Auto Repair Facility Survey

All fields except Fax are required

Equipment/Capabilities Criteria

1. A paint application system and refinishing area designed and maintained to minimize the diffusion of paint or other hazardous material and which will produce an original equipment manufacturer's type of color and finish.
2. A source of frame/unibody dimensions, including upper body dimensions, and a measuring device capable of determining frame/unibody dimensions, including upper body dimensions, for the types of vehicles to be repaired.
3. Hydraulic equipment needed to perform multiple repair pulls on frame and unibody vehicles.
4. Appropriate welding equipment needed to perform required repair operations.
5. Equipment to elevate the vehicle for underbody damage inspection, analysis and diagnosis.
6. Equipment and capability to restore corrosion protection materials.
7. A four-point anchoring system capable of holding the vehicle in a stationary position during structural and body pulls, suitable for the types of vehicles to be repaired.
8. The equipment, on-site or readily available, to remove and reinstall suspension, engine, and drive-train components.
9. Equipment, on-site or readily available, to restore steering system alignment, including four-wheel alignment.
10. Equipment, on-site or readily available, for use by certified personnel to evacuate and recharge air conditioning systems.
