Entries that are entered by the estimate preparer (for a complete listing, see Section 5-1).
- Additional Labor operations which are AudaExplore pre-stored labor for many of these operations.

When the operation has a Standard Manual Entry or an Additional Labor operation available, a note will appear next to the appropriate exclusion.

AudaExplore Guide at 53.

Replacement and Recycled Operations

The following is a general overview of operations included in AudaExplore's labor allowances. Each part or operation shows which specific operations are included, as well as those that are not included. Operations listed in the "Not Included" column may or may not need to be performed. To make that determination, an assessment needs to be made at the time of inspection. Review the completed estimate to see that the estimate preparer's considerations and allowances for the specific vehicle repair. It is the ultimate responsibility of the estimate preparer to ensure compliance, and that all necessary operations needed are included in the estimate.

All operations and labor allowances in the AudaExplore system are for like, kind and quality panels, including new and undamaged OEM panels.

AudaExplore Guide at 59.

Replacement and Recycled Operations Overview

Asterisks on an estimate are used to denote user entered values. They do not imply that the operation noted is not a necessary procedure.

Manual entries on an estimate do not imply that the part/operation entered is not a necessary procedure.

AudaExplore Guide at 61.

Refinish Guidelines

This section reflects the up-to-date findings of our data collection from a cross-section of repair facilities across North America, as well as our conclusions and recommendations on the most significant areas in the refinish process. It is not our intention to suggest that the observations, conclusions or recommendations apply with 100% accuracy to every refinish situation, but rather than AudaExplore reflects the findings of our comprehensive study coupled with our ongoing efforts.

* * *

Refinish

Based upon our observations, and the input of our Inter-Industry Client Council, we have identified several discrete application processes, conditions, and operations that are very important to the refinish process. To return the vehicle to pre-accident function and appearance, each of these areas should be understood, considered, and evaluated for potential inclusion in the estimating process.

* * *

Automated Refinish Formulas

Based on the results of our Refinish Study, AudaExplore has automated our formulas for two-stage refinish, three-stage refinish, two-tone refinish, blend refinish and chipguard. The calculations are explained below. The remainder of these topics is important to the refinish process and can either be assigned a supportable average time or considered in the estimating process by some other means.

AudaExplore Guide at 140-41.

127. As is clearly evident from the Information Provider Guides, it is anticipated that virtually *all* repairs will require that the repair professional determine the scope and the extent of the repairs, which encompasses “Not Included” procedures and the adjustment of average designated labor times. Yet, Defendant Insurers systematically refuse to recognize and compensate repair facilities for necessary procedures and the full extent of the time spent performing repair procedures. In short, Defendant Insurers, by virtue of their respective

estimating profiles and their company-wide estimating protocol and guidelines, which control the prevailing rates for collision repairs, do *not* abide by the Procedure Pages.

128. The egregiousness of Defendant Insurers’ conduct is evident from a review of the Information Provider Guides, which detail the permutations of the procedures that may be necessary in the judgment of the repair professionals – and frequently are necessary as the Information Providers state, but which Defendant Insurers and Conspirator simply refuse to compensate – or compensate sufficiently.

129. For example, the CCC Guide explains that “LABOR TIME DOES NOT INCLUDE ... [T]he items listed below [which] apply to all [potentially necessary] labor procedures.”

- A/C System, Evacuate and Recharge
- Aftermarket & OEM accessories
- Alignment, check or straightening related parts
- Alignment check of front or rear suspension/steering
- Anticorrosion material restoration/application
- Battery D&R/recharge
- Brackets & braces transfer
- Broken glass removal or clean up
- Brakes, bleed and adjust
- Caulk (non-OEM), sound insulate or paint inner areas
- Clean up or detailing of vehicle prior to delivery
- Computer control module D&R/relearn
- Conversion Vans (special components, equipment and trim)
- Cutting, pulling or pushing collision damaged parts for access
- Damaged or defective replacement parts
- Reset electronic memory functions after battery disconnect
- Road test vehicle
- Rusted, frozen, broken or corrosion damaged components or fasteners
- Scan tool clear/reset electronic module
- Scan tool diagnostics
- Steering Angle Sensor recalibration
- Straighten or align used, reconditioned or non-OEM parts
- Structural damage diagnosis and vehicle set up time
- Structural foam removal or application
- Test panel/spray caulk
- Undercoating, tar or grease removal
- Unprimed bumpers, removal of mold-release agents
- Waste disposal fees (all types)
- Weld through primer
- Welded seam surface finishing finer than 150 grit sandpaper
- Wheel or hub cap locks R&I

- Drain & refill fuel tank
- Drilling, modification or fabrication of mounting holes
- Fabricate templates, reinforcing inserts, sleeves or flanges
- Filling, plugging and finishing of unneeded holes in new parts
- Information label installation
- Material costs
- Pinch weld clamp damage repair
- Refinishing

CCC (Motor) Guide at G10.

130. Likewise, for refinishing procedures, the CCC Guide provides:

SPECIAL NOTATION:

The items or operations below were not considered during the development of any published basic refinish operation times. These operations may or may not be required depending upon the vehicle or process used. If any of these items or operations are required, they should be considered by the estimator and added to the estimate if necessary.

REFINISH, WET/DRY SAND, DE-NIB and/or RUB-OUT TIME DOES NOT INCLUDE:

- Anti-corrosion material application
- Filling, blocking, featheredging repaired panels
- Flex additive mixing time
- Flex prep application
- Material costs
- Mask inner panels ex: apron/cowl/pillars/rail/floor, etc.
- Molding & ornamentation
- Protective coating material application
- Protective coating removal
- Sound deadening application
- Spatter paint application time
- Stripe tape, decal & overlay
- Waste disposal fees (all types)

CCC (Motor) Guide at G35.

131. To further demonstrate the particularity of each repair, again by way of example only, for basic color coat application (paint), CCC describes the spectrum of procedures in

applying paint that are “Included” and those that are “Not Included” but which should be performed in the judgment of the repair professional:

BASIC COLOR COAT APPLICATION

<i>INCLUDED:</i>	<i>DOES NOT INCLUDE:</i>
<ul style="list-style-type: none"> • Back tape opening (handle, lock cylinder, mirror) • Clean component (solvent wash) • Clean sprayer • Color coat application • Initial dry sand (as recommended by paint manufacturer) • Light buff, lacquer paint only • Load sprayer • Mask adjacent panels (three-foot perimeter) • Mask/close gap between adjacent panels up to foam tape (overspray) • Mask glass opening • Mask/protect grille radiator opening (overspray) • Mix paint (color with necessary solvents) • Primer-sealer coat application 	<ul style="list-style-type: none"> • Adhesion promoter (unprimed flexible component) • Backside refinishing • Blending into adjacent panels • Cover mask engine/compartment to prevent overspray • Color matching to adjacent panels • Cover/mask for prime and block • Cover/mask for cut-in • Cover/mask recessed edges/jamb/weatherstrips • Cover/mask trunk/compartment to prevent overspray • Cover/mask entire exterior of vehicle to prevent overspray damage • Cover/mask interior of vehicle to prevent overspray damage • Edge refinishing • Grind, fill, & smooth welded seams (up to 150 grit sandpaper) • Paint or material costs • Prime & block (high build/primer-filler) • Test spray-out panel

<ul style="list-style-type: none"> • Primer-sealer coat final clean • Primer-sealer coat final application • Remove masking • Retrieve accurate color information, including paint chip 	<ul style="list-style-type: none"> • Tinting Primer-Sealer • Tinting to achieve color match • Underside refinishing • Weld, grind or sanding damage to adjacent panels • Wet sanding
---	---

CCC (Motor) Guide at G35-36.

132. The AudaExplore and Mitchell Guides mirror the concepts set forth in the CCC Guide, in that much of the repair process for labor and refinishing (and preparing the estimate for same) is dependent upon the judgment of the repair professional. Again, by way of example, the AudaExplore Guide highlights a standing industry issue regarding a procedure known as “Feather, Prime and Block” that is required in many repair refinishing circumstances but for which Defendant Insurers generally refuse to pay.

Feather/Prime/Block Collision Industry Conference – April 2006

- The repair process associated with damaged painted body panels typically involves multiple operations: body repair, feather, prime, block and refinish.
- The body repair process includes metal finishing and/or the use of body fillers to return the body panel to its undamaged contour. The repaired area is finished to 150-grit and free of surface imperfections.
- Feather, prime and block are not-included refinish operations that complete the process from 150-grit to the condition of a new undamaged panel and are outlined and documented in printed and/or electronic time guidelines.
- The body/paint labor and materials necessary to prepare the repaired area from 150-grit to the condition of a new undamaged part are valid and required steps in the process. The labor and material allowance for these operations requires an on-the-spot evaluation of the specific vehicle and damage.

AudaExplore Guide at Preamble. And, further:

Feather/Prime/Block

AudaExplore recognizes that Feather/Prime/Block are required operations when replacing welded-on panels. Time to perform this operation is included in the AudaExplore time for welded panel replacement in the seamed areas, to bring the panels to the condition of a new, undamaged panel for the purpose of refinish. Although the time is included, AudaExplore does not provide a material allowance for the Feather/Prime/Block process. If necessary, the determination and assessment for materials is best provided by the estimate preparer for consideration and allowance during the estimate preparation process.

AudaExplore recognizes that Feather/Prime/Block are required operations in the panel repair process. AudaExplore does not provide a labor time allowance for repaired panels, as this is a judgment time. AudaExplore does not provide a labor time allowance for Feather/Prime/Block, as this, too, is a user judgment time. AudaExplore does not provide a material allowance for the Feather/Prime/Block process. The determination and assessment for this operation is best provided by the estimate preparer for consideration and allowance during the estimate preparation process.

AudaExplore Guide at 151.¹³

133. The AudaExplore Guide provides various examples of procedures that are subject to the judgment of the repair professional but which, in practice, are denied appropriate compensation by Defendant Insurers as set forth below. Thus, by way of example only, the following are certain procedures in the refinishing context that require the judgment of the repair professional:

Refinish within Panel Boundaries

Refinish within panel boundaries is defined as the process of applying paint and clear coat to the surface of a repaired panel for the sole purpose of facilitating the appearance of color match within the confines of the panel.

Note: The AudaExplore blend formula does not apply to this operation.

When the estimator enters a judgment time for refinish labor, the estimator also determines the included operations. Operations that might be considered in the repair refinish time include any steps required to bring the panel to the condition of a new, undamaged panel. This may include feather edge, blow off and clean, mask to prime, tack off, mix etch primer, prime

¹³ Likewise, CCC, provides that prime and block is a “required procedure”, “best reserved for the judgment of an estimator/appraiser...” See CCC Guide at G34.

bare metal, mix and apply primer filler, guide coat application, unmask as required and block sand. Panel scuff to facilitate application of clear may also be considered for two- or three-stage refinish.

In the AudaExplore system, there are two ways to include the time to perform this refinish operation in an estimate:

1. The preferred method provided by AudaExplore is a Manual Entry. Using this method will not remove adjacent panel/non-adjacent panel overlap. This labor will also be used in paint materials calculations. A manual entry for this operation may be entered along with the desired value, or the Standard Manual Entry “M10 Paint As Required” may be used.
2. The second method is to override the pre[-]stored labor to the desired time.

It is important to keep in mind when using the method that all adjacent panel and nonadjacent panel overlap will still be considered in an estimate when the panel being painted is on a lower guide number. If this method is used, and overlap is not applicable, any overlap deducted by the system should be manually included in the estimated time for the spot painting. Non-adjacent panel overlap time is 0.2 and adjacent panel overlap time is 0.4

Therefore, when using the override method and non-adjacent panel overlap applies, add 0.2 to the spot paint time. When using the override method and adjacent panel overlap applies, add 0.4 to the refinish operation.

AudaExplore Guide at 149-50.¹⁴

Color Sand and Buff

This process, which may or may not be required, is defined as wet sanding the entire panel by compound buffing and mechanical or hand polishing. Color sand and buff is further defined as all of the above steps performed to the finished surface for any reason, plus cleanup.

Color sand and buff can be estimated at:

- 30% of AudaExplore single-stage refinish labor (not including final wash).

AudaExplore Guide at 150.

Replaced Panel Refinish

¹⁴ Significantly, the process (Refinish Within Panel Boundaries), known in the industry as “blend within panel”, was established by one or more of the Defendant Insurers, and “suggested” to the Information Providers for inclusion in their respective programs, is the source of under-compensation by Defendant Insurers and Conspirator Insurers because when one panel is repaired and refinished, its appearance is different than adjacent panels. The color and refinishing must be blended with adjacent panels, and cannot simply be confined to the repaired panel – at least generally not in a professionally competent manner.

Current AudaExplore refinish labor is based on the use of new and undamaged panels. Additional steps or processes that may be required should be considered during estimate preparation.

Repaired Panel Refinish

When a repaired panel is being refinished, the estimator provides time for the repair of the panel. The estimator also determines included operations.

When AudaExplore refinish labor is used for repaired panels, AudaExplore refinish times assume that the panel has been returned to the condition of a new, undamaged OEM panel or equivalent.

When the estimator enters a judgment time for refinish labor, the estimator also determines the included operations. Operations that might be considered in the repair refinish time include any steps required to bring the panel to the condition of a new, undamaged panel. This may include feather edge, blow off and clean, mask to prime, tack off, mix etch primer, prime bare metal, mix and apply primer filler, guide coat application, unmask as required, and block sand. Panel scuff to facilitate application of clear may also be considered for two- or three-stage refinish.

AudaExplore Guide at 150-51.

Nib Sanding/De-nib

Nib sanding (or de-nib) is defined as the removal of isolated dirt and dust particles, and polishing the affected area(s).

- AudaExplore's formula for Color Sand and Buff does not apply to this operation. Additional steps or processes that may be required should be considered during estimate preparation.

AudaExplore Guide at 151.¹⁵

Welded-on Panels

AudaExplore base refinish labor does not include additional time to refinish adjacent panels that may be damaged by welding.

AudaExplore Guide at 157.

¹⁵ Again, this process is the source of controversy as well. It was likewise suggested to the Information Providers by one or more of the Defendant Insurers as a way to avoid compensation for more labor intensive procedures like "Color Sand and Buff" and, similarly, is another source of under-compensation by Defendant Insurers and Conspirator Insurers.

Raw, Unprimed Bumper Covers and Plastic Parts

The AudaExplore formula for preparation of a raw, unprimed Bumper Cover or Plastic Part is:

- 20% of the base refinish labor

Note: AudaExplore will begin to add a “Prep Raw Bumper Cover” operation to the Bumper Cover part choice box for new and update vehicles, beginning with Q1 2011. This will apply only to manufacturers known to supply raw, unprimed bumper covers. This operation only applies to the front and rear bumper covers. The AudaExplore formula for Prep Raw, Unprimed Bumper Cover is 20% of the base refinish allowance, with a .3 minimum time.

The AudaExplore formula includes the following:

1. Wash cover with soap and water, rinse & dry
2. Degrease the surface with a wax, grease, and silicone remover
3. Sand cover with a sanding paste and grey scuff pad
4. Wash cover with soap and water, rinse & dry
5. Degrease the surface with a wax, grease, and silicone remover

If the paint manufacturer or OEM requires any other or additional steps to prepare a raw, unprimed bumper cover, these steps are Not Included in AudaExplore labor times. They may be accounted for manually, if required.

AudaExplore Guide at 157-58.

134. The Mitchell Guide is the same, in that the judgment of the repair professional is required to determine the scope of virtually all repair or refinish procedures. *See* Exhibit “H”, *passim*.

iii. **Standard Labor Times and Allowances for Procedures in the Estimating Programs Are Not Representative and Are Often Misleading**

135. Notwithstanding that every collision repair is unique, and the fact that the Information Provider Guides are written to anticipate adjustment of labor times, the Defendant Insurers deem the labor time entries in the Information Provider estimating programs as definitive, and this applies to times for: (i) “Included” operations; (ii) deductions for overlap; and (iii) manually added procedures required in the judgment of the repair facility that are considered

“Not Included”, when those manually added procedures have a designated labor time or a formula which calculates additional labor time based on related procedures.¹⁶

136. The Information Provider Guides explain that the labor time entries are the result of careful study, analysis, testing and data review. Upon information and belief, however, these labor time studies are based primarily on assumptive knowledge that simply cannot be widely or accurately extrapolated, with very limited actual study and testing. And, the testing is often outdated – and/or does not comport with manufacturer repair specifications. In fact, save for the recent incorporation of certain Toyota specifications into Mitchell, *none of the Information Providers account for manufacturer specifications, which are crucial to repair procedures in terms of quality and time.*

137. In addition, given the great financial influence that Defendant Insurers have over the Information Providers – and demonstrating that the Information providers are the economic partners of the insurers, the Information Providers: (i) re-do time studies until they are “able” to report results that are satisfactory to Defendant Insurers (i.e., results which reduce the labor times designated for repair procedures); (ii) bundle numerous repair procedures and tasks to significantly understate the labor time necessary to perform the procedures in a professional and competent manner; (iii) impose formulas for calculating labor times for procedures that are arbitrary and understated, which do not reflect the labor time necessary to perform the procedures in a professional and competent manner; (iv) collapse and combine procedures to achieve greater overlap to reduce labor times and costs in repair estimates; and (v) commonly

¹⁶ For example, “color, sand and buff” is a procedure that completes the refinishing process, in order to bring the finish of the vehicle back to pre-loss condition after repairs have taken place. The estimating programs provide that the labor time to perform “color sand and buff” is calculated as a percentage of the labor time designated to apply the base color coat on the repaired panel(s) of the vehicle.

shift necessary repair procedures to “Not Included” or discretionary categories, enabling Defendant Insurers to avoid compensating repair facilities for their work as unnecessary or not competitive.¹⁷

138. Perhaps most importantly, the so-called data analysis that is the foundation of the Information Provider systems is predicated on DRP repairs performed using Defendant Insurers’ own estimating platforms – again, perpetuating the prevailing rate feedback loop.

139. In sum, not only is each repair unique as the Information Providers set forth in their Guides, militating against standard application of labor times and compensable procedures, but also the labor times and compensable procedures that are reported in the estimating programs are not representative of industry or market repair standards.

iv. Information Providers Collaborate with Defendant Insurers to Suppress Repair Estimates

140. The Information Providers enable Defendant Insurers to limit and suppress the scope of repair estimates and thereby the compensation paid to non-DRP facilities. First, the Information Provider estimating programs are not only written to constrain and limit labor time, but they are also heavily skewed toward requiring manual entry and adjustment and supplementation of procedures by repair professionals, when many of these procedures should be included in the standard sequence and progression of repair tasks, rendering it easier for Defendant Insurers to challenge the necessity of these required procedures and/or avoid appropriately compensating repair facilities for these procedures.

¹⁷ These practices apply to both labor procedures for body repairs and replacement, as well as refinishing procedures. It can be even more egregious in the refinishing context because, by reducing refinishing times, Defendant Insurers and Conspirator Insurers are doubly reducing compensation, based on both labor time and reimbursement for the cost of “paint and materials”, because the Defendant Insurers and Conspirator Insurers compensate for the latter on an artificial time basis (the “dollar per paint hour”).

141. Second, any time that a repair estimate contains a deviation in the designated labor times and/or procedures from the core entries in the estimating programs, which includes any added procedure and any manually added procedure, as well as any adjustment of designated labor time or labor times that are derived based on formulas applied in the estimating programs, CCC, Mitchell and AudaExplore all automatically highlight each such entry with an asterisk or underline, notwithstanding the fact these adjustments and added entries are expressly contemplated and anticipated – and, in fact, necessitated – in the Information Provider Guides, and more importantly, determined in the judgement of collision repair professionals to be a required procedure for proper repairs. In short, any time that a labor time is changed or a procedure is added per the estimating program or manually input as “Not Included” or based on the repairer’s judgment, those entries are highlighted.¹⁸

142. Third, and most importantly, each of the Information Providers has “scrubbers” to audit repair estimates to ensure that they conform to Defendant Insurers’ strict estimating parameters. CCC’s program is “AccuMark Advisor”, Mitchell’s scrubber program is “Compliance Manager” and AudaExplore’s scrubber program is “Estimate Check.” Every time each of the Defendant Insurers prepare an estimate, or one of their DRP facilities prepares an estimate, it is *automatically scrubbed* by CCC, Mitchell or Audatex. In addition, when a non-DRP facility submits a repair estimate to the Defendant Insurers, their adjusters convert it to their estimating program, and the estimate is once again *automatically scrubbed* by CCC, Mitchell or Audatex – again capturing all deviations in labor times, labor operations and the like. Defendant Insurers then represent to the non-DRP facility that its entries do not meet the prevailing rate.

¹⁸ Further, mechanical repair procedures are denoted with an “m” or similar indication, which enables Defendant Insurers and Conspirator Insurers to highlight and decrease to body labor rates.

The Information Providers automatically scrub these estimates on behalf of all of the Defendants Insurers, and/or they are embedded within the estimating systems that the Information Providers furnish to each of the Defendant Insures.

143. Thus, while Defendant Insurers maintain that the Information Providers are the independent authority of estimating guidance, which repair facilities have been required to use to prepare repair estimates, the Information Providers clearly work in tandem with Defendant Insurers to constrain the proper scope and compensation for repairs. Further, Defendant Insurers are now requiring non-direct repair facilities like Plaintiffs (in addition to their DRP facilities) to “upload” all estimates into the Defendants Insurers’ respective Information Provider’s systems, through which the estimates are subjected to automated scrubber programs. As a result, the lines between the Defendant Insurers and the Information Providers have been blurred even further with respect to the review of repair estimates and the determination of compensation to repair facilities.

