RE: Auto Body Labor Rate Survey

Dear Claims Services Bureau:

In accordance with California Insurance Code section 758(c) and Section 2698.91 of Title 10 of the California Code of Regulations, please find enclosed our Auto Body Labor Rate Survey for the Yuba City area.

The information for this survey was gathered from our company's records of paid repairs completed within the previous 90 days. The survey was completed on February 5, 2019. The enclosed spreadsheet identifies the 6 shops included in the survey, with the date the estimate was written, and the labor rates agreed upon and accepted by the shops on that date. No questionnaire was used in the survey. The geographic area covered by this survey includes the following city: Yuba City (95991 and 95993). None of the shops included in the survey are members of our company's direct repair program. The formula used to calculate the prevailing auto body rate is the "mode" or modal value, which is the number that appears most often in a set of numbers.

Based on the Department's prior conclusion that our utilization of repair records constitutes a "survey" within the meaning of the Regulations, we are filing our compiled information in order to satisfy the filing requirement in Insurance Code section 758(c). We believe the enclosed survey meets or exceeds all legal requirements.

Please let me know if you have any questions, or if you need additional information.

Sincerely,
Mercury Insurance Company
Mercury Casualty Company
California Automobile Ins. Co
