Dear Mr. Cignarale:

Pursuant to Insurance Code Section 758(c), please find the results of the Auto Body Repair Survey conducted by State Farm Insurance. State Farm employs a continuous survey process to simplify repairers' submission of changes to equipment/capabilities, capacity and pricing information. Repairers can update their information by accessing our "business-to-business" website, [b2b.statefarm.com](http://b2b.statefarm.com)® to submit updated information at any time.

As we shared with you earlier in the year, the State Farm Auto Repair Facility Survey has been in place for several years with periodic updates taking place when business needs arise. State Farm recently (April 4, 2016) refined certain geographic market boundaries utilized to determine Prevailing Competitive Prices (PCP) to better align with government defined market areas – Core Based Statistical Areas (CBSA's).

The refinements to the geographic boundaries of market structures have resulted in PCP adjustments in some areas. The following information and contents within outline those adjustments.

There are 3,382 known repairers in the state whose most current rate information was provided to State Farm, and whose rates were used in our calculation of the PCP, providing they elected to participate in the survey and met the capabilities criteria. We are aware of 1,624 repairers who either chose not to participate in the survey or did not meet the Equipment/Capabilities criteria. The results of our continuous survey are broken down by market area, of which there are 38 in the state.

The PCP for each of the 38 markets are the prices charged by not less than the majority of the repair market. A market is comprised of repairers who have completed the Repair Facility Survey and who meet the Equipment/Capabilities Criteria listed on the Repair Facility Survey form. Specific information for each market is provided in the material included with this cover letter.

Sincerely,

A handwritten signature in cursive script that reads "Mark A. Chase".

## Repair Facility Survey

### Part I - Equipment/Capabilities Criteria

1. A paint application system and refinishing area designed and maintained to minimize the diffusion of paint or other hazardous material and which will produce an original equipment manufacturer's type of color and finish.
2. A source of frame/unibody dimensions, including upper body dimensions, and a measuring device capable of determining frame/unibody dimensions, including upper body dimensions, for the types of vehicles to be repaired.
3. Hydraulic equipment needed to perform multiple repair pulls on frame and unibody vehicles.
4. A gas metal arc welder, which will be used in appropriate repair situations.
5. Equipment to elevate the vehicle for underbody damage inspection, analysis, and diagnosis.
6. Equipment and capability to restore corrosion protection materials.
7. A four-point anchoring system capable of holding the vehicle in a stationary position during structural and body pulls, suitable for the types of vehicles to be repaired.
8. Equipment, on-site or readily available, to remove and reinstall suspension, engine, and drivetrain components.
9. Equipment, on-site or readily available, to restore steering system alignment, including four-wheel alignment.
10. Equipment, on-site or readily available, for use by certified personnel to evacuate and recharge air conditioning systems.