144. The labor times in all three Information Provider estimating programs are based on repairs to new, undamaged parts, so that, standing alone, the underlying foundation for computing time is counterintuitive given that repairs (by definition) are generally made on *damaged* parts and vehicles. Along the same lines, labor times computed based on repairs using original equipment parts cannot be the foundation for working with aftermarket – or worse, recycled, remanufactured or salvage – parts.

145. And, in practice, based on the damage to and condition of the vehicle, as well as a host of the aforementioned factors that invalidate the designated labor times set forth in the estimating programs, repair facilities must increase labor times in their estimates to account for times that are too low for myriad reasons, including, without limitation, because certain

procedures are shorted on time or simply not accounted for, because the estimating programs have reduced too much time – or inexplicably reduced time – for purported overlap, because overlap should not be applied (indeed, again, all three Information Provider Guides instruct that overlap may need to be adjusted), or because time must be added for procedures that the estimating programs deem to be “Included” and therefore bundled in labor time, but which would otherwise go uncompensated without adding as additional procedures requiring significant additional labor time.

146. Similarly, manually entered repair procedures – and the labor time for these procedures – will always vary contingent upon damage to and condition of the vehicle. For those additional procedures and “Not Included” procedures requiring the judgment of the repairer, the Information Providers may designate labor times, either standing alone or based on formulas that are derivative of a related repair procedure; other “Not Included” procedures may have no labor time designated by the Information Providers. In either event, *all* added and manually entered procedures are highlighted by the Information Providers in their estimating programs, irrespective of whether a labor time or formula is designated, whether the repairer adjusts the labor time designated, or whether the repairer inputs the labor time. Again, however, “Not Included” procedures do *not* mean that the procedures are unnecessary or compensable at the discretion of the Defendant Insurers and Conspirators Insurers. Rather, “Not Included” simply means that the procedures are subject to the judgment of the repair professional.

147. Notwithstanding the manner in which the Information Provider estimating programs are intended to operate, and the fact that it is the repair facilities – not insurance companies – that are repair professionals with certification, training and years of experience to determine the proper time, scope and extent of required repairs, Defendant Insurers all institute

strict caps and limits on repairs and compensable procedures by establishing their own estimating profile and company protocol inflexibly using the respective Information Providers estimating programs (but not as a “guide”) and are able to artificially restrain and suppress compensation to repair facilities.

d. Parts

148. Defendant Insurers, like they do with other categories of repair, frequently impose the pre-determined parts prices that they have with their respective DRP network facilities, including the required price discounts, on non-DRP facilities, under the guise of the purported prevailing rate, through the requirement of using aftermarket, recycled or salvage parts, or artificially limiting mark-up charges. This conduct similarly occurs nationwide.

D. Sharing of Information Between and Among Insurers Further Enables the Suppression of Compensation to Repair Facilities

149. Further enabling the suppression of compensation to repair facilities is the fact that Defendant Insurers share information about, and/or have access to, the costs and compensation of their respective insured repairs, including labor rates and reimbursement for “paint and materials”, as well the time, scope and extent of compensable repairs.

150. Defendant Insurers gauge and align, among other things, their hourly labor rates and reimbursement rates for “paint and materials”, which together account for more than 50% of all repair compensation. These rates are generally determined and/or guided by State Farm – the market leader, which is engaged in its own suppression of rates as described in detail above.

151. Defendant Insurers are all aware of the State Farm MFN, implemented in 2006, requiring that State Farm’s Select Service facilities, which comprise approximately 25% of all repair facilities in the country, provide the lowest pricing to State Farm. Thus, even when State

Farm adjusts the hourly labor rates and/or “paint and materials” reimbursement rates, the Select Service facilities are still required to provide State Farm with the lowest rates paid by any other insurer. Accordingly, there exists an inherent preservation of the *status quo*, and prevailing labor rates and “paint and materials” reimbursement rates are maintained at the same or very similar levels by and among Defendant Insurers. In practice, Defendant Insurers generally align their rates with State Farm, so that when State Farm does issue an increase in hourly labor rates and/or “paint and materials” reimbursement, Defendant Insurers adjust their rates in concert.

152. When Defendant Insurers align these rates, they artificially restrain and suppress collision repair compensation. These rates are incorporated into the Defendant Insurers’ respective DRP network facility agreements as the fixed, maximum rates for labor and “paint and materials” reimbursement. These fixed, maximum DRP rates are then filtered through the CCC, Mitchell and AudaExplore data bases (or, in State Farm’s case, the rates are filtered through its manipulated rate survey), and are promulgated as the “independently determined” prevailing rates in the industry. Consequently, Defendant Insurers are able to impose these fixed, suppressed rates for labor and “paint and materials” reimbursement upon collision repair facilities like Plaintiffs and the members of the Classes, which do not serve as DRP facilities for the Defendant Insurers.

1. Information Sharing Between and Among Insurers

153. In particular, at all material times, Defendant Insurers exchange and have access to costs and compensation for insured collision repairs by virtue of the following.

a. Exchange of Information through the Subrogation Process

154. Through the subrogation departments of Defendant Insurers, each knows in full detail what the other insurers are paying to repair facilities – both DRP and non-DRP – for

insured repairs. In addition, each insurer is privy to repair estimates underlying insured claim repairs paid by other insurers. Thus, Defendant Insurers all know what other insurers are paying in labor rates and reimbursement for “paint and materials” (as well as costs for parts and discounts provided by repair facilities on parts and compensation for certain repair procedures). Further, Defendant Insurers also know which estimating program is utilized by each insurer, as well as the insurer’s estimating profile – or, at the very least, the parameters of the estimates that each insurer writes and pays as the prevailing rate.

155. The foregoing data is all available to Defendant Insurers on a current basis, as claims settlement occurs through the subrogation process. Moreover, upon information and belief, Defendant Insurers all utilize the subrogation data to analyze their repair costs in order to predict and construct future pricing parameters.

b. Data Sharing through the Information Providers

156. Defendant Insurers share information through the Information Providers (CCC, Mitchell and AudaExplore), which, as described herein, maintain data on all facets of automotive collision repairs and the compensation paid by insurers.

157. Information Provider data is provided to insurers in two ways. First, it is insurer-specific, which consists of all repairs paid for by that particular insurer. Second, CCC, Mitchell and AudaExplore all furnish aggregate industry data, consisting of all repairs paid for by all insurers which have uploaded repair data into the respective Information Provider systems. For example, for CCC, which provides claims and estimating programs to Allstate, GEICO, Farmers, USAA and Nationwide, CCC furnishes pricing information for claim repairs paid for by those insurers in the aggregate.

158. This data is provided on a national level, or can be categorized or broken down by state or geographic region, by city, or even by a particular repair facility – even though that facility has performed work for different insurers. Moreover, this data is available for purchase by any insurer, even if that insurer does not purchase program services from that particular Information Provider. The repair data from the Information Providers is available not only for historical and trailing time periods, but is also provided to Defendant Insurers on a current basis. Upon information and belief, this comprehensive industry repair data is not available to repair facilities.

159. In addition, upon information and belief, CCC, Mitchell and AudaExplore all provide reports to Defendant Insurers which forecast trends and make projections for repair costs and procedures, which are predicated – at least in part – on the aggregate insurance repair data that the Information Providers collect from the respective insurers. Upon further information and belief, Information Providers also furnish to insurers customized reports concerning the repair costs that the industry anticipates will be paid on insured claim repairs in the future, based on that particular insurer's repair costs, as well as aggregate industry repair data.

160. Given Defendant Insurers' in-depth knowledge of each insurer's market share and operations in each region, state and city, as well as the fact that Defendant Insurers all know which Information Provider estimating program the other insurers use – and thus, which insurer repair data is contained in the so-called industry aggregate data compiled by CCC, Mitchell and AudaExplore – the Information Provider data is, upon information and belief, readily disaggregated and transparent – and all participants are keenly aware of that fact.

c. **Enforcement of Most Favored Nation Provisions in DRP Agreements and Insurer Audits of DRP Facilities**

161. State Farm and Farmers each have most favored nations clauses in their DRP agreements, , requiring that their DRP facilities provide them with the lowest pricing on repairs paid by any insurer.

162. State Farm and Farmers, which together account for approximately 25% of the market, both heavily police and strictly enforce these most favored nation provisions. As described herein, State Farm sends its “Competitive Pricing” contract provisions to its Select Service facilities, and requests that each facility fill in a form advising State Farm of the specific pricing offered or agreed to with any insurer on virtually every aspect of repairs, including, without limitation, all labor rates and “paint and material” pricing.

163. Likewise, upon information and belief, Farmers sends out forms to their DRP facilities, asking for the lowest rates provided to other insurers as part of their DRP networks, including all labor rates and “paint and material” rates, and also asking for the percentage of business that the facility does with each insurer as part of its DRP (although the facility is instructed not to identify the specific insurer by percentage), and all of this information is confirmed in telephone and in-person interviews. Again, even if some or all of this data is not identified by insurer name, Farmers is knowledgeable enough about the market to determine which insurers are represented by the repair data in the pricing response forms from its DRP facilities.

164. In addition, pursuant to the written agreements with their respective DRP facilities, Defendant Insurers all have the right to audit the records of their facilities, which, upon information and belief, on occasion includes the right to review in whole or in part the repair

estimates and compensation paid for repairs by other insurers in connection with the repairs performed by those facilities (and not just the repairs for that particular Defendant Insurer or Conspirator Insurer). Upon further information and belief, Defendant Insurers have exercised their rights and conducted such audits.

d. **Insurer Discussion and Comparison of Repair Costs and Pricing Trends**

165. Upon information and belief, Defendant Insurers engage in regular communications about their prevailing rates and the compensation that is paid to repair facilities. In particular, upon information and belief, State Farm and Allstate, through senior claims personnel – and as directed and/or condoned by company officers – have at times conducted regular “off-the-record” comparisons of repair rates and compensation to repair facilities, in order and thereby gauge and align, for example, labor rates and “paint and materials” reimbursement rates – and, upon information and belief, it is typical in the industry for claims adjusters to compare rates with their counterparts at other insurers.

e. **Additional Communication Between and Among Insurers and their Conspirators**

166. In addition, Defendant Insurers regularly communicate about repair estimating protocol and compensation to repair facilities at various industry meetings and conferences which occur throughout the year, sponsored by Information Providers, industry organizations and the like. By way of example, CCC, Mitchell and AudaExplore all sponsor conferences which are attended by “industry stakeholders”, including Defendant Insurers, as do manufacturers and vendors like LKQ (the largest aftermarket parts manufacturer and distributor) at its “Insurance Client Forum” and VeriFacts Automotive (the largest quality verification and technician assessment provider) at its “VeriFacts Symposium”.

167. At each of these conferences, there are seminars, presentations and open discussions concerning, among other things, repair estimating methodologies, repair protocols and, most importantly, cost containment, including past and current pricing and severity data, as well as future trends and implementation of costs-savings measures. Upon information and belief, additional discussions about these subjects occur between and among Defendant Insurers – and their business partners – at these conferences. Upon information and belief, personnel for Defendant Insurers and the Information Providers often move between the two. Notably, for example, AudaExplore presently employs former officer and executive level personnel from Defendant Insurers in advisory and consulting positions, including State Farm, Allstate and Progressive.

168. Further, there are numerous organizations, such as I-CAR, a national company engaged in, among other things, the training, development and certification of collision repair facilities and professionals, which involve the participation of the Defendant Insurers, repair facilities and industry vendors. For example, the Executive Committee for I-CAR includes executives from Allstate (through Esurance), State Farm, Tech-Cor (Allstate's training and testing facility), Liberty Mutual and a large owner-operator of collision repair facilities, among others. Upon further information and belief, discussions likewise occur between and among Defendant Insurers and their vendors concerning the subjects at issue in this action in the context of their participation in organizations such as I-CAR.

169. As a result of all of the foregoing, Defendant Insurers, which comprise approximately two-thirds of the auto insurance market in the United States and, upon information and belief, account for and control approximately two-thirds of the market for insured collision repairs, are able to fix and maintain prevailing rates for hourly labor rates and

“paint and materials” reimbursement across the country through their individual claims adjustment practices concerning payment for collision repairs.. As a result, repair compensation to Plaintiffs and the Classes has been – and remains –artificially suppressed.

V. RICO ALLEGATIONS

170. Defendants Allstate, GEICO, Progressive, Farmers, Liberty Mutual and Nationwide, together with the respective Information Providers with which they have a standing relationship, have each formed separate association-in-fact enterprises within the meaning of 18 U.S.C. § 1961(4). Thus, Allstate has formed an association-in-fact enterprise with CCC (the “Allstate Enterprise”), GEICO has formed an association-in-fact enterprise with CCC (the “GEICO Enterprise”), Farmers has formed an association-in-fact enterprise with CCC (the “Farmers Enterprise”), Progressive has formed an association-in-fact enterprise with Mitchell (the “Progressive Enterprise”), Liberty Mutual has formed an association-in-fact enterprise with AudaExplore and CCC (the “Liberty Mutual Enterprise”), and Nationwide has formed an association-in-fact enterprise with CCC (the “Nationwide Enterprise”).

171. In addition, defendant State Farm has formed an association-in-fact enterprise within the meaning of 18 U.S.C. § 1961(4), comprised of State Farm, its respective Select Service facilities around the country, Mitchell and AudaExplore (the “State Farm Enterprise”).

172. For ease of reference, the foregoing association-in-fact enterprises will sometimes be referred to collectively herein as the “RICO Enterprises”.

A. Standing, Causation and Injury

173. Plaintiffs and the members of the respective classes defined below (“Classes”) are each “persons” within the meaning of 18 U.S.C. §§ 1961(3) and 1964(c).

174. Defendant Insurers (State Farm, Allstate, GEICO, Progressive, Farmers, Liberty Mutual and Nationwide) are each “persons” within the meaning of 18 U.S.C. § 1961(3).

175. Plaintiffs and each member of the Classes have sustained injury to business or property as a result of the Defendant Insurers’ acts as alleged herein. The injury to Plaintiffs and the members of the Classes is under-compensation for collision repair work and services on vehicles covered by insurance, including the suppression of hourly labor rates, suppression of compensation for “paint and materials”, suppression of compensation for parts, and suppression of compensation for the time, scope and extent of the repair procedures performed.

176. But for Defendant Insurers’ wrongful conduct, Plaintiffs and the members of the Classes would have received more in compensation and would not have suffered injury.

177. The loss in compensation suffered by Plaintiffs and the members of the Classes was proximately caused by Defendant Insurers, in that their fraudulent conduct was a direct and substantial factor in bringing about their injuries.

178. Plaintiffs and the members of the Classes were the victims directly injured by Defendant Insurers’ fraudulent and extortionate conduct. Artificial suppression of compensation for labor rates, the cost of “paint and materials” and parts, and repair procedures is an injury suffered by repair facilities rather than insureds and vehicle owners, who have received the full benefit of the repairs to their vehicles.

179. Alternatively, Plaintiffs and the members of the Classes were injured as a direct and proximate consequence of Defendant Insurers’ misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants concerning the Defendant Insurers’ obligation to indemnify and pay for the repairs necessary and warranted to restore vehicles to their pre-loss or pre-damaged condition, as well as their misrepresentations and

omissions of material fact to first party policyholders and third party insurance claimants regarding the repairs services performed by Plaintiffs and the members of the Classes covered by, and/or in connection with, the first party and third party insurance claims.

180. The injuries caused by Defendant Insurers are the result of the conduct of the respective association-in-fact RICO Enterprises through a pattern of racketeering activity.

181. Plaintiffs and the members of the Classes were paid compensation by Defendant Insurers for their repair work and services predicated on material misrepresentations and omissions concerning prevailing rates, market values and industry standards as described herein and/or Defendant Insurers' extortionate conduct, and Plaintiffs and the members of the Classes would not have accepted the suppressed compensation for repair work and services, i.e., being paid less for their repair work and services, but for Defendant Insurers' conduct.

182. The injuries sustained by Plaintiffs and the members of the Classes were caused by overt acts in furtherance of the Defendant Insurers' respective conspiracies in violation of 18 U.S.C. § 1962(c), including the misrepresentation of the prevailing rates for repairs and the artificial suppression of compensation for repair work and services performed on vehicles covered by Defendant Insurers, as well as Defendant Insurers' extortionate conduct.

B. The RICO Enterprises

183. As described below each of the RICO Enterprises has an ascertainable structure separate and distinct from the members of the enterprise. In addition, the pattern of racketeering activity of each enterprise is separate and apart from the business conducted by the members of each enterprise.

184. Defendant Insurers conducted the respective enterprises through a pattern of racketeering activity by fraudulently establishing and misrepresenting the prevailing rate for

collision repairs to vehicles covered by insurance, including: (1) hourly labor rates; (2) reimbursement for “paint and materials”; (3) the time, scope and extent of compensable repairs; and (4) parts prices.

185. As a direct and proximate result of the fraudulent conduct, Defendant Insurers were able to and did suppress compensation for collision repair work and services to repair facilities that were not part of the respective Defendant Insurers’ DRP networks, and repair facilities that were not part of the respective Defendant Insurers’ DRP networks were paid less than they otherwise would have been paid but for Defendant Insurers’ conduct.

186. Each enterprise has: (i) a purpose; (ii) relationships among those associated with the enterprise; and (iii) longevity sufficient to permit the associates to pursue the enterprise’s purpose.

1. Purpose of the RICO Enterprises

187. The respective RICO Enterprises are continuous, ongoing organizations associated for the common purpose of: (1) establishing and promulgating the prevailing rate for damage repairs to vehicles covered by the respective Defendant Insurers, including (a) hourly labor rates; (b) reimbursement for “paint and materials”; (c) the time, scope and extent of compensable repair procedures; and (d) parts prices; and (2) establishing and promulgating the standards for damage appraisal and repair, including the time, scope and extent of repairs and the manner in which the repairs are to be performed and accomplished.

188. Neither the Defendants Insurers nor their Information Provider conspirators could effectuate or accomplish the purposes of the respective RICO Enterprises without the sharing of data and collaboration between and among them, as described herein. Defendant Insurers control the compensation to the collision repair industry, which is based on the industry

prevailing rates and repair standards promulgated by the Information Providers, which, in turn, derives, in large part, from Defendant Insurers' fixed prevailing rates and the estimating standards and guidelines set in collaboration or consultation with the insurers. The Defendant Insurers and Information Providers benefit from the respective RICO Enterprises, which enable Defendant Insurers to artificially suppress compensation for collision repairs, and which also enable the Information Providers to maintain their position as the exclusive sellers and suppliers of data and estimating programs to the collision repair industry, including the very repair facilities like Plaintiffs and the members of the classes which utilize and depend on the Information Provider programs and data to perform repairs

189. Further, the RICO Enterprises have respectively engaged in a pattern of racketeering activity by falsely establishing and representing the prevailing rates for collision repairs, as well as the standards for damage repair, including the time, scope and extent of repairs and the manner in which the repairs are to be performed and accomplished, and, as a result of that racketeering activity, compensation to repair facilities, including Plaintiffs and the members of the Classes that are not part of each Defendant Insurer's DRP network, has been artificially suppressed.

2. Relationships Among the Associates in the RICO Enterprises

190. Each of the respective RICO Enterprises has an existence and structure distinct from its members. All of the Defendant Insurers are separate corporate entities, as are the Information Providers. And, with respect to the State Farm Enterprise, the State Farm Select Service facilities likewise are separate and distinct from State Farm.

191. Further, each member of the respective RICO Enterprises has an existence separate and apart from the pattern of racketeering activities of the RICO Enterprises, and each

member of the respective RICO Enterprises engages in operations that are distinct from their activities on behalf of the RICO Enterprises. Defendant Insurers all issue automotive insurance – as well as other lines of insurance. The Information Providers not only license and/or sell product packages to insurers and repair facilities, including, without limitation, programs to prepare estimates for vehicle damage repairs as well as claims and operational management programs, but they also license and/or sell additional analytics programs concerning other types of claims and business. With respect to the State Farm Enterprise, State Farm’s Select Service facilities are engaged in the business of performing automotive repairs for insured and non-insured vehicles.

192. However, as described above and herein, each member of the respective RICO Enterprises is reliant and dependent upon the other member(s), and each is essential to the operation of the RICO Enterprises in establishing, promulgating and representing repair rates and standards. Further, each member of the RICO Enterprises has conducted or participated in the affairs of the RICO Enterprises, directly or indirectly, has facilitated the unlawful racketeering activities of the RICO Enterprises, and has a well-defined role in the RICO Enterprises.

