

FOR IMMEDIATE RELEASE:

EstimateScrubber.com Adds No-Cost Access to 42 Repair Planning Procedures

SAN DIEGO, CA—July 27, 2017— VehicleOwnersGuide.com, a provider of technology, connectivity and information solutions to the Collision Repair market, announced any shop in the US and Canada can now check their estimates against 42 repair planning procedures at no cost.

EstimateScrubber.com uses advanced artificial intelligence to read and apply repair planning procedures against printed Audatex, CCC and Mitchell collision estimates. EstimateScrubber.com is a cloud application that receives estimate PDF print file. The portal has been used by thousands of shops to scrub tens of thousands of estimates. No login or registration required.

The free checks let shops check their estimates for sensors (park, backup, proximity & camera), advanced substrates, modified refinish/blend allowances, block sand, discontinued parts, mechanical operations paid as body, manually entered Inc*, parts that need to be priced by dealer, core charges, enhanced corrosion protection, blank labor times or prices, recalibration of collision avoidance systems, refinish, undersides of selected panels, and dozens of other repair procedure checks.

A PRO version is available that includes enhanced repair planning procedures, a production assistant, position statements, sales mix analysis, downloading estimate files, KPI and other features.

“Every collision repairer in the US and Canada should be using this free tool to scrub their estimates. We are hearing shops consistently increasing their estimates 3 percent, saving time and implementing estimating SOP’s ” , said Steven Siessman of VehicleOwnersGuide.com.
