VALUATION METHODOLOGY

How was the valuation determined?

CLAIM INSPECTION

FARMERS TEXAS COUNTY MUTUAL INS. CO. has provided CCC with the zip code where the loss unit is garaged, loss unit VIN, mileage/hours, options and additional equipment, as well as loss unit condition, which is used to assist in determining the value of the loss unit.

DATABASE REVIEW

CCC maintains an extensive database of units that currently are or recently were available for sale in the U.S. This database includes units advertised for sale by dealerships or private parties. All of these sources are updated regularly.

SEARCH FOR COMPARABLES

When a valuation is created the database is searched and comparable units are selected. On current year units, new units for sale at the time of the valuation may have been used. The zip code where the loss unit is garaged determines the starting point for the search. Comparable units are similar to the loss unit based on relevant factors. If a sufficient number of comparable units cannot be located, CCC may also obtain dealer quotations for a unit with attributes as reported by the insurer.

CALCULATE VALUATION

Adjustments to the price of the selected comparable units are made to reflect differences in attributes, including mileage/hours, options, additional equipment, refurbishments, after factory equipment, and condition. Dollar adjustments are based upon market research. Finally, the Base Value is the straight average of the adjusted values of the comparable units. Due to the unique nature of the loss units valued in the Commercial and Recreational Vehicle division, a valuation specialist handles each request individually.