193. Further, as it concerns each of the respective Defendant Insurers and their affiliates, each has company-wide, systematic and uniform claims management practices, and operates as a single, integrated enterprise for claims adjustment and administration purposes, including, without limitation, the conduct and subject matter at issue in this action. For example, with respect to Plaintiffs’ repairs compensated by Defendant Insurers, the repair estimates and supplements prepared by Defendant Insurers are created using centralized, systematic programs, and bear the name of the parent or simply a generic reference to the insurer: “State Farm Insurance Companies” or “State Farm”; “Nationwide Insurance Company” or “Nationwide”;

“GEICO”; “Progressive”, and the claims personnel on all of the claims operate out of the parent company under company-wide protocol. Further, payments for repairs are frequently made by parent companies, even if affiliates are the insurer on the first-party or third-party claims for which the repairs are performed. (*See* Exhibits K, M)

194. Specifically, the GEICO claims include those under GEICO General Ins. Co., GEICO Indemnity Ins. Co., GEICO Casualty Co. and GEICO General Ins. Co., but the claims estimates are all written as GEICO, by GEICO adjusters. The Allstate claims involve Allstate Ins. Co., Allstate Fire & Casualty, Allstate Property & Casualty Co., and Allstate Fire & Casualty Co., but the estimates are Allstate and frequently with Allstate personnel. Farmers claims involve 21st Century Indemnity Ins. Co. and Mid-Century Ins. Co., but the payments are made by Farmers – at least as payee, and all claims personnel are with Farmers – and specifically, Farmers central claims services unit hpcs.com. Liberty Mutual claims involve Liberty Mutual Ins. Co., with payment by Liberty Mutual and claims personnel estimates from Liberty Mutual, Safeco Ins. Co. with payment and claims estimates by Ohio Casualty/Liberty Mutual, and American States Ins. Co. with payment and claims estimates by Safeco. Nationwide claims estimates are written under “Nationwide Enterprise”, and paid variously by “Nationwide Insurance”, or on other occasions, insured by Nationwide Affinity Ins. Co. and paid by Nationwide Ins. Co. of America and/or insured and paid by Nationwide Mutual Ins. Co. Progressive claims are written by “Progressive” claims adjustment personnel, and variously insured and/or paid by Progressive Advanced Ins. Co., Progressive Specialty Ins. Co. and Progressive Direct Ins. Co. State Farm claims are written by “State Farm Insurance Companies” and adjusted by “State Farm” personnel, and paid and/or insured by State Farm Mutual Automobile Ins. Co. *Id.*

a. The Allstate Enterprise

195. With respect to the Allstate Enterprise, Allstate, in collaboration with CCC, establishes and maintains artificial prevailing rates and standards for repairs, including, without limitation: (1) hourly labor rates; (2) reimbursement for “paint and materials”; (3) the time, scope and extent of compensable repair procedures; and (4) parts prices. These prevailing rates were and are established through pre-determined arrangements with Allstate’s network of DRP facilities, which have agreed to abide by Allstate’s prevailing rates, estimating profile with CCC, and company estimating protocol, as well as CCC’s estimating program that Allstate is able to exploit in promulgating the time, scope and extent of compensable repair procedures, based on, among other things, the manner in which the CCC estimating program is written and designed, as well as CCC’s determination of labor times and procedures as described above. The repair estimates prepared by Allstate’s DRP facilities, as well as those prepared by Allstate for its DRP facilities or for repairs performed by non-Allstate DRP facilities, serve as the industry repair data maintained by Allstate’s Information Provider, CCC, upon which the purported prevailing rates are based.

196. When negotiating or dealing with non-Allstate DRP facilities that are performing repairs on vehicles covered by Allstate insurance, Allstate represents that deviations in hourly labor rates, reimbursement for “paint and materials”, the time, scope and extent of compensable repair procedures that are contained in non-Allstate DRP repair estimates, and/or parts prices, do not constitute the prevailing rates in the industry and/or that no other repair facilities (in Allstate’s artificially drawn geographic regions) charge the hourly labor rates, reimbursement rates for “paint and materials”, for the time, scope and extent of compensable repair procedures, and/or the parts prices in question. In addition, Allstate conceals the foundation and basis for the

purported prevailing rates and the manner in which such prevailing rates are determined and maintained, in forcing and coercing non-Allstate DRP facilities to accept artificially suppressed compensation for the repairs performed.

197. CCC aggregates, maintains and provides data that it promulgates as representative of industry prevailing rates for hourly labor rates, reimbursement for “paint and materials” and parts prices. In addition, to make their estimating program more amenable to insurer exploitation, CCC: (i) reports time studies supporting designated labor times that are outdated, incomplete or improperly extrapolated to procedures involving unrelated vehicles, parts and equipment; (ii) re-works time studies so that CCC is able to report results that are satisfactory to Allstate (and other insurers) (i.e., results which reduce the labor times designated for repair procedures); (iii) bundles numerous repair procedures and tasks to significantly understate the labor time necessary to perform the procedures in a professional and competent manner; (iv) imposes formulas for calculating labor times for procedures that are arbitrary and understated, which do not reflect the labor time necessary to perform the procedures in a professional and competent manner; (v) collapses and combines procedures to achieve greater overlap to reduce labor times and costs in repair estimates; and (vi) commonly shifts necessary repair procedures to “Not Included” or discretionary categories, enabling Allstate (and other insurers) to avoid compensating repair facilities for their work as unnecessary or not competitive.

198. Further, CCC has written its estimating program so that any time a labor time is changed or a procedure is added per the program or manually input as a “Not Included” or based on the repairer’s judgment, those entries are highlighted for audit by Allstate (and other insurers).

199. Notwithstanding its position as industry-neutral and the independent guidepost of collision estimating, CCC scrubs repair estimates for Allstate, providing them the means to misrepresent and/or conceal fair compensation for collision repairs by non-DRP facilities.

200. Accordingly, CCC was and is a vital participant in the Allstate Enterprise, without which the scheme and acts of racketeering could not be accomplished.

b. The GEICO Enterprise

201. With respect to the GEICO Enterprise, GEICO, in collaboration with CCC, establishes and maintains artificial prevailing rates and standards for repairs, including, without limitation: (1) hourly labor rates; (2) reimbursement for “paint and materials”; (3) the time, scope and extent of compensable repair procedures; and (4) parts prices. These prevailing rates were and are established through pre-determined arrangements with GEICO’s network of DRP facilities, which have agreed to abide by GEICO’s prevailing rates, estimating profile and company estimating protocol, as well as CCC’s estimating program that GEICO is able to exploit in promulgating the time, scope and extent of compensable repair procedures, based on, among other things, the manner in which the CCC estimating program is written and designed, as well as CCC’s determination of labor times and procedures as described above. The repair estimates prepared by GEICO’s DRP facilities, as well as those prepared by GEICO for its DRP facilities or for repairs performed by non-GEICO DRP facilities, serve as the industry repair data maintained by GEICO’s Information Provider, CCC, upon which the purported prevailing rates are based.

202. When negotiating or dealing with non-GEICO DRP facilities that are performing repairs on vehicles covered by GEICO insurance, GEICO represents that deviations in hourly labor rates, reimbursement for “paint and materials”, the time, scope and extent of compensable

repair procedures, and/or parts prices, do not constitute the prevailing rates in the industry and/or that no other repair facilities (in GEICO's artificially drawn geographic regions) charge the hourly labor rates, reimbursement rates for "paint and materials", for the time, scope and extent of compensable repair procedures, and/or the parts prices in question. In addition, GEICO conceals the foundation and basis for the purported prevailing rates and the manner in which such prevailing rates are determined and maintained, in forcing and coercing non-GEICO DRP facilities to accept artificially suppressed compensation for the repairs performed.

203. CCC aggregates, maintains and provides data that it promulgates as representative of industry prevailing rates for hourly labor rates, reimbursement for "paint and materials" and parts prices. In addition, to make their estimating program more amenable to insurer exploitation, CCC: (i) reports time studies supporting designated labor times that are outdated, incomplete or improperly extrapolated to procedures involving unrelated vehicles, parts and equipment; (ii) re-works time studies so that CCC is able to report results that are satisfactory to GEICO (and other insurers) (i.e., results which reduce the labor times designated for repair procedures); (iii) bundles numerous repair procedures and tasks to significantly understate the labor time necessary to perform the procedures in a professional and competent manner; (iv) imposes formulas for calculating labor times for procedures that are arbitrary and understated, which do not reflect the labor time necessary to perform the procedures in a professional and competent manner; (v) collapses and combines procedures to achieve greater overlap to reduce labor times and costs in repair estimates; and (vi) commonly shifts necessary repair procedures to "Not Included" or discretionary categories, enabling GEICO (and other insurers) to avoid compensating repair facilities for their work as unnecessary or not competitive.

204. Further, CCC has written its estimating program so that any time a labor time is changed or a procedure is added per the program or manually input as a “Not Included” or based on the repairer’s judgment, those entries are highlighted for audit by GEICO (and other insurers).

205. Notwithstanding its position as industry-neutral and the independent guidepost of collision estimating, CCC scrubs repair estimates for GEICO, providing them the means to misrepresent and/or conceal fair compensation for collision repairs by non-DRP facilities.

206. Accordingly, CCC was and is a vital participant in the GEICO Enterprise, without which the scheme and acts of racketeering could not be accomplished.

c. The Progressive Enterprise

207. With respect to the Progressive Enterprise, Progressive, in collaboration with Mitchell, establishes and maintains artificial prevailing rates and standards for repairs, including, without limitation: (1) hourly labor rates; (2) reimbursement for “paint and materials”; (3) the time, scope and extent of compensable repair procedures; and (4) parts prices. These prevailing rates were and are established through pre-determined arrangements with Progressive network of DRP facilities, which have agreed to abide by Progressive’s prevailing rates, estimating profile and company estimating protocol, as well as Mitchell’s estimating program that Progressive is able to exploit in promulgating the time, scope and extent of compensable repair procedures, based on, among other things, the manner in which the Mitchell estimating program is written and designed, as well as Mitchell’s determination of labor times and procedures as described above. The repair estimates prepared by Progressive’s DRP facilities, as well as those prepared by Progressive for its DRP facilities or for repairs performed by non- Progressive DRP facilities, serve as the industry repair data maintained by Progressive’s Information Provider, Mitchell, upon which the purported prevailing rates are based.

208. When negotiating or dealing with non-Progressive DRP facilities that are performing repairs on vehicles covered by Progressive insurance, Progressive represents that any deviation in hourly labor rates, reimbursement for “paint and materials”, the time, scope and extent of compensable repair procedures, and/or parts prices do not constitute the prevailing rates in the industry, and/or that no other repair facilities (in Progressive’s artificially drawn geographic regions) charge the hourly labor rates, reimbursement rates for “paint and materials”, for the time, scope and extent of compensable repair procedures, and/or parts prices in question. In addition, Progressive conceals the foundation and basis for the purported prevailing rates and the manner in which such prevailing rates are determined and maintained, in forcing and coercing non- Progressive DRP facilities to accept artificially suppressed compensation for the repairs performed.

209. Mitchell aggregates, maintains and provides data that it promulgates as representative of industry prevailing rates for hourly labor rates, reimbursement for “paint and materials” and parts prices. In addition, to make their estimating program more amenable to insurer exploitation, Mitchell: (i) reports time studies supporting designated labor times that are outdated, incomplete or improperly extrapolated to procedures involving unrelated vehicles, parts and equipment; (ii) re-works time studies so that Mitchell is able to report results that are satisfactory to Progressive (and other insurers) (i.e., results which reduce the labor times designated for repair procedures); (iii) bundles numerous repair procedures and tasks to significantly understate the labor time necessary to perform the procedures in a professional and competent manner; (iv) imposes formulas for calculating labor times for procedures that are arbitrary and understated, which do not reflect the labor time necessary to perform the procedures in a professional and competent manner; (v) collapses and combines procedures to

achieve greater overlap to reduce labor times and costs in repair estimates; and (vi) commonly shifts necessary repair procedures to “Not Included” or discretionary categories, enabling Progressive (and other insurers) to avoid compensating repair facilities for their work as unnecessary or not competitive.

210. Further, Mitchell has written its estimating program so that any time a labor time is changed or a procedure is added per the program or manually input as a “Not Included” or based on the repairer’s judgment, those entries are highlighted for audit by Progressive (and other insurers).

211. Notwithstanding its position as industry-neutral and the independent guidepost of collision estimating, Mitchell scrubs repair estimates for Progressive, providing them the means to misrepresent and/or conceal fair compensation for collision repairs by non-DRP facilities.

212. Accordingly, Mitchell was and is a vital participant in the Progressive Enterprise, without which the scheme and acts of racketeering could not be accomplished.

d. The Farmers Enterprise

213. With respect to the Farmers Enterprise, Farmers, in collaboration with CCC, establishes and maintains artificial prevailing rates and standards for repairs, including, without limitation: (1) hourly labor rates; (2) reimbursement for “paint and materials”; (3) the time, scope and extent of compensable repair procedures; and (4) parts prices. These prevailing rates were and are established through pre-determined arrangements with Farmers’ network of DRP facilities, which have agreed to abide by Farmers’ prevailing rates, estimating profile and company estimating protocol, as well as CCC’s estimating program that Farmers is able to exploit in promulgating the time, scope and extent of compensable repair procedures, based on, among other things, the manner in which the CCC estimating program is written and designed,

as well as CCC's determination of labor times and procedures as described above. The repair estimates prepared by Farmers' DRP facilities, as well as those prepared by Farmers for its DRP facilities or for repairs performed by non-Farmers DRP facilities, serve as the industry repair data maintained by Farmers' Information Provider, CCC, upon which the purported prevailing rates are based.

214. When negotiating or dealing with non-Farmers DRP facilities that are performing repairs on vehicles covered by Farmers insurance, Farmers represents that deviations in hourly labor rates, reimbursement for "paint and materials", the time, scope and extent of compensable repair procedures, and/or parts prices do not constitute the prevailing rates in the industry, and/or that no other repair facilities (in Farmers' artificially drawn geographic regions) charge the hourly labor rates, reimbursement rates for "paint and materials", for the time, scope and extent of compensable repair procedures, and/or parts prices in question. In addition, Farmers conceals the foundation and basis for the purported prevailing rates and the manner in which such prevailing rates are determined and maintained, in forcing and coercing non-Farmers DRP facilities to accept artificially suppressed compensation for the repairs performed.

215. CCC aggregates, maintains and provides data that it promulgates as representative of industry prevailing rates for hourly labor rates, reimbursement for "paint and materials" and parts prices. In addition, to make their estimating program more amenable to insurer exploitation, CCC: (i) reports time studies supporting designated labor times that are outdated, incomplete or improperly extrapolated to procedures involving unrelated vehicles, parts and equipment; (ii) re-works time studies so that CCC is able to report results that are satisfactory to Farmers (and other insurers) (i.e., results which reduce the labor times designated for repair procedures); (iii) bundles numerous repair procedures and tasks to significantly understate the

labor time necessary to perform the procedures in a professional and competent manner; (iv) imposes formulas for calculating labor times for procedures that are arbitrary and understated, which do not reflect the labor time necessary to perform the procedures in a professional and competent manner; (v) collapses and combines procedures to achieve greater overlap to reduce labor times and costs in repair estimates; and (vi) commonly shifts necessary repair procedures to “Not Included” or discretionary categories, enabling Farmers (and other insurers) to avoid compensating repair facilities for their work as unnecessary or not competitive.

216. Further, CCC has written its estimating program so that any time a labor time is changed or a procedure is added per the program or manually input as a “Not Included” or based on the repairer’s judgment, those entries are highlighted for audit by Farmers (and other insurers).

217. Notwithstanding its position as industry-neutral and the independent guidepost of collision estimating, CCC scrubs repair estimates for Allstate, providing them the means to misrepresent and/or conceal fair compensation for collision repairs by non-DRP facilities.

218. Accordingly, CCC was and is a vital participant in the Farmers Enterprise, without which the scheme and acts of racketeering could not be accomplished.

e. **The Liberty Mutual Enterprise**

219. With respect to the Liberty Mutual Enterprise, Liberty Mutual, in collaboration with AudaExplore and, at certain material times with respect to Safeco collision repair claims, CCC, establishes and maintains artificial prevailing rates and standards for repairs, including, without limitation: (1) hourly labor rates; (2) reimbursement for “paint and materials”; (3) the time, scope and extent of compensable repair procedures; and (4) parts prices. These prevailing rates were and are established through pre-determined arrangements with Liberty Mutual’s

network of DRP facilities, which have agreed to abide by Liberty Mutual's prevailing rates, estimating profile and company estimating protocol, as well as AudaExplore's estimating program (and, as it concerns Safeco, CCC's estimating program), that Liberty Mutual is able to exploit in promulgating the time, scope and extent of compensable repair procedures, based on, among other things, the manner in which the AudaExplore and CCC estimating programs are written and designed, as well as AudaExplore's and CCC's determination of labor times and procedures as described above. The repair estimates prepared by Liberty Mutual's DRP facilities, as well as those prepared by Liberty Mutual for its DRP facilities or for repairs performed by non-Liberty Mutual DRP facilities, serve as the industry repair data maintained by Liberty Mutual's Information Providers, AudaExplore and CCC, upon which the purported prevailing rates are based.

220. When negotiating or dealing with non-Liberty Mutual DRP facilities that are performing repairs on vehicles covered by Liberty Mutual insurance, Liberty Mutual represents that deviations in hourly labor rates, reimbursement for "paint and materials", the time, scope and extent of compensable repair procedures, and/or parts prices do not constitute the prevailing rates in the industry, and/or that no other repair facilities (in Liberty Mutual's artificially drawn geographic regions) charge the hourly labor rates, reimbursement rates for "paint and materials", for the time, scope and extent of compensable repair procedures, and/or the parts prices in question. In addition, Liberty Mutual conceals the foundation and basis for the purported prevailing rates and the manner in which such prevailing rates are determined and maintained, in forcing and coercing non-Liberty Mutual DRP facilities to accept artificially suppressed compensation for the repairs performed.

221. AudaExplore and CCC aggregate, maintain and provide data that they promulgate as representative of industry prevailing rates for hourly labor rates, reimbursement for “paint and materials” and parts prices. In addition, to make their estimating programs more amenable to insurer exploitation, AudaExplore and CCC: (i) report time studies supporting designated labor times that are outdated, incomplete or improperly extrapolated to procedures involving unrelated vehicles, parts and equipment; (ii) re-work time studies so that AudaExplore and CCC are able to report results that are satisfactory to Liberty Mutual (and other insurers) (i.e., results which reduce the labor times designated for repair procedures); (iii) bundles numerous repair procedures and tasks to significantly understate the labor time necessary to perform the procedures in a professional and competent manner; (iv) imposes formulas for calculating labor times for procedures that are arbitrary and understated, which do not reflect the labor time necessary to perform the procedures in a professional and competent manner; (v) collapses and combines procedures to achieve greater overlap to reduce labor times and costs in repair estimates; and (vi) commonly shifts necessary repair procedures to “Not Included” or discretionary categories, enabling Liberty Mutual (and other insurers) to avoid compensating repair facilities for their work as unnecessary or not competitive.

222. Further, AudaExplore and CCC have written their estimating programs so that any time a labor time is changed or a procedure is added per the program or manually input as a “Not Included” or based on the repairer’s judgment, those entries are highlighted for audit by Liberty Mutual (and other insurers).

223. Notwithstanding their position as industry-neutral and as independent guideposts of collision estimating, Audatex and CCC scrub repair estimates for Liberty Mutual (including

Safeco), providing them the means to misrepresent and/or conceal fair compensation for collision repairs by non-DRP facilities.

224. Accordingly, AudaExplore and CCC were and are vital participants in the Liberty Mutual Enterprise, without which the scheme and acts of racketeering could not be accomplished.

f. The Nationwide Enterprise

225. With respect to the Nationwide Enterprise, Nationwide, in collaboration with CCC, establishes and maintains artificial prevailing rates and standards for repairs, including, without limitation: (1) hourly labor rates; (2) reimbursement for “paint and materials”; (3) the time, scope and extent of compensable repair procedures; and (4) parts prices. These prevailing rates were and are established through pre-determined arrangements with Nationwide’s network of DRP facilities, which have agreed to abide by Nationwide’s prevailing rates, estimating profile and company estimating protocol, as well as CCC’s estimating program that Nationwide is able to exploit in promulgating the time, scope and extent of compensable repair procedures, based on, among other things, the manner in which the CCC estimating program is written and designed, as well as CCC’s determination of labor times and procedures as described above. The repair estimates prepared by Nationwide’s DRP facilities, as well as those prepared by Nationwide for its DRP facilities or for repairs performed by non-Nationwide DRP facilities, serve as the industry repair data maintained by Nationwide’s Information Provider, CCC, upon which the purported prevailing rates are based.

226. When negotiating or dealing with non-Nationwide DRP facilities that are performing repairs on vehicles covered by Nationwide insurance, Nationwide represents that deviations in hourly labor rates, reimbursement for “paint and materials”, the time, scope and

extent of compensable repair procedures, and/or parts prices do not constitute the prevailing rates in the industry, and/or that no other repair facilities (in Nationwide's artificially drawn geographic regions) charge the hourly labor rates, reimbursement rates for "paint and materials", for the time, scope and extent of compensable repair procedures, and/or parts prices in question. In addition, Nationwide conceals the foundation and basis for the purported prevailing rates and the manner in which such prevailing rates are determined and maintained, in forcing and coercing non-Nationwide DRP facilities to accept artificially suppressed compensation for the repairs performed.

227. CCC aggregates, maintains and provides data that it promulgates as representative of industry prevailing rates for hourly labor rates and reimbursement for "paint and materials". In addition, to make their estimating program more amenable to insurer exploitation, CCC: (i) reports time studies supporting designated labor times that are outdated, incomplete or improperly extrapolated to procedures involving unrelated vehicles, parts and equipment; (ii) re-works time studies so that CCC is able to report results that are satisfactory to Farmers (and other insurers) (i.e., results which reduce the labor times designated for repair procedures); (iii) bundles numerous repair procedures and tasks to significantly understate the labor time necessary to perform the procedures in a professional and competent manner; (iv) imposes formulas for calculating labor times for procedures that are arbitrary and understated, which do not reflect the labor time necessary to perform the procedures in a professional and competent manner; (v) collapses and combines procedures to achieve greater overlap to reduce labor times and costs in repair estimates; and (vi) commonly shifts necessary repair procedures to "Not Included" or discretionary categories, enabling Nationwide (and other insurers) to avoid compensating repair facilities for their work as unnecessary or not competitive.

