

December 1st, 2023

Hello Collision Industry Community Member,

We hope this note reaches you well.

Here at Contra Costa College, we are excited to empower our dedicated Collision Engineering student apprentices by creating manufacturer led training opportunities and ways to experience the great things our collision repair industry has to offer outside the stall, like taking them to SEMA for their first time.

Our first goal is to help fund our five manufacturer led trainings on the 2024 year's calendar (Equip, SATA, Sikkens, Polyvance, and I-CAR) at an estimated total cost of \$10,000. These courses will provide students with the unique opportunity to participate in training provided by the manufacturer's instructors, receive I-CAR credit, and certificate of completion by each.

Our second goal is to fund an all-expenses paid 3-day trip to the SEMA Show 2024. This experience is geared towards our graduating Collision Engineering apprentices with the focuses of attending training and experiencing a different and exciting part of the automotive industries. Estimated total cost \$10,000.

As one of our supporting partners, we are hoping that you can help by donating to Contra Costa College's Collision Repair Foundation in continued support of our students. We will thank you in multiple ways leading up to and during manufacturer led training events.

Can we count on you for a minimum of \$2,500 to the Contra Costa College Collision Repair Foundation? This gift is 100% tax-deductible and will have a significant impact on student success here at the Contra Costa College Collision Repair Program.

Specifically, some benefits of being a sponsor include:

- Sponsor recognition on event-related material.
- Verbal acknowledgement during the event.
- Space in the event program.
- Acknowledgement in college social media (Facebook, Instagram).
- Written acknowledgment under "Corporate Partners" in CCC Foundation Annual Report.

We have attached a document with some additional information on how to donate.

Thank you so much for considering this opportunity. We will be in touch. Please feel free to be in touch with us if you have any questions.

Yours truly,
Contra Costa College Collision Repair Program Team