228. Further, CCC has written its estimating program so that any time a labor time is changed or a procedure is added per the program or manually input as a “Not Included” or based on the repairer’s judgment, those entries are highlighted for audit by Nationwide (and other insurers).

229. Notwithstanding its position as industry-neutral and the independent guidepost of collision estimating, CCC scrubs repair estimates for Nationwide, providing them the means to misrepresent and/or conceal fair compensation for collision repairs by non-DRP facilities.

230. Accordingly, CCC was and is a vital participant in the Nationwide Enterprise, without which the scheme and acts of racketeering could not be accomplished.

g. The State Farm Enterprise

231. Defendant State Farm, given its position as the largest auto insurer in the industry, is able to influence cost control even further by imposing additional mechanisms on its DRP network to suppress repair rates, which, in turn, provides the foundation for what State Farm establishes as purported industry prevailing rates and imposes upon repair facilities like Plaintiffs, which are not part of the State Farm DRP.

232. State Farm has the largest DRP network in the industry, consisting of more than 10,000 repair facilities nationwide. Given that there is a total of approximately 30,000 - 40,000 repair facilities in the United States, State Farm has one-quarter or more of all repair facilities in its nationwide DRP network. State Farm formally launched its DRP network in or about 2000 or 2001. Initially called “Service First”, State Farm’s DRP network became known as “Select Service” in or about 2006. All Select Service network facilities enter into a uniform written contract with State Farm (a true and accurate exemplar of which is attached as Exhibit “D”), agreeing to abide by State Farm’s repair mandates and, most importantly, the cost control

measures that State Farm implements for repairs to vehicles covered by its insurance, as well as State Farm's estimating profile and company protocol to limit and restrict compensation for repairs. Further, upon information and belief, Select Service facilities must agree that between 20% - 25% of their repairs are dedicated to State Farm work. Accordingly, by design, Select Service facilities are financially beholden and reliant on State Farm. In addition to its strict enforcement of DRP agreements and its financial pressure, State Farm relies upon several other methods to control its Select Service facilities and their compensation for repairs, which enables State Farm to suppress compensation to all facilities (DRP and non-DRP alike) that perform collision repairs under State Farm insurance and, by extension, impact suppression of compensation to the entire collision repair industry.

Most Favored Nation Provision

233. Beginning with the inception of the Select Service program in 2006, State Farm instituted a most favored nation provision into its uniform DRP agreements ("State Farm MFN"), by which State Farm ensures the benefit of paying the lowest prices on all aspects of repairs that Select Service facilities charge to – or are paid by – any other insurer. The State Farm MFN clause permits State Farm to control repair pricing and rates, as well as the usage and pricing of parts. *See Exhibit J.*

234. The State Farm MFN is heavily policed and strictly enforced. Upon information and belief, Select Service facilities are under a "one-strike" rule, meaning that any instance of a violation is cause for removal from the Select Service program.

235. Indeed, State Farm sends its so-called "Competitive Pricing" contract provisions to its Select Service facilities, reminding the facilities of their obligations to provide State Farm

with lowest rates on virtually all aspects of repairs, and enclosing a form for the facility to fill out detailing the lowest pricing offered or agreed to with any insurer.

236. Even when State Farm does adjust, for example, labor rates or “paint and materials” reimbursement rates, Select Service facilities are still required to provide State Farm with the lowest rates paid by any other insurer – and State Farm is only required to pay those lower rates. Thus, State Farm enjoys the benefits of the lowest rates in the industry by agreement with its Select Service facilities, which further maintains the suppression of State Farm’s purported prevailing rates.

RPM Reports

237. State Farm also coerces and intimidates its Select Service facilities so that they will keep severity, i.e., State Farm’s repair costs, as low as possible. To achieve this end, State Farm developed “Repairer Performance Management” reports (“RPM reports”), which, according to State Farm, provide information to each facility about their performance on the Select Service program. The RPM reports detail the average costs associated with the repairs performed for State Farm by each repair Select Service facility, and the primary metric is the average dollar amount of the repair estimate(s) for each repair. The RPM reports issue both a performance score, as well as a percentile ranking for each repair facility, to advise the facility of where it stands in relation to other repairers on the program. The higher the facility’s average repair estimate (i.e., repair cost) is, the lower its ranking on the Select Service program.

238. As an initial matter, it is questionable whether there is any statistical validity to the so-called key performance indicators that are contained in the RPM reports. Upon information and belief, the RPM reports are merely State Farm’s method to coerce Select Service facilities to take whatever means necessary – irrespective of the quality or comprehensiveness of

the required repairs – to keep severity low. If a facility substantially or consistently underperforms, i.e., fails to keep its severity (repair costs) down or in a range acceptable to State Farm, that facility will not get repair referrals from State Farm and/or the facility will simply be removed from the Select Service program.

State Farm Survey

239. State Farm is further able to control its claim costs – and suppress compensation to repair facilities – through its so-called survey process, which State Farm uses to establish its prevailing rates for, among other things: (1) labor; (2) “paint and materials” reimbursement; and (3) parts. State Farm mandates that its Select Service facilities participate in an on-line survey to provide rate information for repairs that they perform for State Farm. Participation by non-Select Service facilities is voluntary and, upon information and belief, approximately only 10%-20% of non-Select Service facilities participate in the State Farm survey. Accordingly, like the prevailing rate data that is generally established through the Information Providers by the other Defendant Insurers, State Farm’s survey process yields results that are heavily weighted and skewed toward rates provided by Select Service (DRP) facilities, which rates are pre-determined based on the DRP agreements executed with State Farm, and then, as with the other Defendant Insurers, the rates are run through AudaExplore and Mitchell and then promulgated as the prevailing rates by which compensation for collision repairs are paid.

240. In addition, as with the prevailing rate data established by other Defendant Insurers through the Information Providers, State Farm uses geographic regions or areas that it defines to set the prevailing rates for repair facilities in those regions. These regions are configured to enable State Farm to further suppress rates. Again, there is no foundation to

compare and coordinate rates among the facilities given that the level, quality and location of the repair facilities that State Farm incorporates into each defined region varies.

241. The State Farm survey requests that the facilities provide pricing information concerning State Farm customer repairs, including the charge for labor rates, as well as parts prices and discounts. In addition, the survey asks whether the repair facility uses a paint materials calculator to seek reimbursement for “paint and materials”.

242. The State Farm survey process is not representative of the prevailing rate for repairs. First, the survey calls for hourly labor rates that the repair facility would charge State Farm for repairs, not what the repair facility considers the actual fair market rate. Further, Select Service facilities are constrained in their reporting by the most favored nation provision in the DRP agreements, which requires the facility to sell repair services to State Farm at the lowest rates that any insurer pays.

243. Second, State Farm is well aware that the survey process does not accurately depict the market because, in addition to the fact that it is heavily weighted toward Select Service facilities, aged responses are not deleted. Thus, the survey results incorporate responses from facilities that have not been updated because the repair facilities have not participated in the survey every year or because the facilities are no longer in business.

244. Third, State Farm contends that the survey represents rates charged by “a majority of the market”, but this is misleading. Rather than take into account or measure the quality of the repairs performed by the facilities or the level of equipment, training and certification of the facility, State Farm simply puts the reported rates in ascending order, starting with the facilities reporting the *lowest* rates. Then, to determine what constitutes the “majority” of the market area for prevailing rate purposes, State Farm determines the total number of technicians and work

stalls for the facilities participating in the survey (rather than the total for all facilities in the market area under review), and once the number of technicians and stalls exceeds 50% of the response total, State Farm deems the reported rates at that level to be the prevailing rate. Thus, not only does State Farm's survey fail to capture a large segment of the rates charged by repair facilities in particular market areas, State Farm is also intentionally skewing the results to the lower reported rates, rendering the survey invalid under any statistical methodology, because the higher reported rates are not taken into account in determining the prevailing rate. So, for example, if the labor rates for the facilities above the artificial 50% demarcation line that State Farm uses to determine the "majority" are reported as \$60 per hour, while the facilities below that line all report labor rates as \$30 per hour (or less), the \$60 per hour labor rates will not be accounted for in State Farm's so-called prevailing rate. Significantly, State Farm refuses to disclose the results of its surveys – and the responses – to repair facilities that do question the methodology and the results.

245. Fourth, State Farm manipulates the method of compensation for "paint and materials". Numerous shops use paint materials calculators or cost invoicing methodologies to establish amounts owed for "paint and materials" because, as discussed herein, the artificial "dollar per paint hour" that State Farm (and all other Defendant Insurers) require as the measure for reimbursement is inaccurate and suppresses compensation to the repair facilities. The State Farm survey asks whether the repair facility uses a paint materials calculator. If the answer is no, the survey requests that the facility enter the "dollar per paint hour" rate that they would charge for State Farm repairs. Again, given that this rate is pre-determined with Select Service facilities, this is nothing more than a feedback loop. If the answer is yes, as has been well documented, State Farm will call each repair facility that responds affirmatively to using a paint

materials calculator to instruct – or strongly suggest – that the facility do a new survey (in its entirety) and report that they do *not* use a paint calculator. Otherwise, State Farm advises, there will be no dollar per paint hour figure counted in the survey for that facility, which further reduces the possibility for an increase in the “dollar per paint hour rate”. Even more egregiously, State Farm advises that it will not recognize and pay based on a paint materials calculator until they are used by a “majority” of the market, which State Farm prevents by demanding that facilities not report the use of paint materials calculators. Thus, State Farm is able to skew and misrepresent the prevailing rate for “paint and materials” reimbursement in two ways through this coercion. One, it is able to represent that use of paint materials calculators is not the prevailing rate (i.e., methodology) for calculating reimbursement for “paint and materials” – even though calculators and other invoicing methods are a more accurate measure of reimbursement. Two, State Farm is able to further dilute – and falsely report – the prevailing rate for “paint and materials” reimbursement predicated on the “dollar per paint hour” because facilities which refuse to change their responses will have no “dollar per paint hour” reported. And, clearly, facilities who are more focused on accurate measurements of reimbursement through paint materials calculators or invoices would be reporting higher “dollar per paint hour figures” in any event. Further, State Farm is only capturing a minimal amount of non-Select Service facilities in its survey responses, and these are the facilities that more often use a paint materials calculators and seek to be paid based on a more accurate methodology – in contrast to Select Service facilities which have agreed (willingly or not) to abide by, and be compensated based on, the “dollar per paint hour”.

246. Fifth, upon information and belief, State Farm has deliberately altered and/or fabricated certain responses by facilities in order to achieve more favorable survey results.

247. State Farm exerts significant pressure on its Select Service facilities, bolstered further by the downward pressure on severity through RPM reports and strict enforcement of the State Farm MFN, and, as a result, State Farm has been able to implement and maintain tight control of suppressed DRP rates. And, these are the rates that dominate the State Farm survey. Accordingly, State Farm's representation that the survey reflects the so-called prevailing rate is false, because it is predicated on a flawed process, skewed by a feedback loop of fixed, pre-determined responses and rates.

248. State Farm is then able to impose these falsely promulgated prevailing rates on non-Select Service facilities like Plaintiffs, thereby artificially suppressing compensation. In addition, notwithstanding the fact that State Farm has configured and defined geographic regions to further enhance its ability to promulgate inaccurate prevailing rates, the conduct – and injury – is the same nationwide, as facilities in all regions have been subjected to the same methods of State Farm's artificial suppression of rates.

249. Predicated on the foregoing and in collaboration with AudaExplore and Mitchell, State Farm establishes and maintains artificial prevailing rates and standards for repairs, including, without limitation: (1) hourly labor rates; (2) reimbursement for “paint and materials”; (3) the time, scope and extent of compensable repair procedures; and (4) parts prices. These prevailing rates were and are established through pre-determined arrangements with State Farm’s Select Service network of facilities, which have agreed to abide by State Farm’s prevailing rates, estimating profile and company estimating protocol, State Farm’s survey process (described above), as well as Mitchell’s and AudaExplore’s estimating programs that State Farm is able to exploit in promulgating the time, scope and extent of compensable repair procedures, based on, among other things, the manner in which the Mitchell and AudaExplore estimating programs are written and designed, as well as Mitchell’s and AudaExplore’s determination of labor times and procedures as described above. The repair estimates prepared by State Farm’s Select Service facilities, as well as those prepared by State Farm for its Select Service facilities or for repairs performed by non-State Farm Select Service facilities, serve as the industry repair data maintained by State Farm’s Information Providers, Mitchell and AudaExplore, upon which the purported prevailing rates are based.

250. When negotiating or dealing with non-State Farm Select Service facilities that are performing repairs on vehicles covered by State Farm insurance, State Farm, predicated on its protocol set forth in Claims Estimating Manual, represents that deviations in hourly labor rates, reimbursement for “paint and materials”, the time, scope and extent of compensable repair procedures, and/or parts prices do not constitute the prevailing rates in the industry, and/or that no other repair facilities (in State Farm’s artificially drawn geographic regions) charge the hourly labor rates, reimbursement rates for “paint and materials” for the time, scope and extent of

compensable repair procedures, and/or parts prices in question. In addition, State Farm conceals the foundation and basis for the purported prevailing rates and the manner in which such prevailing rates are determined and maintained, in forcing and coercing non-State Farm Select Service facilities to accept artificially suppressed compensation for the repairs performed.

251. With respect to State Farm's Information Providers, to make their estimating program more amenable to insurer exploitation, Mitchell and AudaExplore: (i) report time studies supporting designated labor times that are outdated, incomplete or improperly extrapolated to procedures involving unrelated vehicles, parts and equipment; (ii) re-work time studies so that Mitchell and AudaExplore are able to report results that are satisfactory to State Farm (and other insurers) (i.e., results which reduce the labor times designated for repair procedures); (iii) bundle numerous repair procedures and tasks to significantly understate the labor time necessary to perform the procedures in a professional and competent manner; (iv) impose formulas for calculating labor times for procedures that are arbitrary and understated, which do not reflect the labor time necessary to perform the procedures in a professional and competent manner; (v) collapse and combine procedures to achieve greater overlap to reduce labor times and costs in repair estimates; and (vi) commonly shift necessary repair procedures to "Not Included" or discretionary categories, enabling State Farm (and other insurers) to avoid compensating repair facilities for their work as unnecessary or not competitive.¹⁹

252. Further, Mitchell and AudaExplore have written their estimating programs so that any time that a labor time is changed or a procedure is added per the program or manually input

¹⁹ Mitchell and AudaExplore also aggregate, maintain and provide data that they promulgate as representative of industry prevailing rates for hourly labor rates and reimbursement for "paint and materials" (as well as parts prices), but State Farm generally relies upon its survey methodology to establish these prevailing rates.

as a “Not Included” or based on the repairer’s judgment, those entries are highlighted for audit by Nationwide (and other insurers).

253. Notwithstanding their position as industry-neutral and independent guideposts of collision estimating, Mitchell and AudaExplore scrub repair estimates for State Farm (as does CCC now), providing them the means to misrepresent and/or conceal fair compensation for collision repairs by non-DRP facilities.

254. Accordingly, Mitchell and AudaExplore were vital participants in the State Farm Enterprise, without which the scheme and acts of racketeering could not be accomplished.

255. State Farm’s Select Service facilities were and are vital participants in the State Farm Enterprise, without which the scheme and acts of racketeering could not be accomplished. *All* Select Services facilities enter into uniform, written contracts with State Farm – outlining uniform rights and obligations, are required to satisfy the same standards and undergo the same training, utilize the State Farm estimating profile and company estimating protocol, use similar repair methodologies, participate in State Farm’s on-line survey to establish State Farm’s prevailing rates, afford State Farm with the most competitive pricing for all repair compensation, and abide by State Farm’s uniform compensation.

256. State Farm Select Service facilities all understand that they are part of a centralized program by which State Farm has implemented a uniform industry repair protocol for performing repairs and determining compensation. At the same time, each of the Select Service facilities understand the essential nature of the scheme to establish and enforce industry prevailing rates (and estimating protocol) and knowingly agreed to participate – even, assuming that Select Service facilities did so solely because they deemed participating in the program fundamental to their economic survival, and/or because they were intimidated or coerced to do

so. By the same token, as described above, the Select Service facilities are vital to State Farm's establishment and maintenance of its prevailing rates in order to artificially suppress compensation for repairs. Indeed, State Farm Claims Director Russ Hoffbauer, in a broadcast on February 5, 2015 for the Collision Repair Executive Webcast confirmed that Select Service facilities help establish how the field adjuster write their estimates and to inform State Farm on what the marketplace charges are.

h. Conduct of the Members in the RICO Enterprises

257. As described herein, each and every one of the Defendant Insurers conducted or participated, directly or indirectly, in the conduct of the unlawful acts of the respective RICO Enterprises, and each of the members of the respective RICO Enterprises participated, directly or indirectly, in the conduct of the unlawful acts of the respective RICO Enterprises.

258. These acts were taken in furtherance of the unlawful purpose of the respective RICO Enterprises.

3. Continuous Existence of the RICO Enterprises

259. At all material times, the respective RICO Enterprises all had an ongoing and continuous existence sufficient to pursue the purpose of each of the RICO Enterprises.

260. As described herein, in each of the RICO Enterprises, there was interdependence between and/or among the members in pursuing the unlawful purpose of the respective RICO Enterprises, which could not have been accomplished without the participation of each member.

261. Each of the RICO Enterprises has demonstrated a continuity of membership and purpose exceeding a period of two years, which is ongoing and continuing.

262. Further, each member of the respective RICO Enterprises was aware of the purpose of the RICO Enterprises to establish and promulgate prevailing rates and standards for

insured repairs, which were artificially suppressed and resulted in reduced compensation for those repairs.

C. Pattern of Racketeering Activity

263. As it concerns each of the respective RICO Enterprises, Defendant Insurers have all engaged in a “pattern of racketeering activity” as defined by 18 U.S.C. § 1961(5), by committing in the commission of at least two acts of racketeering activity, i.e., indictable violations of 18 U.S.C. § 1343 (wire fraud) and 18 U.S.C. § 1951 (extortion) within at least the past ten years. Indeed, during all material times, Defendant Insurers have committed innumerable acts of racketeering activity, as described herein, including the establishment of artificial prevailing rates for insured repairs and suppressing compensation for those repairs.

264. Further, as it concerns each of the respective RICO Enterprises, all of the racketeering acts were related, had a common purpose, involved the same (or similar) participants, involved the same (or similar) methods for committing the acts, achieved similar results, and impacted similar victims – including Plaintiffs and the members of the respective Classes.

265. The predicate acts of racketeering that Defendant Insurers’ respectively committed were related to each other, pose a threat of continued racketeering activity, and constitute a “pattern of racketeering activity” as defined by 18 U.S.C. § 1961(5).

D. Predicate Acts

266. Pursuant to 18 U.S.C. § 1961(1)(B), “racketeering activity” includes, among other things, any act indictable under 18 U.S.C. § 1343 (relating to wire fraud) and 18 U.S.C. § 1951 (relating to extortion). As described herein, Defendant Insurers have engaged and continued to

engage in conduct violating the foregoing statute in conducting and effectuating their fraudulent schemes.

267. In order to execute the respective schemes to establish and promulgate prevailing rates and standards for insured repairs, including hourly labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts prices, and to artificially suppress compensation and maintain suppressed compensation for those repairs, Defendant Insurers, in violation of 18 U.S.C. § 1343, transmitted and/or received and/or created by, or as the result of, wire, documents, materials and information including, without limitation, repair estimates and repair estimate supplements prepared using CCC, AudaExplore and/or Mitchell estimating programs – which are all internet based, repair estimates and repair estimate supplements exchanged with non-DRP facilities through independent vendors such as Performance Gateway or otherwise, data and other programs, including scrubbers, provided by CCC, AudaExplore and/or Mitchell, estimating profiles with CCC, AudaExplore and/or Mitchell, licensing and other contractual documents exchanged between the respective Defendant Insurers and CCC, AudaExplore and/or Mitchell, DRP agreements exchanged between the respective Defendant Insurers and their DRP facilities, repair assignments from the respective Defendant Insurers to their DRP facilities (and non-DRP facilities) and payments for repairs. In addition, with respect to the State Farm Enterprise, State Farm also transmitted and/or received and/or created by, or as the result of, wire, information through its on-line survey process with Select Service facilities and non-State Farm Select Service facilities, by which it purports to establish prevailing rates for, among other things, hourly labor rates, reimbursement for “paint and materials”, parts prices and certain compensable repair procedures.

268. In order to execute the respective schemes to establish and promulgate prevailing rates and standards for insured repairs, including hourly labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts prices, and to artificially suppress compensation and maintain suppressed compensation for those repairs, Defendant Insurers, in violation of 18 U.S.C. § 1951, interfered with commerce by extorting Plaintiffs and the members of the Classes through wrongful use of fear of economic loss and harm, in that Plaintiffs and the members of the Classes would not be able to perform insured repairs unless they accepted the suppressed compensation paid by Defendant Insurers, that Plaintiffs and the members of the Classes would not be free to pursue their collision repair services without interference, and/or that Defendant Insurers would respectively steer future repairs away from Plaintiffs and the members of the Classes unless they accepted the suppressed compensation paid by Defendant Insurers.

269. Defendant Insurers committed the violations of the aforementioned laws, rendering them indictable, pursuant to 18 U.S.C. § 2, as principals in the offenses of 18 U.S.C. § 1343 and 18 U.S.C. § 1951.

270. Hundreds of occasions on which the Defendant Insurers used wire facilities are outlined herein. The balance of precise dates of Defendant Insurers’ use of the wire facilities cannot be fully alleged without access to and discovery of Defendant Insurers’ records. However, it cannot be reasonably be disputed that Defendant Insurers engaged in thousands, if not millions, of acts in furtherance of their fraudulent scheme with respect to the members of the Classes, including, without limitation:

(1) preparing repair estimates and repair estimate supplements – and causing their DRP facilities to prepare repair estimates and repair estimate supplements – using their respective estimating profiles with CCC, AudaExplore and/or Mitchell and company estimating protocols, which constrained the time, scope and extent of

compensable repair procedures, hourly labor rates, reimbursement for “paint and materials” and/or parts prices;

(2) using CCC, AudaExplore and Mitchell scrubbers – or any independent audit program such as Performance Gateway – to review repair estimates and repair estimate supplements to constrain the time, scope and extent of compensable repair procedures, hourly labor rates, reimbursement for “paint and materials” and/or parts prices;

(3) establishing, promulgating, reporting, and falsely representing the prevailing rates for the time, scope and extent of compensable repair procedures, hourly labor rates, reimbursement for “paint and materials” and/or parts prices, as well as concealing and omitting the invalid bases for these falsified prevailing rates;

(4) entering into agreements with DRP facilities to establish and maintain prevailing rates for the purpose of suppressing compensation for the time, scope and extent of compensable repair procedures, hourly labor rates, reimbursement for “paint and materials” and/or parts prices; and

(5) coercing or forcing Plaintiffs and the members of the Classes to accept suppressed compensation for insured collision repairs under fear that Plaintiffs and the members of the Classes would not be able to perform insured repairs unless they accepted the suppressed compensation paid by Defendant Insurers, that Plaintiffs and the members of the Classes would not be free to pursue their collision repair services without interference, and/or that Defendant Insurers would respectively steer future repairs away from Plaintiffs and the members of the Classes unless they accepted the suppressed compensation paid by Defendant Insurers.

271. Defendant Insurers’ knowing and intentional misrepresentations, concealment and omissions of material facts concerning the prevailing rates were made for the purpose of deceiving Plaintiffs and the members of the Classes to accept artificially suppressed compensation for insured repairs.

272. Defendant Insurers knew or recklessly disregarded the fact that their misrepresentations, concealment and omissions were material, and that non-DRP facilities would incur a loss in the form of suppressed compensation for insured repairs based on their fraudulent conduct in maintaining artificial prevailing rates for insured repairs.

273. Though not necessary to state a violation of the wire fraud statute, Plaintiffs and the members of the Classes relied to their detriment on the material misrepresentations, concealment and omissions concerning the prevailing rates and standards for compensation of insured repairs (in conjunction with the Information Providers), as demonstrated by, among other things, the fact that they accepted suppressed compensation for the insured repairs performed. Plaintiffs and the members of the Classes had no reasonable means of verifying, testing or discovering the accuracy (or lack thereof) of Defendant Insurers' representations of their purported prevailing rates – and standards for compensation of repairs.

274. Not only are Plaintiffs and the members of the Classes not privy to the rates charged by and paid to other repair facilities, or the manner in which rates are determined but, in fact, Defendant Insurers expressly warn repair facilities against rate comparisons, lest they lead to concerted prices. For example, State Farm advises repair facilities: “You should not discuss your rates or prices or consult with any other repair facility when responding to our survey. Any joint understanding or agreement among competing repair facilities concerning pricing constitutes illegal price fixing in violation of antitrust laws and carries substantial civil and criminal penalties. Pricing decisions must be made independently and not in concert or coordination with other repair facilities.”

275. By the same token, Plaintiffs and the members of the Classes were injured as a direct and proximate consequence of Defendant Insurers' misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants concerning the Defendant Insurers' obligation to indemnify and pay for the repairs necessary and warranted to restore vehicles to their pre-loss or pre-damaged condition, as well as their misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants

regarding the repairs services performed by Plaintiffs and the members of the Classes covered by, and/or in connection with, the first party and third party insurance claims.

276. In addition, and alternatively, Plaintiffs and the members of the Classes were coerced or forced to accept suppressed compensation for insured repairs predicated on fear of economic harm, i.e., if the repair facilities wanted to do business with Defendant Insurers. Plaintiffs and the Class members' fear of economic loss and harm, as well as their right to make business decisions free from outside pressure wrongfully imposed, qualify as intangible, property subject to extortion.

277. The value of the services performed by Plaintiffs and the Class Members is also property subject to extortion and something of value that the Defendant Insurers could exercise, transfer, or sell, in that those performed services relieved Defendant Insurers of their obligations to their insureds under the policies.

278. The Defendant Insurers further deprived Plaintiffs and the members of the Classes of their property by requiring that repairs be made in particular repair facilities and steering repair work away from the businesses of Plaintiffs and the Class Members, which constitutes a deprivation of the right to be free from interference with their business under respective states' laws. *See, e.g.*, 31 Pa. Code § 146.8 (b) and (d); 31 Pa. Code § 62.3(b)(3); N.C. Gen. Stat. § 58-3-180(a), (b) and (b1); N.C. Gen. Stat. § 58-33-76 (a).

279. Plaintiffs and the members of the Classes also suffered a loss of business or other injury in that the Defendant Insurers deprived them of their right to be free from interference with their business under respective states' laws, for example by the Defendant Insurers' failure to personally inspect a damaged vehicle when providing a repair estimate. *See* 63 P.S. § 861; 11 NCAC 4.0419. Additionally, the Defendant Insurers interfered with Plaintiffs

and the Class Members' business by not taking into account the operational safety of the vehicle in the specification of new parts, and by requiring or attempting to require Plaintiffs and the Class Members to use aftermarket parts in the repair of motor vehicles that are not at least equal to the original parts in terms of fit, quality, performance and warranty in making their repairs under respective states laws. *See, e.g.*, 63 P.S. § 861, 11 NCAC 4.0426. The rights to operate a business free from interference by the Defendant Insurers and to make business decisions free from outside pressure are additional property rights subject to extortion.

280. Accordingly, Defendant Insurers have withheld money and property belonging to Plaintiffs and the members of the Classes, and Plaintiffs and the members of the Classes have been injured in their business or property by virtue of Defendant Insurers' overt acts of wire fraud and extortion resulting in suppressed compensation for repairs.

E. Interstate Commerce

281. The respective RICO Enterprises engaged in and affected interstate commerce in that the RICO Enterprises involved activities across state boundaries, including, among other things, utilizing the interstate wires to prepare estimates for claim repairs to vehicles covered by insurance, transmitting repair estimates for claim repairs to vehicles covered by insurance, transmitting funds to repair facilities to pay for repairs performed on vehicles covered by insurance, transmitting contracts and written guidelines, instructions and directives to DRP facilities (and non-DRP facilities), and transmitting other forms of business communications and transactions in a continuous and uninterrupted flow of commerce.

VI. PLAINTIFFS' HARM

282. At all material times, Plaintiffs have performed – and continue to perform – collision repair services for vehicles covered and paid by or through each of the Defendant

Insurers. By way of representative example, during the past four years, Plaintiffs have been subjected to the following conduct by the Defendant Insurers, resulting in shortfalls in compensation for collision repairs that have not been recovered.

283. Attached hereto as Exhibit “K” are representative examples – over the years – of Crawford’s shortfalls in compensation on repairs performed performed concerning claims insured by or through each of the Defendant Insurers, which identify the repair order and specific Defendant Insurer claim number, the dates that estimates and estimate supplements – and repair orders and invoices – were prepared, the payments made toward repair compensation, the source of the payment, the total amount due based on Crawford’s repair orders, and outlines in detail the amount and itemization of the shortfall in compensation for repairs in labor times, operations, and labor rates capped by these Defendant Insurers (including all labor and refinishing), as well as paint and body material reimbursement. The labor rates were all below Crawford’s posted rates.²⁰

284. In connection with each repair, Crawford’s presented each Defendant Insurer with repair orders that explicitly detailed the charges for repairs and the basis for those charges. Crawford’s charges for each of the foregoing repairs were based on reasonable rates and costs, as well as reasonable and necessary repair procedures.

285. In connection with each repair performed, Defendant Insurers prepared estimates and estimate supplements that contained the misrepresentations and omissions described herein concerning the compensation for repair rates and procedures. In addition, Defendant Insurers,

²⁰ In addition to the Framers claims resulting in shortfall to Crawford’s on Exhibit K, Farmers and Mid-Century just completed claim no, 3004774244, involving adjuster John Russo, from November and December of this year, on which Farmers paid \$24,566, leaving a shortfall of \$3,730 to Crawford’s , consisting of Farmer’s refusal to recognize labor rates, as well as necessary additional time and repair operations, all under the guise of prevailing rates. *See* Exhibit “L” hereto.

through their personnel who handled the appraisal and adjustment of each of the claims in the representative examples, as well as supervisory personnel, as documented in Defendant Insurers' records, made the misrepresentations and omissions described herein concerning the compensation for repair rates and procedures.

286. In particular, in connection with each of the repairs, Defendant Insurers represented to Crawford's that its charges for the repairs were not in accordance with prevailing rates, including, labor rates, "paint and materials", the time, scope and extent of compensable repair procedures, and parts. . Exhibit K identifies the claims adjuster for the respective Defendant Insurers who made the misrepresentations and/or concealed material information about the particular Defendant Insurer's so-called prevailing rate and controlling market practices, as well as the Defendant Insurer's application of estimating protocol and its Information Provider's scrubbing of Crawford's repair orders, to represent that Crawford's repair charges were not in accord with prevailing rates. Further, the dates of those representations are outlined in Exhibit K. Though Exhibit K outlines in depth the rates, costs, labor times and procedures that each of the Defendant Insurers represent do not conform to the prevailing rate, there are a number of significant items that these Defendant Insurers misrepresent and fail to pay on a regular and consistent basis, as follows: (1) labor rates; (2) adjacent weld damage repair and refinishing; (3) test drive; (4) for specialized measuring equipment; (5) higher than a 2.5 cap on clear coat application; (6) administrative charges; (7) clamp damage repair and refinish; feather, prime and block; (8) specified test fitting for welding; (9) paint materials; and (10) labor materials.

287. In connection with each of the repairs, the shortfall failed to compensate or fully compensate Crawford's.

288. The foregoing examples of Defendant Insurers' shortfall in compensation were the result of their systematic adherence to estimating profiles and company estimating protocol and guidelines, and prevailing rates, in conjunction with the Information Provider scrubbing, notwithstanding that all work, services and charges were required and necessary to perform the repairs in a professionally competent manner and restore the vehicles to the appropriate condition. In each case, Crawford's notified the Defendant Insurers of the total amounts due for repairs but payments from the Defendant Insurers (and any applicable deductible from an insured) resulted in shortfalls of compensation to Crawford's.

289. In addition, Crawford's has been subjected to steering. After signing repair contracts with Crawford's, the vehicle owners were convinced by State Farm and GEICO to move their vehicles based on the Crawford's purported overcharges and practices: State Farm - Dwane M. on June 11, 2013; GEICO - Nancy W. on September 6, 2012; State Farm - Kathy C. on October 10, 2013; State Farm - Yolanda M. on October 8, 2013.

290. Each and all of the Defendant Insurers used the interstate wires, as more fully described herein, to, among other things, create, transmit and receive repair estimates, communications concerning the repairs and/or process payments for the repairs, as well as materials and information to establish, exchange, process and promulgate the prevailing rates, estimating profile and company estimating protocol.

291. As a direct and proximate result of Defendants Insurers' unlawful conduct, Crawford's has suffered harm in the form of lost compensation. Further, none of the shortfall in compensation was paid by any other source, including insureds and/or vehicle owners.

292. Accordingly, Crawford's has standing to assert RICO claims against the Defendant Insurers predicated on Crawford's injury to its business or property by virtue of Defendant Insurers' respective RICO violations.

293. Attached hereto as Exhibit "M" are representative examples – over several years – of K&M's shortfalls in compensation on repairs performed concerning claims insured by or through GEICO, Nationwide and State Farm, which identify the repair order and specific Defendant Insurer claim number, the dates that estimates and estimate supplements – and repair orders and invoices – were prepared, the payments made toward repair compensation, the source of the payment, the total amount due based on K&M's repair orders, and outlines in detail the amount and itemization of the shortfall in compensation for repairs in labor times, operations, and labor rates capped by these Defendant Insurers (including all labor and refinishing), as well as paint and body material reimbursement. The labor rates were all below K&M's posted rates²¹

294. In connection with each repair, K&M presented each Defendant Insurer with repair orders that explicitly detailed the charges for repairs and the basis for those charges. K&M's charges for each of the foregoing repairs were based on reasonable rates and costs, as well as reasonable and necessary repair procedures.

295. In connection with each repair performed, GEICO, Nationwide and State Farm prepared estimates and estimate supplements that contained the misrepresentations and omissions described herein concerning the compensation for repair rates and procedures. In addition, GEICO, Nationwide and State Farm, through their personnel who handled the appraisal

²¹ The dates of the estimates listed in Exhibit MF include estimates and estimate supplements prepared by Defendant Insurers. The dates for the repair orders prepared by K&M are not listed, except for the final date that indicates the total amount due to K&M based on its cumulative repair orders presented to Defendant Insurers ("K&M's Final Invoice").

and adjustment of each of the claims in the representative examples, as well as supervisory personnel, as documented in Defendant Insurers' records, made the misrepresentations and omissions described herein concerning the compensation for repair rates and procedures.

296. In particular, in connection with each of the repairs, GEICO, Nationwide and State Farm represented to K&M that its charges for the repairs were not in accordance with prevailing rates, including, labor rates, "paint and materials", the time, scope and extent of compensable repair procedures, and parts. Exhibit M identifies the claims adjuster for the respective Defendant Insurer who made the misrepresentations and/or concealed material information about the particular Defendant Insurer's so-called prevailing rate and controlling market practices, as well as the Defendant Insurer's application of estimating protocol and its Information Provider's scrubbing of K&M's repair orders, to represent that K&M's repair charges were not in accord with prevailing rates. Further, the dates of those representations are outlined in Exhibit M. Though Exhibit M outlines in depth the rates, costs, labor times and procedures that GEICO, Nationwide and State Farm represent do not conform to the prevailing rate, there are a number of significant items that these Defendant Insurers misrepresent and fail to pay on a regular and consistent basis, as follows: (1) labor rates: body , refinish, mechanical, structural and frame; (2) Mechanical operations as defined by the IPs paid at a body rate; (3) Color, Sand & Buff or De-Nib & Finesse; (4) Prime & Block: Failure to pay or paid as body labor operation, rather as defined in the IP estimating guides as a refinish operation, so that GEICO, Nationwide and State Farm avoid compensation for materials used in the operation; (5) Paint and Body Labor Materials: Refusing to pay K&M's invoices or by paying an artificially suppressed materials rate; (6) Failure to acknowledge when repairs require specialized equipment that only certain facilities in the market possess or have the certification and skill to

use; (7) Pre-wash vehicle and clean vehicle for delivery; and (8) Frame or fixture setup represented and capped at a maximum of 2.0 hours, regardless of manufacturer or vehicle requirements and actual time required, which could also include fixture rental.

297. In connection with each of the repairs, the shortfall failed to compensate or fully compensate K&M.

298. The foregoing examples of GEICO, Nationwide and State Farm's shortfall in compensation were the result of their systematic adherence to estimating profiles and company estimating protocol and guidelines, and prevailing rates, in conjunction with the Information Provider scrubbing, notwithstanding that all work, services and charges were required and necessary to perform the repairs in a professionally competent manner and restore the vehicles to the appropriate condition. In each case, K&M notified GEICO, Nationwide and State Farm of the total amounts due for repairs but payments from GEICO, Nationwide and State Farm (and any applicable deductible from an insured) resulted in shortfalls of compensation to K&M.

299. In addition, Liberty Mutual has engaged in the same conduct set forth herein. Listed on Exhibit M is a repair that resulted in a shortfall from Liberty Mutual in excess of \$5,000. Attached hereto as Exhibit "N" is an email dated December 5, 2013 from K&M to Liberty Mutual outlining in detail the necessary and appropriate repair operations for the vehicle, together with an email response dated December 10, 2013 from Liberty Mutual's representative, advising that the majority of the operations and compensation due was not "fair & reasonable". This is not an isolated example of Liberty Mutual refusing to acknowledge appropriate repairs and compensation, predicated on its estimating protocol in conjunction with Audatex. For example, in 2015, after an exchange of documents with Liberty Mutual again detailing the necessary and appropriate repair procedures, and documenting how the estimating guide did not

account for those procedures automatically and providing VW manufacturer repair specifications, Liberty Mutual responded with in email dated April 15, 2015, making certain minor adjustments to the claim but denying most of the repairs and compensation. A copy of those documents are attached as Exhibit “O”, and highlight the support for the procedures performed. Further, in or about May and June of 2015, K&M repaired a Porsche covered by Liberty Mutual. After once again documenting the repairs through manufacturer specifications and the estimating guides, Liberty Mutual, in an email dated June 2, 2015 advised that there was still a \$3,108.13 difference from K&M’s final estimate, explaining, in pertinent part, that: “The *major difference is the labor allowances from my system to K&M’s. Audatex is the system that is chosen to be used as a basis for our appraisals and I can’t alter the preset times or labor operations allowed in it for a procedure. K&M has provided other documents from various other resources indicating that our system is incorrect, however, I must follow [the system] and not change any preset times to do the procedures. Audatex also takes overlap into consideration as they are added to a repair appraisal.*” A copy of the June 2, 2015 email is attached as Exhibit “P” (emphasis added).

300. In addition, Kevin Youngland, State Farm Estimating Manager, has advised K&M that State Farm will not pay labor rates higher than the purported prevailing rate in K&M’s market – which State Farm has recently modified in order to constrain labor rates, for repairs that conform to manufacturer certification. In particular, on or about December 18, 2015, when informed that K&M was the only VW certified facility in the market with the only equipment certified by VW to make structural repairs to the vehicle, and that VW specifications required the equipment in addition to strict adherence to its processes, Mr. Youngland advised K&M that any labor rates above purported prevailing rate would not be reasonable; stated that other facilities in

the market could perform the repairs at the so-called prevailing rate of \$44 per hour, but would not answer what other facility in the market could perform those repairs; would not agree that the insured was not entitled to know any other facility that could perform those repairs; would not confirm his understanding of VW manufacturer specifications – saying “I don’t repair cars” – or whether manufacturer specifications were reasonable or necessary or would be required to achieve a quality repairs.

301. In a separate conversation with Mr. Youngland on the same day, he advised K&M that State Farm was now as a company going to recognize the feather, prime and block procedure, but that it would be considered a labor operation rather than a refinish operation as outlined in the Information Provider guides because that was “the way it was being charged in the market”; and advised that no refinish material costs associated with the operation would be paid because that was not the way it was treated in the market.

302. K&M has also experienced threats, disparagement and steering by Defendant Insurers. For example, K&M is the only Porsche certified facility their market. In 2014, the only other certified shop in North Carolina was in Raleigh. On May 21, 2014, after being advised that K&M was the only shop that could perform the structural repairs because, among other things, the frame data could only be accessed from Porsche by a certified facility, Pat McGurk, a GEICO claims supervisor, advised GECIO will only pay prevailing market labor rates (again \$44), and if the customer is not satisfied “we’ll tow the vehicle to [another] shop that certified”. When advised that was Raleigh (3 hours away), McGurk said “we’ll be glad to move it Raleigh; we aren’t going to change our labor rates because it’s a Porsche.” K&M asked if the Raleigh shops’ rates were similar to K&M, would they tow it to Atlanta, McGurk replied: “We’ll

make that decision if we need to.” And further, “I’ll move it whatever shop has the equipment, I’m not going to change my labor rates for you.”

303. In connection with Farmers (21st Century Centennial Ins. Co.) claim no 3002402124-1-1, in March, 2015, after signing a repair contract with K&M, Farmers advised the vehicle owner K&M’s charges were not reasonable, and that she would be responsible for the overcharges. K&M lost the repair contract.

304. In addition, in or about December of 2015, Nationwide adjuster Tom Flowers advised the vehicle owner of an Audi, who wanted her vehicle repaired at K&M because they are Audi certified, that K&M “overcharges”, that they are “way more expensive than any other body shop”, and that Nationwide “would not cover the charges” (which were \$600 in additional costs). Likewise, in connection with Allstate claim no, 000316025840B02, in or about February of 2014, adjuster Blair Schreyer advised the vehicle owner that K&M is “the worst body shop in Hickory; nobody gets along with them; [and that they] charge triple what anybody else charges.

305. Each and all of these particular Defendant Insurers used the interstate wires, as more fully described herein, to, among other things, create, transmit and receive repair estimates, engage in communications concerning the repairs and/or process payments for the repairs, share and exchange the estimates, scrub the estimates, and to share the materials and information to establish, exchange, process and promulgate the prevailing rates, estimating profile and company estimating protocol.

306. As a direct and proximate result of Defendants Insurers' unlawful conduct, K&M has suffered harm in the form of lost compensation. Further, none of the shortfall in compensation was paid by any other source, including insureds and/or vehicle owners.²²

307. Accordingly, K&M has standing to assert RICO claims against the Defendant Insurers predicated on K&M's injury to its business or property by virtue of Defendant Insurers' respective RICO violations.

VII. CLASS ACTION ALLEGATIONS

308. Plaintiffs bring this action on behalf of itself and all other similarly situated members of the classes pursuant to Rule 23(a) and (b)(3) of the Federal Rules of Civil Procedure, and seeks certification of the following Classes:

A. The Classes:

1. The State Farm Enterprise Class:

All repair facilities in the United States which, at any time during the period January 1, 2006 through the date that class notice is disseminated: (i) have performed automotive collision repair work or services on or in connection with a vehicle insured by, or covered under insurance issued by, State Farm; (ii) were not at the time of the automotive collision repair work or services a DRP facility for State Farm; (iii) in connection with such work or services, a repair estimate and/or supplement estimate was prepared using a CCC, Mitchell or AudaExplore estimating program; and (iv) were compensated for labor, "paint and materials", parts and/or the time, scope and extent of repair procedures based on a State Farm, prevailing, competitive or industry rate.

2. The Allstate Enterprise Class:

All repair facilities in the United States which, at any time during the period January 1, 2006 through the date that class notice is disseminated: (i) have performed automotive collision repair work or services on or in connection with a vehicle insured by, or covered under insurance issued by, Allstate; (ii) were not at the time of the automotive collision repair work or services a DRP facility for Allstate; (iii) in connection with such work or services, a repair estimate and/or

²² The only exception is the Liberty Mutual claim involving the Porsche, in which the vehicle owners paid the shortfall.

supplement estimate was prepared using a CCC, Mitchell or AudaExplore estimating program; and (iv) were compensated for labor, “paint and materials”, parts and/or the time, scope and extent of repair procedures based on an Allstate, prevailing, competitive or industry rate.

3. The GEICO Enterprise Class:

All repair facilities in the United States which, at any time during the period January 1, 2006 through the date that class notice is disseminated: (i) have performed automotive collision repair work or services on or in connection with a vehicle insured by, or covered under insurance issued by, GEICO; (ii) were not at the time of the automotive collision repair work or services a DRP facility for GEICO; (iii) in connection with such work or services, a repair estimate and/or supplement estimate was prepared using a CCC, Mitchell or AudaExplore estimating program; and (iv) were compensated for labor, “paint and materials”, parts and/or the time, scope and extent of repair procedures based on a GEICO, prevailing, competitive or industry rate.

4. The Progressive Enterprise Class:

All repair facilities in the United States which, at any time during the period January 1, 2006 through the date that class notice is disseminated: (i) have performed automotive collision repair work or services on or in connection with a vehicle insured by, or covered under insurance issued by, Progressive; (ii) were not at the time of the automotive collision repair work or services a DRP facility for Progressive; (iii) in connection with such work or services, a repair estimate and/or supplement estimate was prepared using a CCC, Mitchell or AudaExplore estimating program; and (iv) were compensated for labor, “paint and materials”, parts and/or the time, scope and extent of repair procedures based on a Progressive, prevailing, competitive or industry rate.

5. The Farmers Enterprise Class:

All repair facilities in the United States which, at any time during the period January 1, 2006 through the date that class notice is disseminated: (i) have performed automotive collision repair work or services on or in connection with a vehicle insured by, or covered under insurance issued by, Farmers; (ii) were not at the time of the automotive collision repair work or services a DRP facility for Farmers; (iii) in connection with such work or services, a repair estimate and/or supplement estimate was prepared using a CCC, Mitchell or AudaExplore estimating program; and (iv) were compensated for labor, “paint and materials”, parts and/or the time, scope and extent of repair procedures based on a Farmers, prevailing, competitive or industry rate.

6. The Liberty Mutual Enterprise Class:

All repair facilities in the United States which, at any time during the period January 1, 2006 through the date that class notice is disseminated: (i) have performed automotive collision repair work or services on or in connection with a vehicle insured by, or covered under insurance issued by, Liberty Mutual; (ii) were not at the time of the automotive collision repair work or services a DRP facility for Liberty Mutual; (iii) in connection with such work or services, a repair estimate and/or supplement estimate was prepared using a CCC, Mitchell or AudaExplore estimating program; and (iv) were compensated for labor, “paint and materials”, parts and/or the time, scope and extent of repair procedures based on a Liberty Mutual, prevailing, competitive or industry rate.

7. The Nationwide Enterprise Class:

All repair facilities in the United States which, at any time during the period January 1, 2006 through the date that class notice is disseminated: (i) have performed automotive collision repair work or services on or in connection with a vehicle insured by, or covered under insurance issued by, Nationwide; (ii) were not at the time of the automotive collision repair work or services a DRP facility for Nationwide; (iii) in connection with such work or services, a repair estimate and/or supplement estimate was prepared using a CCC, Mitchell or AudaExplore estimating program; and (iv) were compensated for labor, “paint and materials”, parts and/or the time, scope and extent of repair procedures based on a Nationwide, prevailing, competitive or industry rate.

309. Excluded from the Classes are Defendants and Conspirators, their officers, directors, management, employees, subsidiaries, and affiliates.

310. Members of the Classes, respectively, are reasonably estimated to be in the thousands or tens of thousands and, therefore, are so numerous that joinder is impracticable. Further, the identity and precise number of the members of the Classes, respectively, is reasonably ascertainable through the respective records of Defendant Insurers.

311. Questions of law and fact common to the members of the respective Classes, respectively, predominate over questions, if any, that may affect only individual members of the Classes, because Defendant Insurers have acted on grounds generally applicable to the respective

Classes and/or have engaged in uniform, systematic conduct with respect to members of the respective Classes.

312. Questions of law and fact common to the Classes include, without limitation:
- a. whether Defendant Insurers, respectively, engaged in deceptive schemes to establish artificial prevailing rates, and misrepresent and conceal material facts about the prevailing rates for: (i) labor rates; (ii) “paint and materials” reimbursement”; (iii) parts prices; and/or (iv) the time, scope and extent of compensable repair procedures;
 - b. whether Defendant Insurers, respectively, engaged in deceptive schemes to suppress compensation to repair facilities, including: (i) labor rates; (ii) “paint and materials” reimbursement”; (iii) parts prices; and/or (iv) the time, scope and extent of compensable repair procedures;
 - c. whether Defendants Insurers, respectively, prepared repair estimates and repair estimate supplements – and caused their DRP facilities to prepare repair estimates and repair estimate supplements – using their respective estimating profiles with CCC, AudaExplore and/or Mitchell and company estimating protocols, which constrained the time, scope and extent of compensable repair procedures, hourly labor rates, reimbursement for “paint and materials” and/or parts prices;
 - d. whether Defendant Insurers and the Information Providers, respectively, scrubbed repair estimates and repair estimate supplements to constrain the time, scope and extent of compensable repair procedures, hourly labor rates, reimbursement for “paint and materials” and/or parts prices;
 - e. whether Defendant Insurers, respectively, entered into agreements with DRP facilities to establish and maintain prevailing rates for the purpose of, and/or which had the effect of, suppressing compensation for the time, scope and extent of compensable repair procedures, hourly labor rates, reimbursement for “paint and materials” and/or parts prices;
 - f. whether Defendant Insurers, respectively, coerced or forced the members of the Classes to accept suppressed compensation for insured collision repairs under fear that they would not be able to perform insured collision repairs presently or in the future, or if they wanted to do business with Defendant Insurers, or if they wanted to be free from interference to their business;

- g. whether Defendant Insurers, respectively, interfered with, steered or withheld business as part of their unlawful pattern and practice of conduct;
- h. whether (with respect to the State Farm Enterprise Class) State Farm's survey process falsely establishes and/or misrepresents prevailing rates;
- i. whether, as a result of conduct of the respective Defendant Insurers, and the collaboration with the respective Information Providers, the CCC, Mitchell and/or AudaExplore estimating programs are impacted, influenced or tainted by: (i) time studies supporting designated labor times that are outdated, incomplete or improperly extrapolated to procedures involving unrelated vehicles, parts and equipment; (ii) re-worked time studies enabling the Information providers to report results that are satisfactory to insurers (i.e., results which reduce the labor times designated for repair procedures); (iii) bundling numerous repair procedures and tasks to significantly understate the labor time necessary to perform the procedures in a professional and competent manner; (iv) imposing formulas for calculating labor times for procedures that are arbitrary and understated, which do not reflect the labor time necessary to perform the procedures in a professional and competent manner; (v) collapsing and combining procedures to achieve greater overlap to reduce labor times and costs in repair estimates; and/or (vi) shifting necessary repair procedures to "Not Included" or discretionary categories, enabling insurers to avoid compensating repair facilities for their work as unnecessary or not competitive
- j. whether Defendant Insurers, respectively, engaged in wire fraud and/or extortion;
- k. whether Defendant Insurers, respectively, engaged in a pattern of racketeering;
- l. whether the alleged respective RICO Enterprises are "enterprises" within the meaning of 18 U.S.C. § 1961(4);
- m. whether Defendant Insurers, and each of them, conducted or participated in the affairs of the respective RICO Enterprises through a pattern of racketeering activity in violation of 18 U.S.C. § 1962(c);
- n. whether Defendant Insurers, respectively, fraudulently concealed their conduct.
- o. whether, as a result of Defendant Insurers' respective unlawful conduct, Plaintiffs and the Classes received less in compensation for collision repair services for: (i) labor rates; (ii) "paint and materials" reimbursement"; (iii)

parts prices; and/or (iv) the time, scope and extent of compensable repair procedures;

- p. the difference between the compensation that Plaintiffs and the members of the Classes received from insured collision repair services, and the compensation that Plaintiffs and the members of the Classes would have received in the absence of the unlawful conduct and effect of the respective RICO Enterprises;
- q. whether Defendant Insurers, respectively, have been unjustly enriched as a result of their conduct.
- r. whether Plaintiffs and the members of the Classes are entitled to monetary damages; and
- s. the measure of damages suffered by Plaintiffs and the Classes;

313. Plaintiffs' claims are typical of the claims of the members of the respective Classes. Plaintiffs and the members of the Classes were damaged by, and as a result of, the same wrongful conduct by Defendant Insurers, *i.e.*, they received less in compensation for insured collision repair services.

314. Plaintiffs will fairly and adequately protect and represent the interests of the Classes. Plaintiffs' interests are aligned with, and not antagonistic to, those of the Classes.

315. Plaintiffs are represented by counsel who are experienced and competent in the prosecution of class action litigation, and have particular experience with class action RICO litigation.

316. Class action treatment is a superior method for the fair and efficient adjudication of the controversy. Among other things, class treatment will permit a large number of similarly situated entities and persons to prosecute their common claims in a single forum simultaneously, efficiently, and without the duplication of evidence, effort, and expense that numerous individual actions would engender. The benefits of proceeding through the class mechanism, including providing injured persons or entities with a method for obtaining redress on claims that it might

not be practicable to pursue individually, substantially outweigh any difficulties that may arise in management of this class action.

317. Plaintiffs know of no difficulty to be encountered in the maintenance of this action that would preclude its maintenance as a class action.

VIII. FRAUDULENT CONCEALMENT

318. Each Defendant Insurer (and Conspirator) concealed from Plaintiffs and the members of the Classes the fraudulent conduct establishing artificial prevailing rates for insured repairs and suppressing compensation for those repairs. Each Defendant Insurer (and Conspirator) prevented Plaintiffs and the members of the Classes from knowing or discovering the methods by which the artificial prevailing rates for insured repairs were established and by which compensation for those repairs was suppressed.

319. The efforts by each Defendant Insurer (and Conspirator) to conceal the aforementioned were designed to avoid detection, and were and are indicative of the fact that they knew that the conduct was fraudulent.

320. Each Defendant Insurer (and Conspirator) participated in the unlawful conduct to establish artificial prevailing rates for repairs – as described herein – and, thus, each Defendant Insurer (and Conspirator) knew of the harm that was caused by the unlawful conduct in suppressing compensation for repairs.

321. Plaintiffs did not know, nor could reasonably have known, that they sustained injuries caused by Defendant Insurers' respective uniform policies, patterns and practices as described herein. Further, the facts necessary to establish Plaintiffs' claims alleged herein were intentionally concealed from Plaintiffs, which concealment was for the purpose of obtaining delay on the Plaintiffs' part in filing a complaint predicate on the claims.

IX. TOLLING OF APPLICABLE STATUTES OF INFORMATION

322. Any applicable statutes of limitation have been tolled by the knowing and active concealment of the facts alleged herein by Defendant Insurers (and the Conspirators). Plaintiffs and the members of the Classes were unaware of the facts alleged herein without any fault of lack of diligence on their part, and could not have reasonably discovered the fraudulent scheme to establish artificial prevailing rates for insured repairs and suppress compensation for those repairs.

323. Based on their knowing, affirmative and/or active concealment of the fraudulent nature of the scheme to establish artificial prevailing rates for insured repairs and suppress compensation for those repairs, Defendant Insurers (and the Conspirators) are estopped from relying on any applicable statutes of limitation.

X. CLAIMS FOR RELIEF

COUNT I

**(Violation of the Racketeer Influenced and Corrupt Organization Act,
18 U.S.C. §§ 1962(c) and (d))
(Against Defendant State Farm Predicated on the State Farm Enterprise)**

324. Plaintiffs incorporate and reallege all of the allegations contained in the preceding paragraphs 1- 194 and 231-323 as though fully set forth herein. This claim is brought by Plaintiffs and the State Farm Enterprise Class against Defendant State Farm.

325. Defendant State Farm is and at all relevant times was a “person” within the meaning of 18 U.S.C. § 1961(3), because it was “capable of holding a legal or beneficial interest in property.”

326. Defendant State Farm, as described herein, carried out a scheme to defraud and extort Plaintiffs and the State Farm Enterprise Class members by conducting an “enterprise” within the meaning of 18 U.S.C. § 1961(4).

327. At all relevant times, the State Farm Enterprise was engaged in, and its activities affected, interstate commerce within the meaning of 18 U.S.C. § 1962(c).

328. By virtue of the conduct alleged herein, Defendant State Farm, in violation of 18 U.S.C. § 1962(c), conducted and participated in the conduct of the State Farm Enterprise’s affairs, directly and indirectly, through a “pattern of racketeering activity,” as defined in 18 U.S.C. § 1961(5).

329. Defendant State Farm, as described herein, has committed numerous predicate acts of “racketeering activity”, as defined in 18 U.S.C. § 1961(5), prior to and during the class period, and continued to commit such predicate acts, in furtherance of Defendant State Farm’s scheme to establish artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts, and to suppress compensation and maintain suppressed compensation for those repairs, including wire fraud, in violation of 18 U.S.C. § 1343 and extortion in violation of 18 U.S.C. § 1951.

330. In furtherance of its scheme, Defendant State Farm, in violation of 18 U.S.C. §§ 1343, 1951, 1961 and 1962, regularly and repeatedly used the interstate wires to further all aspects of the intentional suppression of compensation to Plaintiffs and the State Farm Enterprise Class members by transmitting and/or receiving materials necessary to carry out the scheme to defraud and extort.

331. These communications were incident to and an essential part of Defendant State Farm’s scheme to defraud and extort as described herein.

332. Each such use of the U.S. interstate wire facilities alleged herein constituted a separate and distinct predicate act of “racketeering activity” and collectively, constitutes a “pattern of racketeering activity”.

333. The State Farm Enterprise was and is engaged in a common purpose which enabled Defendant State Farm to establish artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts, and to suppress compensation and maintain suppressed compensation for those repairs. As described herein, each member of the State Farm Enterprise (i.e., State Farm, its network of Select Service facilities, Mitchell and AudaExplore) is necessary and essential to the function and success of the State Farm Enterprise, and the State Farm Enterprise occurred over the course of a number of years, and continues to occur, enabling the pursuit of the common scheme and purpose to defraud. Further, the “pattern of racketeering activity” is related because it involves common persons, common practices, common results impacting common victims, and is continuous because it occurred over the course of a number of years, constitutes and promotes the common purpose of the State Farm Enterprise, such that it poses a threat of continued racketeering activity. Defendant State Farm’s scheme to defraud and extort Plaintiffs and the State Farm Enterprise Class members is open-ended and ongoing.

334. To the extent deemed required, Plaintiffs and the State Farm Enterprise Class members relied, to their detriment, on Defendant State Farm’s fraudulent misrepresentations and omissions as described herein. Reliance by Plaintiffs and the class is evidenced by the compensation that they accepted – and were coerced, forced and/or required to accept – for their collision repair services. Plaintiffs and the members of the State Farm Enterprise Class had no

reasonable means of verifying, testing or discovering the accuracy (or lack thereof) of State Farm's representations of their purported prevailing rates.

335. Defendant State Farm knew that Plaintiffs and the State Farm Enterprise Class members relied on their misrepresentations and omissions about prevailing rates and compensation for repairs and knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the State Farm Enterprise Class would – and did – receive less in compensation for collision repair services.

336. The direct and intended victims of the pattern of racketeering activity are Plaintiffs and the State Farm Enterprise Class members.

337. Alternatively, Plaintiffs and the members of the State Farm Enterprise Class were injured as a direct and proximate consequence of State Farm's misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants concerning State Farm's obligation to indemnify and pay for the repairs necessary and warranted to restore vehicles to their pre-loss or pre-damaged condition, as well as their misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants regarding the repairs services performed by Plaintiffs and the members of the State Farm Enterprise Class covered by, and/or in connection with, the first party and third party insurance claims. Further, State Farm knew that first party policyholders and third party claimants relied on State Farm's misrepresentations and omissions about prevailing rates and compensation for repairs and State Farm knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the State Farm Enterprise Class would – and did – receive less in compensation for collision repair services.

338. The injuries in the form of suppressed compensation for collision repair services sustained by Plaintiffs and the State Farm Enterprise Class members were directly and proximately caused by Defendant State Farm's racketeering activity and RICO violations, which injuries were the foreseeable, direct, intended and natural consequence of Defendant State Farm's conduct. But for Defendant State Farm's racketeering activity and RICO violations, Plaintiffs and the State Farm Enterprise Class members would not have suffered these injuries.

339. 18 U.S.C. § 1962(d) provides, in pertinent part, that: "It shall be unlawful for any person to conspire to violate any of the provisions of subsection ...(c) of this section."

340. In violation of 18 U.S.C. § 1962(d), Defendant State Farm conspired to defraud and extort the Plaintiffs and the State Farm Enterprise Class members for their money and property by establishing artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for "paint and materials", compensable repair procedures, and parts, and suppressing compensation and maintaining suppressed compensation for those repairs. This conspiracy to violate 18 U.S.C. § 1962(c) constitutes a violation of 18 U.S.C. § 1962(d).

341. In furtherance of the conspiracy, Defendant State Farm agreed to conduct or participate in the affairs of the State Farm Enterprise and agreed to commit at least two of the predicate acts described above.

342. As a result and by reason of the foregoing, Plaintiffs and the State Farm Enterprise Class members have been injured, suffered harm and sustained damage to the business and property, and, pursuant to 18 U.S.C. § 1964(c), are therefore entitled to recover actual and treble damages, as well as their costs of suit and reasonable attorneys' fees, and all other appropriate relief.

COUNT II

**(Violation of the Racketeer Influenced and Corrupt Organization Act,
18 U.S.C. §§ 1962(c) and (d))
(Against Defendant Allstate Predicated on the Allstate Enterprise)**

343. Plaintiffs incorporate and reallege all of the allegations contained in the preceding paragraphs 1-200 and 257-323 as though fully set forth herein. This claim is brought by Plaintiffs and the Allstate Enterprise Class against Defendant Allstate.

344. Defendant Allstate is and at all relevant times was a “person” within the meaning of 18 U.S.C. § 1961(3), because it was “capable of holding a legal or beneficial interest in property.”

345. Defendant Allstate, as described herein, carried out a scheme to defraud and extort Plaintiffs and the Allstate Enterprise Class members by conducting an “enterprise” within the meaning of 18 U.S.C. § 1961(4).

346. At all relevant times, the Allstate Enterprise was engaged in, and its activities affected, interstate commerce within the meaning of 18 U.S.C. § 1962(c).

347. By virtue of the conduct alleged herein, Defendant Allstate, in violation of 18 U.S.C. § 1962(c), conducted and participated in the conduct of the Allstate Enterprise’s affairs, directly and indirectly, through a “pattern of racketeering activity,” as defined in 18 U.S.C. § 1961(5).

348. Defendant Allstate, as described herein, has committed numerous predicate acts of “racketeering activity”, as defined in 18 U.S.C. § 1961(5), prior to and during the class period, and continued to commit such predicate acts, in furtherance of Defendant Allstate’s scheme to establish artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts, and to

suppress compensation and maintain suppressed compensation for those repairs, including wire fraud, in violation of 18 U.S.C. § 1343 and extortion, in violation of 18 U.S.C. § 1951.

349. In furtherance of its scheme, Defendant Allstate, in violation of 18 U.S.C. §§ 1343, 1951, 1961 and 1962, regularly and repeatedly used the interstate wires to further all aspects of the intentional suppression of compensation to Plaintiffs and the Allstate Enterprise Class members by transmitting and/or receiving materials necessary to carry out the scheme to defraud and extort.

350. These communications were incident to and an essential part of Defendant Allstate's scheme to defraud and extort as described herein.

351. Each such use of the U.S. interstate wire facilities alleged herein constituted a separate and distinct predicate act of "racketeering activity" and collectively, constitutes a "pattern of racketeering activity".

352. The Allstate Enterprise was and is engaged in a common purpose which enabled Defendant Allstate to establish artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for "paint and materials", compensable repair procedures, and parts, and to suppress compensation and maintain suppressed compensation for those repairs. As described herein, each member of the Allstate Enterprise (i.e., Allstate and CCC) is necessary and essential to the function and success of the Allstate Enterprise, and the Allstate Enterprise occurred over the course of a number of years, and continues to occur, enabling the pursuit of the common scheme and purpose to defraud. Further, the "pattern of racketeering activity" is related because it involves common persons, common practices, common results impacting common victims, and is continuous because it occurred over the course of a number of years, constitutes and promotes the common purpose of the Allstate Enterprise, such that it poses a threat of

continued racketeering activity. Defendant Allstate's scheme to defraud and extort Plaintiffs and the Allstate Enterprise Class members is open-ended and ongoing.

353. To the extent deemed required, Plaintiffs and the Allstate Enterprise Class members relied, to their detriment, on Defendant Allstate's fraudulent misrepresentations and omissions as described herein. Reliance by Plaintiffs and the Allstate Enterprise Class is evidenced by the compensation that they accepted – and were coerced, forced and/or required to accept – for their collision repair services. Plaintiffs and the members of the Allstate Enterprise Class had no reasonable means of verifying, testing or discovering the accuracy (or lack thereof) of Allstate's representations of their purported prevailing rates.

354. Defendant Allstate knew that Plaintiffs and the Allstate Enterprise Class members relied on their misrepresentations and omissions about prevailing rates and compensation for repairs and knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the Allstate Enterprise Class would – and did – receive less in compensation for collision repair services.

355. The direct and intended victims of the pattern of racketeering activity are Plaintiffs and the Allstate Enterprise Class members.

356. Alternatively, Plaintiffs and the members of the Allstate Enterprise Class were injured as a direct and proximate consequence of Allstate's misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants concerning Allstate's obligation to indemnify and pay for the repairs necessary and warranted to restore vehicles to their pre-loss or pre-damaged condition, as well as their misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants regarding the repairs

services performed by Plaintiffs and the members of the Allstate Enterprise Class covered by, and/or in connection with, the first party and third party insurance claims.

357. Further, Allstate knew that first party policyholders and third party claimants relied on Allstate misrepresentations and omissions about prevailing rates and compensation for repairs and Allstate knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the Allstate Enterprise Class would – and did – receive less in compensation for collision repair services.

358. The injuries in the form of suppressed compensation for collision repair services sustained by Plaintiffs and the Allstate Enterprise Class members were directly and proximately caused by Defendant Allstate’s racketeering activity and RICO violations, which injuries were the foreseeable, direct, intended and natural consequence of Defendant Allstate’s conduct. But for Defendant Allstate’s racketeering activity and RICO violations, Plaintiffs and the Allstate Enterprise Class members would not have suffered these injuries.

359. 18 U.S.C. § 1962(d) provides, in pertinent part, that: “It shall be unlawful for any person to conspire to violate any of the provisions of subsection ...(c) of this section.”

360. In violation of 18 U.S.C. § 1962(d), Defendant Allstate conspired to defraud and extort the Plaintiffs and the Allstate Enterprise Class members for their money and property by establishing artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts, and suppressing compensation and maintaining suppressed compensation for those repairs. This conspiracy to violate 18 U.S.C. § 1962(c) constitutes a violation of 18 U.S.C. § 1962(d).

361. In furtherance of the conspiracy, Defendant Allstate agreed to conduct or participate in the affairs of the Allstate Enterprise and agreed to commit at least two of the predicate acts described above.

362. As a result and by reason of the foregoing, Plaintiffs and the Allstate Enterprise Class members have been injured, suffered harm and sustained damage to the business and property, and, pursuant to 18 U.S.C. § 1964(c), are therefore entitled to recover actual and treble damages, as well as their costs of suit and reasonable attorneys' fees, and all other appropriate relief.

COUNT III

**(Violation of the Racketeer Influenced and Corrupt Organization Act,
18 U.S.C. §§ 1962(c) and (d))
(Against Defendant GEICO Predicated on the GEICO Enterprise)**

363. Plaintiffs incorporate and reallege all of the allegations contained in the preceding paragraphs 1-194, 201-206, and 257-323 as though fully set forth herein. This claim is brought by Plaintiffs and the GEICO Enterprise Class against Defendant GEICO.

364. Defendant GEICO is and at all relevant times was a "person" within the meaning of 18 U.S.C. § 1961(3), because it was "capable of holding a legal or beneficial interest in property."

365. Defendant GEICO, as described herein, carried out a scheme to defraud and extort Plaintiffs and the GEICO Enterprise Class members by conducting an "enterprise" within the meaning of 18 U.S.C. § 1961(4).

366. At all relevant times, the GEICO Enterprise was engaged in, and its activities affected, interstate commerce within the meaning of 18 U.S.C. § 1962(c).

367. By virtue of the conduct alleged herein, Defendant GEICO, in violation of 18 U.S.C. § 1962(c), conducted and participated in the conduct of the GEICO Enterprise's affairs, directly and indirectly, through a "pattern of racketeering activity," as defined in 18 U.S.C. § 1961(5).

368. Defendant GEICO, as described herein, has committed numerous predicate acts of "racketeering activity", as defined in 18 U.S.C. § 1961(5), prior to and during the class period, and continued to commit such predicate acts, in furtherance of Defendant GEICO's scheme to establish artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for "paint and materials", compensable repair procedures, and parts, and to suppress compensation and maintain suppressed compensation for those repairs, including wire fraud, in violation of 18 U.S.C. § 1343 and extortion, in violation of 18 U.S.C. § 1951.

369. In furtherance of its scheme, Defendant GEICO, in violation of 18 U.S.C. §§ 1343, 1951, 1961 and 1962, regularly and repeatedly used the interstate wires to further all aspects of the intentional suppression of compensation to Plaintiffs and the GEICO Enterprise Class members by transmitting and/or receiving materials necessary to carry out the scheme to defraud and extort.

370. These communications were incident to and an essential part of Defendant GEICO's scheme to defraud and extort as described herein.

371. Each such use of the U.S. interstate wire facilities alleged herein constituted a separate and distinct predicate act of "racketeering activity" and collectively, constitutes a "pattern of racketeering activity".

372. The GEICO Enterprise was and is engaged in a common purpose which enabled Defendant GEICO to establish artificial prevailing rates for insured repairs, including hourly

labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts, and to suppress compensation and maintain suppressed compensation for those repairs. As described herein, each member of the GEICO Enterprise (i.e., GEICO and CCC) is necessary and essential to the function and success of the GEICO Enterprise, and the GEICO Enterprise occurred over the course of a number of years, and continues to occur, enabling the pursuit of the common scheme and purpose to defraud. Further, the “pattern of racketeering activity” is related because it involves common persons, common practices, common results impacting common victims, and is continuous because it occurred over the course of a number of years, constitutes and promotes the common purpose of the GEICO Enterprise, such that it poses a threat of continued racketeering activity. Defendant GEICO’s scheme to defraud and extort Plaintiffs and the GEICO Enterprise Class members is open-ended and ongoing.

373. To the extent deemed required, Plaintiffs and the GEICO Enterprise Class members relied, to their detriment, on Defendant GEICO’s fraudulent misrepresentations and omissions as described herein. Reliance by Plaintiffs and the GEICO Enterprise Class is evidenced by the compensation that they accepted – and were coerced, forced and/or required to accept – for their collision repair services. Plaintiffs and the members of the GEICO Enterprise Class had no reasonable means of verifying, testing or discovering the accuracy (or lack thereof) of GEICO’s representations of their purported prevailing rates.

374. Defendant GEICO knew that Plaintiffs and the GEICO Enterprise Class members relied on their misrepresentations and omissions about prevailing rates and compensation for repairs and knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the GEICO Enterprise Class would – and did – receive less in compensation for collision repair services.

375. The direct and intended victims of the pattern of racketeering activity are Plaintiffs and the GEICO Enterprise Class members.

376. Alternatively, Plaintiffs and the members of the GEICO Enterprise Class were injured as a direct and proximate consequence of GEICO misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants concerning GEICO's obligation to indemnify and pay for the repairs necessary and warranted to restore vehicles to their pre-loss or pre-damaged condition, as well as their misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants regarding the repairs services performed by Plaintiffs and the members of the GEICO Enterprise Class covered by, and/or in connection with, the first party and third party insurance claims.

377. Further, GEICO knew that first party policyholders and third party claimants relied on GEICO's misrepresentations and omissions about prevailing rates and compensation for repairs and GEICO knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the GEICO Enterprise Class would – and did – receive less in compensation for collision repair services.

378. The injuries in the form of suppressed compensation for collision repair services sustained by Plaintiffs and the GEICO Enterprise Class members were directly and proximately caused by Defendant GEICO's racketeering activity and RICO violations, which injuries were the foreseeable, direct, intended and natural consequence of Defendant GEICO's conduct. But for Defendant GEICO's racketeering activity and RICO violations, Plaintiffs and the GEICO Enterprise Class members would not have suffered these injuries.

379. 18 U.S.C. § 1962(d) provides, in pertinent part, that: "It shall be unlawful for any person to conspire to violate any of the provisions of subsection ...(c) of this section."

380. In violation of 18 U.S.C. § 1962(d), Defendant GEICO conspired to defraud and extort the Plaintiffs and the GEICO Enterprise Class members for their money and property by establishing artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts, and suppressing compensation and maintaining suppressed compensation for those repairs. This conspiracy to violate 18 U.S.C. § 1962(c) constitutes a violation of 18 U.S.C. § 1962(d).

381. In furtherance of the conspiracy, Defendant GEICO agreed to conduct or participate in the affairs of the GEICO Enterprise and agreed to commit at least two of the predicate acts described above.

382. As a result and by reason of the foregoing, Plaintiffs and the GEICO Enterprise Class members have been injured, suffered harm and sustained damage to the business and property, and, pursuant to 18 U.S.C. § 1964(c), are therefore entitled to recover actual and treble damages, as well as their costs of suit and reasonable attorneys’ fees, and all other appropriate relief.

COUNT IV

**(Violation of the Racketeer Influenced and Corrupt Organization Act,
18 U.S.C. §§ 1962(c) and (d))
(Against Defendant Progressive Predicated on the Progressive Enterprise)**

383. Plaintiffs incorporate and reallege all of the allegations contained in the preceding paragraphs 1-194, 207-212 and 257-323 as though fully set forth herein. This claim is brought by Plaintiffs and the Progressive Enterprise Class against Defendant Progressive.

384. Defendant Progressive is and at all relevant times was a “person” within the meaning of 18 U.S.C. § 1961(3), because it was “capable of holding a legal or beneficial interest in property.”

385. Defendant Progressive, as described herein, carried out a scheme to defraud and extort Plaintiffs and the Progressive Enterprise Class members by conducting an “enterprise” within the meaning of 18 U.S.C. § 1961(4).

386. At all relevant times, the Progressive Enterprise was engaged in, and its activities affected, interstate commerce within the meaning of 18 U.S.C. § 1962(c).

387. By virtue of the conduct alleged herein, Defendant Progressive, in violation of 18 U.S.C. § 1962(c), conducted and participated in the conduct of the Progressive Enterprise’s affairs, directly and indirectly, through a “pattern of racketeering activity,” as defined in 18 U.S.C. § 1961(5).

388. Defendant Progressive, as described herein, has committed numerous predicate acts of “racketeering activity”, as defined in 18 U.S.C. § 1961(5), prior to and during the class period, and continued to commit such predicate acts, in furtherance of Defendant Progressive’s scheme to establish artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts, and to suppress compensation and maintain suppressed compensation for those repairs, including wire fraud, in violation of 18 U.S.C. § 1343, and extortion, in violation of 18 U.S.C. § 1951.

389. In furtherance of its scheme, Defendant Progressive, in violation of 18 U.S.C. §§ 1343, 1951, 1961 and 1962, regularly and repeatedly used the interstate wires to further all aspects of the intentional suppression of compensation to Plaintiffs and the Progressive Enterprise Class members by transmitting and/or receiving materials necessary to carry out the scheme to defraud and extort.

390. These communications were incident to and an essential part of Defendant Progressive’s scheme to defraud and extort as described herein.

391. Each such use of the U.S. interstate wire facilities alleged herein constituted a separate and distinct predicate act of “racketeering activity” and collectively, constitutes a “pattern of racketeering activity”.

392. The Progressive Enterprise was and is engaged in a common purpose which enabled Defendant Progressive to establish artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts, and to suppress compensation and maintain suppressed compensation for those repairs. As described herein, each member of the Progressive Enterprise (i.e., Progressive and Mitchell) is necessary and essential to the function and success of the Progressive Enterprise, and the Progressive Enterprise occurred over the course of a number of years, and continues to occur, enabling the pursuit of the common scheme and purpose to defraud. Further, the “pattern of racketeering activity” is related because it involves common persons, common practices, common results impacting common victims, and is continuous because it occurred over the course of a number of years, constitutes and promotes the common purpose of the Progressive Enterprise, such that it poses a threat of continued racketeering activity. Defendant Progressive’s scheme to defraud and extort Plaintiffs and the Progressive Enterprise Class members is open-ended and ongoing.

393. To the extent deemed required, Plaintiffs and the Progressive Enterprise Class members relied, to their detriment, on Defendant Progressive’s fraudulent misrepresentations and omissions as described herein. Reliance by Plaintiffs and the Progressive Enterprise Class is evidenced by the compensation that they accepted – and were coerced, forced and/or required to accept – for their collision repair services. Plaintiffs and the members of the Progressive

Enterprise Class had no reasonable means of verifying, testing or discovering the accuracy (or lack thereof) of Progressive's representations of their purported prevailing rates.

394. Defendant Progressive knew that Plaintiffs and the Progressive Enterprise Class members relied on their misrepresentations and omissions about prevailing rates and compensation for repairs and knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the Progressive Enterprise Class would – and did – receive less in compensation for collision repair services.

395. The direct and intended victims of the pattern of racketeering activity are Plaintiffs and the Progressive Enterprise Class members.

396. Alternatively, Plaintiffs and the members of the Progressive Enterprise Class were injured as a direct and proximate consequence of Progressive's misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants concerning Progressive's obligation to indemnify and pay for the repairs necessary and warranted to restore vehicles to their pre-loss or pre-damaged condition, as well as their misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants regarding the repairs services performed by Plaintiffs and the members of the Progressive Enterprise Class covered by, and/or in connection with, the first party and third party insurance claims.

397. Further, Progressive knew that first party policyholders and third party claimants relied on Progressive's misrepresentations and omissions about prevailing rates and compensation for repairs and Progressive knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the Progressive Enterprise Class would – and did – receive less in compensation for collision repair services.

398. The injuries in the form of suppressed compensation for collision repair services sustained by Plaintiffs and the Progressive Enterprise Class members were directly and proximately caused by Defendant Progressive's racketeering activity and RICO violations, which injuries were the foreseeable, direct, intended and natural consequence of Defendant Progressive's conduct. But for Defendant Progressive's racketeering activity and RICO violations, Plaintiffs and the Progressive Enterprise Class members would not have suffered these injuries.

399. 18 U.S.C. § 1962(d) provides, in pertinent part, that: "It shall be unlawful for any person to conspire to violate any of the provisions of subsection ...(c) of this section."

400. In violation of 18 U.S.C. § 1962(d), Defendant Progressive conspired to defraud and extort the Plaintiffs and the Progressive Enterprise Class members for their money and property by establishing artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for "paint and materials", compensable repair procedures, and parts, and suppressing compensation and maintaining suppressed compensation for those repairs. This conspiracy to violate 18 U.S.C. § 1962(c) constitutes a violation of 18 U.S.C. § 1962(d).

401. In furtherance of the conspiracy, Defendant Progressive agreed to conduct or participate in the affairs of the Progressive Enterprise and agreed to commit at least two of the predicate acts described above.

402. As a result and by reason of the foregoing, Plaintiffs and the Progressive Enterprise Class members have been injured, suffered harm and sustained damage to the business and property, and, pursuant to 18 U.S.C. § 1964(c), are therefore entitled to recover actual and treble damages, as well as their costs of suit and reasonable attorneys' fees, and all other appropriate relief.

COUNT V

**(Violation of the Racketeer Influenced and Corrupt Organization Act,
18 U.S.C. §§ 1962(c) and (d))
(Against Defendant Farmers Predicated on the Farmers Enterprise)**

403. Plaintiff Crawford's incorporates and realleges all of the allegations contained in the preceding paragraphs 1-194, 213-281, and 257-323 as though fully set forth herein. This claim is brought by Plaintiff Crawford's and the Farmers Enterprise Class against Defendant Farmers.

404. Defendant Farmers is and at all relevant times was a "person" within the meaning of 18 U.S.C. § 1961(3), because it was "capable of holding a legal or beneficial interest in property."

405. Defendant Farmers, as described herein, carried out a scheme to defraud and extort Plaintiff Crawford's and the Farmers Enterprise Class members by conducting an "enterprise" within the meaning of 18 U.S.C. § 1961(4).

406. At all relevant times, the Farmers Enterprise was engaged in, and its activities affected, interstate commerce within the meaning of 18 U.S.C. § 1962(c).

407. By virtue of the conduct alleged herein, Defendant Farmers, in violation of 18 U.S.C. § 1962(c), conducted and participated in the conduct of the Farmers Enterprise's affairs, directly and indirectly, through a "pattern of racketeering activity," as defined in 18 U.S.C. § 1961(5).

408. Defendant Farmers, as described herein, has committed numerous predicate acts of "racketeering activity", as defined in 18 U.S.C. § 1961(5), prior to and during the class period, and continued to commit such predicate acts, in furtherance of Defendant Farmers' scheme to establish artificial prevailing rates for insured repairs, including hourly labor rates,

reimbursement for “paint and materials”, compensable repair procedures, and parts, and to suppress compensation and maintain suppressed compensation for those repairs, including wire fraud, in violation of 18 U.S.C. § 1343, and extortion, in violation of 18 U.S.C. § 1951.

409. In furtherance of its scheme, Defendant Farmers, in violation of 18 U.S.C. §§ 1343, 1951, 1961 and 1962, regularly and repeatedly used the interstate wires to further all aspects of the intentional suppression of compensation to Plaintiff Crawford’s and the Farmers Enterprise Class members by transmitting and/or receiving materials necessary to carry out the scheme to defraud and extort.

410. These communications were incident to and an essential part of Defendant Farmers’ scheme to defraud and extort as described herein.

411. Each such use of the U.S. interstate wire facilities alleged herein constituted a separate and distinct predicate act of “racketeering activity” and collectively, constitutes a “pattern of racketeering activity”.

412. The Farmers Enterprise was and is engaged in a common purpose which enabled Defendant Farmers to establish artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts, and to suppress compensation and maintain suppressed compensation for those repairs. As described herein, each member of the Farmers Enterprise (i.e., Farmers and CCC) is necessary and essential to the function and success of the Farmers Enterprise, and the Farmers Enterprise occurred over the course of a number of years, and continues to occur, enabling the pursuit of the common scheme and purpose to defraud. Further, the “pattern of racketeering activity” is related because it involves common persons, common practices, common results impacting common victims, and is continuous because it occurred over the course of a number of years, constitutes

and promotes the common purpose of the Farmers Enterprise, such that it poses a threat of continued racketeering activity. Defendant Farmers' scheme to defraud and extort Plaintiff Crawford's and the Farmers Enterprise Class members is open-ended and ongoing.

413. To the extent deemed required, Plaintiff Crawford's and the Farmers Enterprise Class members relied, to their detriment, on Defendant Farmers' fraudulent misrepresentations and omissions as described herein. Reliance by Plaintiff Crawford's and the Farmers Enterprise Class is evidenced by the compensation that they accepted – and were coerced, forced and/or required to accept – for their collision repair services. Plaintiff Crawford's and the members of the Farmers Class had no reasonable means of verifying, testing or discovering the accuracy (or lack thereof) of Farmers' representations of their purported prevailing rates.

414. Defendant Farmers knew that Plaintiff Crawford's and the Farmers Enterprise Class members relied on their misrepresentations and omissions about prevailing rates and compensation for repairs and knew that, as a result of the misrepresentations and omissions described herein, Plaintiff Crawford's and the Farmers Enterprise Class would – and did – receive less in compensation for collision repair services.

415. The direct and intended victims of the pattern of racketeering activity are Plaintiff Crawford's and the Farmers Enterprise Class members.

416. Alternatively, Plaintiffs and the members of the Farmers Enterprise Class were injured as a direct and proximate consequence of Farmers' misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants concerning Farmers' obligation to indemnify and pay for the repairs necessary and warranted to restore vehicles to their pre-loss or pre-damaged condition, as well as their misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants regarding the repairs

services performed by Plaintiffs and the members of the Farmers Enterprise Class covered by, and/or in connection with, the first party and third party insurance claims.

417. Further, Farmers knew that first party policyholders and third party claimants relied on Farmers misrepresentations and omissions about prevailing rates and compensation for repairs and Farmers knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the Farmers Enterprise Class would – and did – receive less in compensation for collision repair services.

418. The injuries in the form of suppressed compensation for collision repair services sustained by Plaintiff Crawford's and the Farmers Enterprise Class members were directly and proximately caused by Defendant Farmers' racketeering activity and RICO violations, which injuries were the foreseeable, direct, intended and natural consequence of Defendant Farmers' conduct. But for Defendant Farmers' racketeering activity and RICO violations, Plaintiff Crawford's and the Farmers Enterprise Class members would not have suffered these injuries.

419. 18 U.S.C. § 1962(d) provides, in pertinent part, that: "It shall be unlawful for any person to conspire to violate any of the provisions of subsection ...(c) of this section."

420. In violation of 18 U.S.C. § 1962(d), Defendant Farmers conspired to defraud and extort the Plaintiff Crawford's and the Farmers Enterprise Class members for their money and property by establishing artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for "paint and materials", compensable repair procedures, and parts, and suppressing compensation and maintaining suppressed compensation for those repairs. This conspiracy to violate 18 U.S.C. § 1962(c) constitutes a violation of 18 U.S.C. § 1962(d).

421. In furtherance of the conspiracy, Defendant Farmers agreed to conduct or participate in the affairs of the Farmers Enterprise and agreed to commit at least two of the predicate acts described above.

422. As a result and by reason of the foregoing, Plaintiff Crawford's and the Farmers Enterprise Class members have been injured, suffered harm and sustained damage to the business and property, and, pursuant to 18 U.S.C. § 1964(c), are therefore entitled to recover actual and treble damages, as well as their costs of suit and reasonable attorneys' fees, and all other appropriate relief.

COUNT VI

**(Violation of the Racketeer Influenced and Corrupt Organization Act,
18 U.S.C. §§ 1962(c) and (d))
(Against Defendant Liberty Mutual Predicated on the Liberty Mutual Enterprise)**

423. Plaintiffs incorporate and reallege all of the allegations contained in the preceding paragraphs 1-194, 219-224, and 257-323 as though fully set forth herein. This claim is brought by Plaintiffs and the Liberty Mutual Enterprise Class against Defendant Liberty Mutual.

424. Defendant Liberty Mutual is and at all relevant times was a "person" within the meaning of 18 U.S.C. § 1961(3), because it was "capable of holding a legal or beneficial interest in property."

425. Defendant Liberty Mutual, as described herein, carried out a scheme to defraud and extort Plaintiffs and the Liberty Mutual Enterprise Class members by conducting an "enterprise" within the meaning of 18 U.S.C. § 1961(4).

426. At all relevant times, the Liberty Mutual Enterprise was engaged in, and its activities affected, interstate commerce within the meaning of 18 U.S.C. § 1962(c).

427. By virtue of the conduct alleged herein, Defendant Liberty Mutual, in violation of 18 U.S.C. § 1962(c), conducted and participated in the conduct of the Liberty Mutual Enterprise’s affairs, directly and indirectly, through a “pattern of racketeering activity,” as defined in 18 U.S.C. § 1961(5).

428. Defendant Liberty Mutual, as described herein, has committed numerous predicate acts of “racketeering activity”, as defined in 18 U.S.C. § 1961(5), prior to and during the class period, and continued to commit such predicate acts, in furtherance of Defendant Liberty Mutual’s scheme to establish artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts, and to suppress compensation and maintain suppressed compensation for those repairs, including wire fraud, in violation of 18 U.S.C. § 1343, and extortion, in violation of 18 U.S.C. § 1951.

429. In furtherance of its scheme, Defendant Liberty Mutual, in violation of 18 U.S.C. §§ 1343, 1951, 1961 and 1962, regularly and repeatedly used the interstate wires to further all aspects of the intentional suppression of compensation to Plaintiffs and the Liberty Mutual Enterprise Class members by transmitting and/or receiving materials necessary to carry out the scheme to defraud and extort.

430. These communications were incident to and an essential part of Defendant Liberty Mutual’s scheme to defraud and extort as described herein.

431. Each such use of the U.S. interstate wire facilities alleged herein constituted a separate and distinct predicate act of “racketeering activity” and collectively, constitutes a “pattern of racketeering activity”.

432. The Liberty Mutual Enterprise was and is engaged in a common purpose which enabled Defendant Liberty Mutual to establish artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts, and to suppress compensation and maintain suppressed compensation for those repairs. As described herein, each member of the Liberty Mutual Enterprise (i.e., Liberty Mutual, AudaExplore and CCC) is necessary and essential to the function and success of the Liberty Mutual Enterprise, and the Liberty Mutual Enterprise occurred over the course of a number of years, and continues to occur, enabling the pursuit of the common scheme and purpose to defraud. Further, the “pattern of racketeering activity” is related because it involves common persons, common practices, common results impacting common victims, and is continuous because it occurred over the course of a number of years, constitutes and promotes the common purpose of the Liberty Mutual Enterprise, such that it poses a threat of continued racketeering activity. Defendant Liberty Mutual’s scheme to defraud and extort Plaintiffs and the Liberty Mutual Enterprise Class members is open-ended and ongoing.

433. To the extent deemed required, Plaintiffs and the Liberty Mutual Enterprise Class members relied, to their detriment, on Defendant Liberty Mutual’s fraudulent misrepresentations and omissions as described herein. Reliance by Plaintiffs and the Liberty Mutual Enterprise Class is evidenced by the compensation that they accepted – and were coerced, forced and/or required to accept – for their collision repair services. Plaintiffs and the members of the Liberty Mutual Enterprise Class had no reasonable means of verifying, testing or discovering the accuracy (or lack thereof) of Liberty Mutual’s representations of their purported prevailing rates.

434. Defendant Liberty Mutual knew that Plaintiffs and the Liberty Mutual Enterprise Class members relied on their misrepresentations and omissions about prevailing rates and

compensation for repairs and knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the Liberty Mutual Enterprise Class would – and did – receive less in compensation for collision repair services.

435. The direct and intended victims of the pattern of racketeering activity are Plaintiffs and the Liberty Mutual Enterprise Class members.

436. Alternatively, Plaintiffs and the members of the Liberty Mutual Enterprise Class were injured as a direct and proximate consequence of Liberty Mutual's misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants concerning Liberty Mutual's obligation to indemnify and pay for the repairs necessary and warranted to restore vehicles to their pre-loss or pre-damaged condition, as well as their misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants regarding the repairs services performed by Plaintiffs and the members of the Liberty Mutual Enterprise Class covered by, and/or in connection with, the first party and third party insurance claims.

437. Further, Liberty Mutual knew that first party policyholders and third party claimants relied on Liberty Mutual's misrepresentations and omissions about prevailing rates and compensation for repairs and Liberty Mutual knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the Liberty Mutual Enterprise Class would – and did – receive less in compensation for collision repair services.

438. The injuries in the form of suppressed compensation for collision repair services sustained by Plaintiffs and the Liberty Mutual Enterprise Class members were directly and proximately caused by Defendant Liberty Mutual's racketeering activity and RICO violations, which injuries were the foreseeable, direct, intended and natural consequence of Defendant

Liberty Mutual's conduct. But for Defendant Liberty Mutual's racketeering activity and RICO violations, Plaintiffs and the Liberty Mutual Enterprise Class members would not have suffered these injuries.

439. 18 U.S.C. § 1962(d) provides, in pertinent part, that: "It shall be unlawful for any person to conspire to violate any of the provisions of subsection ... (c) of this section."

440. In violation of 18 U.S.C. § 1962(d), Defendant Liberty Mutual conspired to defraud and extort the Plaintiffs and the Liberty Mutual Enterprise Class members for their money and property by establishing artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for "paint and materials", compensable repair procedures, and parts, and suppressing compensation and maintaining suppressed compensation for those repairs. This conspiracy to violate 18 U.S.C. § 1962(c) constitutes a violation of 18 U.S.C. § 1962(d).

441. In furtherance of the conspiracy, Defendant Liberty Mutual agreed to conduct or participate in the affairs of the Liberty Mutual Enterprise and agreed to commit at least two of the predicate acts described above.

442. As a result and by reason of the foregoing, Plaintiffs and the Liberty Mutual Enterprise Class members have been injured, suffered harm and sustained damage to the business and property, and, pursuant to 18 U.S.C. § 1964(c), are therefore entitled to recover actual and treble damages, as well as their costs of suit and reasonable attorneys' fees, and all other appropriate relief.

COUNT VII

**(Violation of the Racketeer Influenced and Corrupt Organization Act,
18 U.S.C. §§ 1962(c) and (d))
(Against Defendant Nationwide Predicated on the Nationwide Enterprise)**

443. Plaintiffs incorporate and reallege all of the allegations contained in the preceding paragraphs 1-194, 225-230, and 257-323 as though fully set forth herein. This claim is brought by Plaintiffs and the Nationwide Enterprise Class against Defendant Nationwide.

444. Defendant Nationwide is and at all relevant times was a “person” within the meaning of 18 U.S.C. § 1961(3), because it was “capable of holding a legal or beneficial interest in property.”

445. Defendant Nationwide, as described herein, carried out a scheme to defraud and extort Plaintiffs and the Nationwide Enterprise Class members by conducting an “enterprise” within the meaning of 18 U.S.C. § 1961(4).

446. At all relevant times, the Nationwide Enterprise was engaged in, and its activities affected, interstate commerce within the meaning of 18 U.S.C. § 1962(c).

447. By virtue of the conduct alleged herein, Defendant Nationwide, in violation of 18 U.S.C. § 1962(c), conducted and participated in the conduct of the Nationwide Enterprise’s affairs, directly and indirectly, through a “pattern of racketeering activity,” as defined in 18 U.S.C. § 1961(5).

448. Defendant Nationwide, as described herein, has committed numerous predicate acts of “racketeering activity”, as defined in 18 U.S.C. § 1961(5), prior to and during the class period, and continued to commit such predicate acts, in furtherance of Defendant Nationwide’s scheme to establish artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for “paint and materials”, compensable repair procedures, and parts, and to

suppress compensation and maintain suppressed compensation for those repairs, including wire fraud, in violation of 18 U.S.C. § 1343, and extortion, in violation of 18 U.S.C. § 1951.

449. In furtherance of its scheme, Defendant Nationwide, in violation of 18 U.S.C. §§ 1343, 1951, 1961 and 1962, regularly and repeatedly used the interstate wires to further all aspects of the intentional suppression of compensation to Plaintiffs and the Nationwide Enterprise Class members by transmitting and/or receiving materials necessary to carry out the scheme to defraud and extort.

450. These communications were incident to and an essential part of Defendant Nationwide's scheme to defraud and extort as described herein.

451. Each such use of the U.S. interstate wire facilities alleged herein constituted a separate and distinct predicate act of "racketeering activity" and collectively, constitutes a "pattern of racketeering activity".

452. The Nationwide Enterprise was and is engaged in a common purpose which enabled Defendant Nationwide to establish artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for "paint and materials", compensable repair procedures, and parts, and to suppress compensation and maintain suppressed compensation for those repairs. As described herein, each member of the Nationwide Enterprise (i.e., Nationwide and CCC) is necessary and essential to the function and success of the Nationwide Enterprise, and the Nationwide Enterprise occurred over the course of a number of years, and continues to occur, enabling the pursuit of the common scheme and purpose to defraud. Further, the "pattern of racketeering activity" is related because it involves common persons, common practices, common results impacting common victims, and is continuous because it occurred over the course of a number of years, constitutes and promotes the common purpose of the Nationwide

Enterprise, such that it poses a threat of continued racketeering activity. Defendant Nationwide's scheme to defraud and extort Plaintiffs and the Nationwide Enterprise Class members is open-ended and ongoing.

453. To the extent deemed required, Plaintiffs and the Nationwide Enterprise Class members relied, to their detriment, on Defendant Nationwide's fraudulent misrepresentations and omissions as described herein. Reliance by Plaintiffs and the Nationwide Enterprise Class is evidenced by the compensation that they accepted – and were coerced, forced and/or required to accept – for their collision repair services. Plaintiffs and the members of the Nationwide Enterprise Class had no reasonable means of verifying, testing or discovering the accuracy (or lack thereof) of Nationwide's representations of their purported prevailing rates.

454. Defendant Nationwide knew that Plaintiffs and the Nationwide Enterprise Class members relied on their misrepresentations and omissions about prevailing rates and compensation for repairs and knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the Nationwide Enterprise Class would – and did – receive less in compensation for collision repair services.

455. The direct and intended victims of the pattern of racketeering activity are Plaintiffs and the Nationwide Enterprise Class members.

456. Alternatively, Plaintiffs and the members of the Nationwide Enterprise Class were injured as a direct and proximate consequence of Nationwide's misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants concerning Nationwide's obligation to indemnify and pay for the repairs necessary and warranted to restore vehicles to their pre-loss or pre-damaged condition, as well as their misrepresentations and omissions of material fact to first party policyholders and third party insurance claimants

regarding the repairs services performed by Plaintiffs and the members of the Nationwide Enterprise Class covered by, and/or in connection with, the first party and third party insurance claims.

457. Further, Nationwide knew that first party policyholders and third party claimants relied on Nationwide's misrepresentations and omissions about prevailing rates and compensation for repairs and Nationwide knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the Nationwide Enterprise Class would – and did – receive less in compensation for collision repair services.

458. The injuries in the form of suppressed compensation for collision repair services sustained by Plaintiffs and the Nationwide Enterprise Class members were directly and proximately caused by Defendant Nationwide's racketeering activity and RICO violations, which injuries were the foreseeable, direct, intended and natural consequence of Defendant Nationwide's conduct. But for Defendant Nationwide's racketeering activity and RICO violations, Plaintiffs and the Nationwide Enterprise Class members would not have suffered these injuries.

459. 18 U.S.C. § 1962(d) provides, in pertinent part, that: "It shall be unlawful for any person to conspire to violate any of the provisions of subsection ...(c) of this section."

460. In violation of 18 U.S.C. § 1962(d), Defendant Nationwide conspired to defraud and extort the Plaintiffs and the Nationwide Enterprise Class members for their money and property by establishing artificial prevailing rates for insured repairs, including hourly labor rates, reimbursement for "paint and materials", compensable repair procedures, and parts, and suppressing compensation and maintaining suppressed compensation for those repairs. This conspiracy to violate 18 U.S.C. § 1962(c) constitutes a violation of 18 U.S.C. § 1962(d).

461. In furtherance of the conspiracy, Defendant Nationwide agreed to conduct or participate in the affairs of the Nationwide Enterprise and agreed to commit at least two of the predicate acts described above.

462. As a result and by reason of the foregoing, Plaintiffs and the Nationwide Enterprise Class members have been injured, suffered harm and sustained damage to the business and property, and, pursuant to 18 U.S.C. § 1964(c), are therefore entitled to recover actual and treble damages, as well as their costs of suit and reasonable attorneys' fees, and all other appropriate relief.

COUNT VIII

(Fraud)

(Against Defendant Insurers State Farm, Allstate, GEICO, Progressive, Farmers, Liberty Mutual and Nationwide)

463. Plaintiffs incorporate and reallege all of the allegations contained in the preceding paragraphs 1-194 and 231-323 for State Farm, 1-200 and 257-323 for Allstate, 1-194, 201-206 and 257-323 for GEICO, 1-194, 207-212, and 257-323 for Progressive, 1-194, 213-218, and 257-323 for Farmers, 1-194, 219-224, and 257-323 for Liberty Mutual, and 1-194, 225-230, and 257-323 for Nationwide, as though fully set forth herein. This claim is brought by Plaintiffs and the State Farm Enterprise Class, Allstate Enterprise Class, GEICO Enterprise Class, Progressive Enterprise Class, Farmers Enterprise Class, Liberty Mutual Enterprise Class and Nationwide Enterprise Class against Defendant Insurers.

464. As described herein at length and in detail, Defendant Insurers have made false and misleading representations of fact, and concealed and omitted facts regarding the prevailing rates for insured collision repair services and compensable repair procedures. These facts were material to Plaintiffs and the members of the State Farm Enterprise Class, Allstate Enterprise

Class, GEICO Enterprise Class, Progressive Enterprise Class, Farmers Enterprise Class, Liberty Mutual Enterprise Class and Nationwide Enterprise Class.

465. Defendant Insurers knew that Plaintiffs and the members of the State Farm Enterprise Class, Allstate Enterprise Class, GEICO Enterprise Class, Progressive Enterprise Class, Farmers Enterprise Class, Liberty Mutual Enterprise Class and Nationwide Enterprise Class would rely on their misrepresentations and omissions about prevailing rates and compensation for repairs and knew that, as a result of the misrepresentations and omissions described herein, Plaintiffs and the foregoing classes would – and did – receive less in compensation for collision repair services.

466. Plaintiffs and the members of the State Farm Enterprise Class, Allstate Enterprise Class, GEICO Enterprise Class, Progressive Enterprise Class, Farmers Enterprise Class, Liberty Mutual Enterprise Class and Nationwide Enterprise Class relied, to their detriment, on Defendant Insurers' fraudulent misrepresentations and omissions as described herein.

467. As a direct and proximate result, Plaintiffs and the members of the State Farm Enterprise Class, Allstate Enterprise Class, GEICO Enterprise Class, Progressive Enterprise Class, Farmers Enterprise Class, Liberty Mutual Enterprise Class and Nationwide Enterprise Class have suffered injury.

468. Defendant Insurers' conduct was wanton, willful and in reckless disregard of the rights of Plaintiffs and the members of the State Farm Enterprise Class, Allstate Enterprise Class, GEICO Enterprise Class, Progressive Enterprise Class, Farmers Enterprise Class, Liberty Mutual Enterprise Class and Nationwide Enterprise Class, warranting punitive damages.

469. As a result and by reason of the foregoing, Plaintiffs and the members of the State Farm Enterprise Class, Allstate Enterprise Class, GEICO Enterprise Class, Progressive

Enterprise Class, Farmers Enterprise Class, Liberty Mutual Enterprise Class and Nationwide Enterprise Class are therefore entitled actual and punitive damages, and all other appropriate relief.

COUNT IX

**(Unjust Enrichment)
(Against Defendant Insurers State Farm, Allstate, GEICO, Progressive, Farmers,
Liberty Mutual and Nationwide)**

470. Plaintiffs incorporate and reallege all of the allegations contained in the preceding paragraphs 1-194 and 231-323 for State Farm, 1-200 and 257-323 for Allstate, 1-194, 201-206 and 257-323 for GEICO, 1-194, 207-212, and 257-323 for Progressive, 1-194, 213-218, and 257-323 for Farmers, 1-194, 219-224, and 257-323 for Liberty Mutual, and 1-194, 225-230, and 257-323 for Nationwide, as though fully set forth herein. This claim is brought by Plaintiffs and the State Farm Enterprise Class, Allstate Enterprise Class, GEICO Enterprise Class, Progressive Enterprise Class, Farmers Enterprise Class, Liberty Mutual Enterprise Class and Nationwide Enterprise Class against Defendant Insurers, on whom Plaintiffs and the members of the respective classes have conferred direct and indirect benefits.

471. Defendant Insurers all directly benefitted from their respective pattern and practice of conduct as described herein, and unjustly failed to fully and properly compensate Plaintiffs and the members of the State Farm Enterprise Class, Allstate Enterprise Class, GEICO Enterprise Class, Progressive Enterprise Class, Farmers Enterprise Class, Liberty Mutual Enterprise Class and Nationwide Enterprise Class for their collision repair services performed in fulfillment of Defendant Insurers' indemnification obligations to claimants.

472. Defendant Insurers also indirectly benefitted from their respective pattern and practice of conduct as described herein, and unjustly failed to fully and properly compensate

Plaintiffs and the members of the State Farm Enterprise Class, Allstate Enterprise Class, GEICO Enterprise Class, Progressive Enterprise Class, Farmers Enterprise Class, Liberty Mutual Enterprise Class and Nationwide Enterprise Class for their collision repair services performed for Defendant Insurers' claimants, which services caused benefits to flow to the Defendant Insurers.

473. Defendant Insurers' failure to fully and properly compensate for these direct and indirect benefits was to the detriment of the Plaintiffs and the members of the State Farm Enterprise Class, Allstate Enterprise Class, GEICO Enterprise Class, Progressive Enterprise Class, Farmers Enterprise Class, Liberty Mutual Enterprise Class and Nationwide Enterprise Class.

474. As a result and by reason of Defendant Insurers' failure to fully and properly compensate Plaintiffs and the members of the State Farm Enterprise Class, Allstate Enterprise Class, GEICO Enterprise Class, Progressive Enterprise Class, Farmers Enterprise Class, Liberty Mutual Enterprise Class and Nationwide Enterprise Class for their collision repair services, Defendant Insurers have enriched themselves, profited and retained money which, in equity and good conscience, does not belong to Defendant Insurers. The losses and injuries incurred by Plaintiffs and the members of the respective Classes were both directly and indirectly caused by Defendant Insurers' conduct.

475. Accordingly, Plaintiffs and the members of the State Farm Enterprise Class, Allstate Enterprise Class, GEICO Enterprise Class, Progressive Enterprise Class, Farmers Enterprise Class, Liberty Mutual Enterprise Class and Nationwide Enterprise Class are entitled to recover same, together with all appropriate relief.

PRAYER FOR RELIEF

WHEREFORE, Plaintiffs, on behalf of themselves and the Classes, respectfully request that the Court:

A. Certify the Classes defined herein pursuant to Fed. R. Civ. P. 23(a) and (b)(3), and designate Plaintiffs as the representatives of the Classes and their counsel as Class Counsel;

B. Enter judgments against each of the Defendants and in favor of Plaintiffs and each of the Classes predicated on Defendants' respective violations of RICO;

C. Award Plaintiffs and the Classes actual and compensatory damages, trebled, in an amount to be determined at trial;

D. Award Plaintiffs and the Classes restitution or disgorgement of ill-gotten gains, as appropriate;

E. Award Plaintiffs and the Classes exemplary and/or punitive damages predicated on their claim for fraud, as allowed by law;

F. Award Plaintiffs and the Classes their costs of suit, including reasonable attorneys' fees, as provided by law;

G. Award Plaintiffs and the Classes prejudgment and post-judgment interest, as allowed by law; and

H. Award such further and additional relief as the Court may deem just and proper.

JURY DEMAND

Pursuant to Federal Rule of Civil Procedure 38, Plaintiffs, on behalf of themselves and the proposed Classes, demand a trial by jury on all issues so triable.

Dated: January 8, 2016

Respectfully,
